COMPLETE

GENERAL CATALOGUE

PRAY DO NOT CUT THIS CATALOGUE, BUT QUOTE
NUMBERS OF ILLUSTRATIONS AND PAGES.

F. LASSETTER & CO., LIMITED

A WORLD CONDENSED IN A BOOK.

The Buyer's Encyclopaedia

All prices subject to market fluctuations.

When sending any order do not cut page—simply mention price, number of page and number of illustration.

TERMS AND RULES.

This Catalogue is designed for the benefit of those residing in the country districts of Australia and in the Islands of the Pacific, especially for customers who have little opportunity of inspecting the various goods.

LASSETTERS have more knowledge of the country order business than any other house in Australasia, and not alone by their prices do LASSETTERS save money for their customers, but they have reduced the art of executing country orders to a positive science, and possess the secret of how to select the most goods for the least possible freight.

LASSETTERS' OBJECTIVE.—To supply their customers with the best goods at the lowest prices. LASSETTERS guarantee satisfaction, and any article found unsatisfactory may be returned at our expense.

HOURS OF BUSINESS.—8 a.m. to 6 p.m. week days, and 1 p.m. on Saturdays. LASSETTERS are closed on all Public Holidays.

TERMS.—Cash with order except where accounts have been opened. LASSETTERS are always ready to open accounts on receipt of satisfactory references.

Cheques and Post Office or Postal Orders should be made payable to F. LASSETTER and CO. LTD. No exchanges are charged on cheques drawn on banks in New South Wales.

BANKING.—Deposit and current accounts are opened and interest allowed at the rate of 4 per cent. per annum on fixed deposits for six months, and 3½ per cent. per annum for amounts withdrawable at any time without notice. Cheque books issued. The cheques are available to make withdrawals for personal use, and may be cleared through a bank in the ordinary manner.

LETTER ORDERS.—All letters are opened in the presence of Mr. LASSETTER, who personally supervises all country correspondence. All orders are placed in hand within an hour of receipt, and unless goods have to be made in the factory, or require special packing, are despatched the same day.

LETTERS should state—(a) Name (whether Mr., Mrs., or Miss).

(b) Postal address.

(c) Address for goods.

(d) Whether by goods or passenger train, steamer, or parcel post.

Lassetters' Address: Cheapside, Sydney.

TELEGRAMS.—Telegraphic orders are attended to by a special staff.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Orders required to be sent by the North-West Mail should reach LASSETTERS' by noon for Parcel Post; 1.30 p.m. by train. Main North Line, north of Glen Innes, 2 p.m. for Parcels Post, 3.30 p.m. by train. By other Mails up to 3 p.m. Parcels Post, 5 p.m. by train.

Telegraphic Address: LASSETTERS, Sydney.

SHIPPING ORDERS.—Special attention is given to the execution and shipment of all orders to customers in New South Wales, to other colonies, and to the Islands of the Pacific.

LASSETTERS insure all Goods shipped to any port in the world, unless definite instructions to the contrary, of the value of £1 and over, and charge the same to the customer. Goods under the value of £1 are at Customers' risk unless they instruct us to insure them. Insurance covers against jettison and washing overboard, as well as when the ship is stranded, sunk or burnt.

LASSETTERS place their services at the disposal of their customers, and transact business of all descriptions for their clients; rents collected; powers of attorney accepted.

FREE CARRIAGE ON DRAPERY, BOOTS AND SHOES.—We pay Carriage on all Drapery and Boots and Shoes to any part of the Commonwealth, New Zealand, or the Pacific Islands.

FREE CARRIAGE OF GOODS.—Lassetters pay trainage or shipping freight on all Parcels of Electro-plated Ware, and Cutlery, in New South Wales, and on Electro-plated Ware and Cutlery to the value of £2 and upwards to any port in Australasia, New Zealand, or the Pacific Islands.

ON TEA, LASSETTERS pay trainage to any railway station, and shipping freight to any port in New South Wales on 10lb. tins or over and to any port in Australasia, New Zealand, or the Pacific Islands, on half chests.

PARCELS BY POST.—LASSETTERS pay the postage on Drapery, Boots, Electro-plated Ware and Cutlery, when the amount does not exceed the cost of rail or steamer. In any case LASSETTERS only charge the difference, which, in many cases, does not exceed the rail or steamer freight, but LASSETTERS do not pay the carriage on goods sent on appro. and returned.

LASSETTERS pay postage on Watches, Jewellery, Smoking Pipes, Cigar and Cigarette Holders, and cases over the value of fifteen shillings (15/-) to any post office in Australasia, New Zealand or the Pacific Islands.

REGISTRATION FEE, if specially instructed, 3d. extra.

RAILWAY FREIGHTS.—LASSETTERS will always pay freight by goods or passenger train or their customers when instructed to do so. Kindly send instructions to pay with each order. In case of customers having no account, goods will be sent Freight Forward unless a sufficient sum for freight is remitted with the order. For parcels by mail or passenger trains the Railway Commissioners charge 25 per cent. more when the freight is not prepaid, subject to a minimum of 6d. and an additional maximum of 1/-.

STEAMER FREIGHT.—The steamship companies trading on the coast of New South Wales refuse to accept goods unless the freight is paid in Sydney. LASSETTERS are always ready to pay the freight for customers having an account, but in the case of customers not having an account a delay may occur unless a sufficient sum for freight is remitted with the order. There is a stamp duty of sixpence on every bill of lading to ports outside New South Wales, which amount should be added by those who have no account at LASSETTERS.

GOODS DAMAGED IN TRANSIT.—Should it be discovered that goods have been damaged or articles lost from packages during transit, customers should NOT give a clean receipt to the railway or shipping companies, as the authorities always refuse to recognise any claims after a receipt is given. Customers employing carriers or teamsters should specially call their attention to this matter. LASSETTERS DO NOT HOLD THEMSELVES RESPONSIBLE FOR ANY DAMAGE OR LOSS SUSTAINED AFTER GOODS HAVE BEEN DELIVERED TO THE POST OFFICE, RAILWAYS OR SHIPPING COMPANIES.

EVERYTHING SOLID VALUE

W. F. LASSETTER & CO., LIMITED

GOODS REPORTED MISSING.—All orders are most carefully called over and checked despatch, and, where goods have apparently been omitted, a careful search in the straw or packing be respectfully recommended, as in almost every case the goods are discovered to have been received but overlooked.

EMPTIES.—Returned empties received in good condition, carriage paid, will be allowed for full. They should be advised upon being sent off, and a credit note will be posted on receipt of empties. LASSETTERS particularly request, when empties are returned, that the name and address of sender be legibly written upon each package.

DELAYS.—When delay occurs in the arrival of an order, customers are recommended to write at once to the authorities in Sydney. In the case of packages by goods train to

The Goods Manager, Challis House, Martin Place, Sydney.

In the case of mail and passenger train to

Superintendent of Lines, Bridge Street, Sydney.

Should the customer not receive a satisfactory explanation they should THEN write to LASSETTERS, who will at once communicate direct with the Chief Railway Commissioner.

In the case of parcels or packet by post write to

The Deputy Postmaster General, G.P.O., Sydney.

Should the customer not receive satisfaction write to LASSETTERS, who will then communicate direct with the Hon. The Postmaster General.

PATTERNS.—LASSETTERS send patterns and self-measurement forms post free on application. When returning patterns please post them in the wrapper they were received in, and erase your name and address. Affix postage, a penny stamp for every two ounces.

PARCELS RATES.

Special attention is drawn to the following reduced and convenient scale:—

STAMPED PARCELS (PREPAID) RATES.

Railway Commissioners will not recognise any claims over £1 in value for parcels lost in transit when sent by Passenger or Mail Train, consigned to Railway Stations, when sent at the above rate will do so if sent at Commissioners' risk rate, which is 10 per cent. (with a minimum of 3d.) additional freight. Should LASSETTERS' Customers desire parcels over £1 sent at Commissioners' Risk Rate they will please instruct when ordering.

LASSETTERS prepay parcels rates on behalf of their customers to save expense, otherwise per cent. advance would be charged, subject to a minimum of 6d., and an additional maximum of

Those not having an Account must remit the amount with order.

©CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

FREIGHT BY GOODS TRAIN.—LASSETTERS have a special staff of freight clerks whose it is to make a study of the different rates, so as to classify the various goods; if this work is not carefully done a large sum is wasted in the course of a year. LASSETTERS save this for their customers, and will always prepay freight for them. Kindly send instructions to pay with each order.

UNATTENDED PLATFORMS.—The Railway Commissioners only accept goods at risk of consignee or customer, and freight must be prepaid. Those not having an account must remit the amount. LASSETTERS ACCEPT NO RESPONSIBILITY WHATEVER WITH REGARD TO GOODS LEFT AT UNATTENDED PLATFORMS.

RATES OF POSTAGE.

PATTERNS AND SAMPLES.

All places.—Not exceeding 2 oz. 1d.; 4 oz. 2d.; 6 oz. 3d.; and so on at the rate of 1d. for every additional 2 oz.

and so on at the rate of 1d. for every additional 2 oz.		and so on at the rate of 3d. per lb. up to 11 lb.	and so on at the rate of 6d. per lb. up to 11 lb.

MERCHANDISE.

Inland, Inter-State, New Zealand, Fiji, and British New Guinea.		
Not exceeding—2 oz. ...	1d.	} and so on at the rate of 1d. for every additional 2oz.
4 oz. ...	2d.	
6 oz. ...	3d.	
Merchandise to other places can only be sent by Parcel Post.		

VALUE PAYABLE POST.

If preferred LASSETTERS will send goods by the "V.P." system, by which means customers pay the full amount to the Post Office, and be saved all trouble of sending a cheque, postal order, or aft. The exact sum due being charged by the Post Office.

LASSETTERS have fought hard for 1d. postage, and have at last succeeded; the postage is now all Letters to Great Britain and the Dominions 1d. per ½ oz.

LASSETTERS were successful in having the rate for orders reduced to 2 oz. for 1d., but the mentioned rules must be strictly observed.

RULES.—(1) The order must be partly printed. N.B.—LASSETTERS will be pleased to supply order forms, post free on application. The order MUST be in an envelope with the flap left ALLED or fastened with a binder, or tied with string, so as to permit of easy withdrawal of the contents.

Remittances such as cheques, postal notes, or stamps can be enclosed; but drapery patterns, other samples may be enclosed with the order.

Nothing in the nature of a personal communication must be enclosed with the order, such as answers to the customer's account or other matters.

Nothing must be embodied in the order relating to any other subject requiring an answer.

Instructions as to packing, the route for forwarding and effecting insurance may be added.

POSTAGE—1d. per 2 ozs.

EVERYTHING SOLID VALUE

F. LASSETTER & Co., LIMITED

This Book has been compiled with great care, and comprises the concentrated and devoted energy and brains of 850 members of Lassetters' staff.

Lassetters' beseech you not to cut or mutilate the Catalogue. It is only necessary to quote number of illustration and page.

Ready-made Mosquito Curtains

To ensure a proper fit, it is necessary when ordering Mosquito Curtains for Half-tester Bedsteads, to send paper pattern showing exact size and shape of bow of bedstead. This may easily be done by placing the bow on a sheet of paper and drawing a pencil round the outside. With Italian Canopy Bedstead it is only necessary to give the length of canopy arms and width of bedstead. For four-post bedsteads, please give length and width, measuring from the outside. All LASSETTERS' Mosquito Curtains are cut to proper shape, made extra full to allow for shrinkage when washed, and carefully examined before leaving our workrooms.

Lassetters' Patent Sun Blind

(As Illustrations)

MA 102.—LASSETTERS' PATENT SUN BLIND (as illustration). Illustration No. 1 shows the Blind rolled up out of the weather; illustration No. 2 shows the blind down; illustration No. 3 shows the side view.

This Blind can only be supplied by F. Lassetter and Co., who hold the Patent for the State of New South Wales.

Special advantages of F. Lassetter & Co.'s Patent Blind:

1.—When not in use for shading purposes, being fixed on a strong spring roller, it rolls up into a box frame and is protected from the weather.

2.—When down, it shades the windows and lets a current of air into the room.

3.—It is adjusted from the inside or outside of the window and fastened at each side, so that it can defy the elements.

Cannot get out of order

A child can adjust it when once fixed

Fixed by competent men free of charge.

Price for Blind, No. 1 or 2 Quality Blind Tick, 1/3 (one shilling and twopence) a square foot. Thus a Blind 3ft. wide and 6ft. deep will cost you only 21/- each. All other sizes in proportion.

N.B. When ordering this Blind, please send us the outside measurement of the architrave and length of blind from top of architrave to window sill

DRESS DEPARTMENT

COLORED DRESS MATERIAL

In Quoting for Dress Goods, we wish you to acknowledge the fact "that it is impossible to do so for every line stocked," as, owing to the change of fashions, and the introduction of new designs, and makes of materials, it would be most misleading.

We, therefore, to avoid any disappointment, quote only for those lines which are in every day use, and procurable almost at all times.

For any line not quoted, drop LASSETTERS' a POST CARD, and they will be pleased to forward by return, Patterns and Prices. In doing so, it will be much to your advantage, to give us some idea of the Color and Price, and where possible, some idea of the purpose for which it is intended.

FRENCH CASHMERES, all Colors—
40 42 in. 1/4, 1/11

Ladies' Back and Side Combs

We are continually opening shipments of these goods, and always hold a large and varied assortment of the latest productions. The varieties of Fashions, however, cause the designs to be constantly changing, and it is, therefore, almost impossible to particularise. These remarks also apply to Ladies' Belts, of which we hold a large and varied assortment, being all of the newest designs.

THE RIGHT WAY FOR PUTTING ON GLOVES.

INSTRUCTIONS FOR PUTTING ON GLOVES.

Do not put them on in a Hurry.

Turn the wrist well back before inserting the hand, then gently work the fingers on and afterwards the thumb also.

Never force the fingers into place by pressing between them with the fingers of the other hand. Never try to wear a glove which is too small for you.

Carefully follow these instructions and your gloves will seldom split.

Right Way.

Wrong Way.

RIBBON DEPARTMENT.

Our stock is always kept up-to-date in this department. The fashions, Millinery in particular, are ever changing. At one period it may be Fancy Floral designs that are wanted; then, again, Check patterns are in vogue, but at all times, plain colored ribbons are in demand. Below we give quotations of lines we always have in stock.

COLORED GLACE RIBBON, in every fashionable color—

Width	Bebe.	1d.	1 1/2d.	2d.	3d.	1 1/2 inches
Price	10d.	1 1/2d.	1 7/8	2 3	3 3	per yd.
Width	2	2 1/2	3 1/2	4 1/2	6	inches
Price	4 1/2d.	6 1/2d.	7 1/2d.	9 1/2d.	11 1/2d.	per doz.
	4 3	6 3	7 3	9 3	11 3	per doz.

These widths can also be done in Black or White

COLORED SATIN MERV. RIBBON—

Width	Bebe.	1d.	2d.	3d.	4 1/2d.	6 1/2d.	2 inches
Price	1 1/2d.	2d.	3d.	4 1/2d.	6 1/2d.	per yd.	
	1 7/8	1 10	2 8	4 3	6 3	per doz.	

COLORED SATIN MERV. RIBBON—Continued—

Width	Bebe.	1d.	2d.	3d.	4 1/2d.	5 1/2d.	inches
Price	8 1/2d.	9 1/2d.	10 1/2d.	1 0 1/2	per yd.		
	8 3	9 3	10 3	12 3	per doz.		

These are also stocked in Black and White.

BELTINGS, Silk Petersham Beltings, in Black, White, Cream, and all leading shades—

Width	Bebe.	1d.	2d.	3d.	4 1/2d.	5 1/2d.	inches
Price	1 10	2 4 1/2	3 3	4 6	5 3	per yd.	
	1 10	2 4 1/2	3 3	4 6	5 3	per doz.	

BLACK OR COLORED SATIN AND VELVET RIBBONS

Width	Bebe.	1d.	2d.	3d.	4 1/2d.	5 1/2d.	inches
Price	1 10	2 4 1/2	3 3	4 6	5 3	per yd.	
	1 10	2 4 1/2	3 3	4 6	5 3	per doz.	
Width	1 1/2	1 1/2	2	2	2 1/2	inches	
Price	7 3	12	14 6	15 3	per doz.		

All prices quoted for Ribbons are for fair medium qualities. We also stock lower and better goods, if required.

Ladies' French and English Millinery

Hats, Toques and Bonnets direct from the fashion-
able centres of Europe.

Opened every Summer season about 1st September.
Opened every Winter season March 1st.

It is impossible to describe these, as the fashion
changes so decidedly every season; but Lassetters'
are noted for the originality of their Model Millinery.
Prices from 1 to 3 guineas.

Our choice and extensive assortment of Model Mil-
linery is selected by our London and Parisian buyers.
The greatest care and attention is devoted to this
most important department, and ladies will find no
difficulty in choosing their season's Millinery. Any
lady consulting our Milliners can rely on receiving
disinterested advice. Our object is to give satisfac-
tion and secure for us a regular customer.

Ladies' Tailoring to Order.

OWING to the increasing importance of this section and the great demand there now is for "Real Tailored Costumes" we have re-organised this Department, and have secured the services of a skilled Ladies' Cutter who undertakes that perfect fit, style and general build of a Costume which makes for that most desired effect "Individuality." In this is to be found the keynote of smart dressing, and this is only possible to attain by putting yourself into the hands of the "Artist" Dressmaker or Tailor, as the case may be, who is able to make a study of your individual requirements, and by so doing to turn out the perfect article.

The illustration gives one of the latest developments of the Coat and Skirt. It can be done either in Tweed or in Fox's Serge. It has the whole back coat, either S.B. or D.B. front, semi-fitting with the new sheath skirt, trimmed with braid and buttons, ornamentation on coat and skirt being "en suite."

UNIVERSAL PROVIDERS.

C.P. a La Sirene Corsets

are unrivalled for
Elegance, Grace and
Perfect Comfort.

MB 357.—THE MARCILLE is a charming low bust corset, with deep back. It combines comfort and smartness. Made in white broche cloth. Price, 13/9.

MB 358.—THE NADINE is only suitable for slender figures. It gives a good contour to a slim woman. Made in white coutille. Price, 8/11.

MB 359.—THE GLOIRE is a perfect model, made in pale blue broche, made to last, and very long on the hips and back. Designed expressly to meet the requirements of average figures during the present season. Price, 25/6.

We also stock other BEAUTIFUL MODELS in these high grade Corsets. Prices, 30/6, 35/-, 39/6, 42/-, 45/-, to 63/- per pair.

EVERYTHING SOLID VALUE

F. LASSETTER & CO., LIMITED

MB 360.—A SPLENDID MODEL for matronly or slight full figures. Likely to be one of the most popular as well as most comfortable ever designed. Low bust, medium back, long skirt. Made in white coutille. Sizes 2 to 36. Price per pair, 9/11.

MB 361.—STYLE 180. For tall, stout figures; medium high bust, and very long over abdomen, hips and back. It is a model of very new and handsome lines. It will noticeably improve the figure. Made in grey coutille and fitted with new graduated back. Sizes 21 to 30. Price, 12/6.

MB 362.—A MODERATELY COCKSHILL. with long Empire fit for slender figures. It is one of the best and strongest of the long soft skirt. Made in white coutille, light and comfortable. Sizes 19 to 26. Price per pair, 5/11.

WARNER'S CORSET — THE PANSY—a white tape girdle (or Ribbon Corset), sizes 19 to 26. Price, 3/6.

MB 363.—WARNER'S CORSET. A remarkable one at the price. It is a most admirable model with very long hips and back. Made in white coutille. Sizes 21 to 26. Price, 7/6.

MB 364. WARNER'S CORSET. A nursing corset for almost any figure, of the latest fashion, but not extreme: low bust, with glove fasteners on flaps. Made in white satin. Sizes 21 to 26. Price, 7/11.

When Ordering mention the size of bust.

WARNER'S BRASSIERE, OR BUST BODICE, laced in the back—button in front made in white cambric, sizes 32, 34, 36, 38, 40, 42, 44, 46, bust measure. Price, 3/11.

MB 365. WARNER'S CORSET. This is a most suitable for medium and average figures, very comfortable and a most made in white coutille. Sizes 20 to 26. Price, 8/11.

CHEAPSIDE, SYDNEY.

WITH RELIEF BANDS

MB 308.—STYLE 321. Made in grey coutille. Price, 17/6.

The Graceful Well-Dressed Stout Woman

Is becoming more and more noticeable, as the fame of our Nemo Self-reducing Corset spreads. Every new wearer sings its praises to her friends, and tells them how comfortable and well she has felt ever since she wore one, and how much more satisfaction she has given to her dressmaker.

The self-reducing strap, and the relief strap work together to reduce the hips and support the abdomen, while the graduated front steels ensure full play to the vital organs, and a smart, straight front to the figure. These combined, result in a perfectly smooth and elegant contour, replete with grace and dignity.

Lassetters' Specialise in Bust Bodices,

Which are practically indispensable for stout figures.

BUST BODICE, made in long-cloth, trimmed embroidery, laced at back, finished in front. Price, 2/11.

WHITE NET BUST BODICE, well boned, laced at back, button in front. Price, 3/11.

UNIVERSAL PROVIDERS.

Gentlemen's Tailoring Department.

There are many of those little variations, just as there are in nature and from time to time by which it is possible to immediately foretell whether the first-class or the ordinary tailor is responsible for the production.

Lassetters' can say without fear of contradiction, that they now have the most modern and up-to-date tailoring and men's outfitting establishment in the southern hemisphere. We employ the very best cutters and tailors in the State, and guarantee complete satisfaction in every detail. Over ninety years of honorable trading stand behind this statement.

A full range of patterns, with modern self measurement forms, will be sent free to any address.

Pathephones.

(MF 86).—The Machine with the Human Voice.

With the advent of the Pathephone, the talking machine at once attained to the dignity of a musical instrument, as distinguished from a mere machine for the mechanical reproduction of sound.

The Pathe Disc, playing through the medium of a smooth, ball-pointed unweareable sapphire, in lieu of the sharp-pointed needle, represents the last word in the faithful reproduction of sound. It is unweareable and, with ordinary care, unbreakable. The tone is rich, full, and mellow.

Any existing Disc Machine can be easily fitted with the Pathe Sound Box, to enable its owner to enjoy the pleasures of the largest and most artistic repertoire in the talking machine world.

Pathe Discs must only be played with a Sapphire Sound Box. On account can needles be used.

Complete Catalogues posted free on application

£3, £5, £7/10/-, £11 and £15/15/-

Double Sided Records

3/-, 5/-, 7/6 and 17/6 each.

Natural Tone Phonograph Reproducer.

In connection with J. G. Coomb's Patent Diaphragm.

MF 85

Fits any Edison and Edison Bell Phonograph. Produces a rich, sound, mellow tone, and does away entirely with the harsh, metallic ring, which is up to the present the only objection to Phonographs with many people.

For 2min. or 4min. record, each 30
Combination type, playing 2 and 4 min. records, each 30/-
4min. Attachments, for Edison Phonographs, playing only 2min. records, including 10 special Amberol records

Family Bibles. Six Different Styles

No. 1. QUARTO SIZE (12½ x 9½ inches).—Contains the Old and New Testaments, with explanatory notes throughout; marginal references; condensed concordance; a synopsis of the Four Gospels; offices and conditions of men; tables of weights, measures, money and time; a description of the illustrations of antiquities, etc. There are also a colored four page family register; a colored map of the prevailing religions of the world; other maps, colored and plain, and a beautifully engraved title page. In addition there are more than nine hundred (900) illustrations embellishing the book. It is strongly bound in leather with the words "Holy Bible" in gilt letters on the side and back. Price, £1/7/6.

No. 2. THE SAME, IN SIZE, CONTENTS AND BINDING.—With a strong, gilt metal clasp in addition. Price, £1/10/-.

No. 3. THE SAME, IN SUPERIOR BINDING, WITH RED UNDER GOLD EDGES.—Gilt rim inside cover, and very pretty gilt metal corners and two clasps—a beautiful volume. Price, £1/15/-.

Being crowded with illustrations, the above three Bibles are eminently suited for family reading.

No. 4. LARGE QUARTO SIZE (13 x 10½ INCHES).—

Contains the Old and New Testaments; Scott and Henry's commentaries; besides many thousands of critical and explanatory notes selected from the great standard authors of Europe and America by the Rev. John Eadie, D.D., LL.D., Professor of Biblical Literature to the United Presbyterian Church; a preface by Dr. Eadie; a chronological index; a concise Harmony of the Gospels; proper names with their significations; Scripture measures, weights, and coins; a concise Biblical Encyclopedia, alphabetically arranged; the Psalms in Metre, etc. It also contains a beautiful colored title page; an illuminated family register of four pages in gold and colors and it is illustrated with many superb illustrations by Gustave Dore, besides others in colors. There is also between the Old and New Testaments—a literary curiosity that will gratify very many purchasers, i.e., the verse "God hath made of one blood all nations of men," printed in 103 languages, this Bible is handsomely bound in leather, with the title on side and back, and has gilt metal corners and clasps. Price, £2/2/-.

No. 5. THE SAME CONTENTS AS NO. 4. Without the Dore illustrations, but containing many more beautifully colored and tinted pictures. The binding is very rich, being full gilt on the side and back, with superior corners and clasps—a very handsome volume. Price, £2/10/6.

No. 6. THE SAME CONTENTS AS NO. 4. But with an engraved instead of a colored title page. It is illustrated with a larger number of colored illustrations than either numbers 4 or 5, and contains besides a fine selection of black and white pictures on Plate paper after the best artists. It is superior even to number 5 in the binding, having full gilt side and back in a very beautiful and elaborate pattern. The gilt corners and clasps are of a very choice kind. Price, £3.

When ordering, please quote above numbers.

ARNOLD'S MINIATURE COLORED INKS, Violet, blue, green, 3d. each. 2/6 doz.

Gloy

MG 578.

A PASTE FOR CLEAN PEOPLE.

Sweet always and everywhere.

No Water is to be added to "Gloy."

The adhesive efficiency of "Gloy" continues unimpaired for practically an unlimited time, even though, like all semi-fluid substances, it thickens as the years go on, needing a little more pressure under the brush to spread it smoothly. Grips like an octopus—

5-ounce bottles	9d. each; 7/6 dozen
10-ounce bottles	1/3 each; 12/- dozen

Ink Powders

THOMAS' PERFECTION SOLUBLE INK POWDER, Black, Red, Blue, Green or Violet. A great boon to travellers or where it may not be convenient to carry liquid ink. The addition of water only is needed to produce a satisfactory and permanent ink, free from grit and sediment; it is very portable, simple in use, and will keep for years in any climate—

In Packets to make 1 Pint	6d.; 4/6 doz.
In Packets to make 1 Quart	8d.; 7/6 doz.
In Tins to make 1/2 Gallon	1/-; 8/- doz.
In Tins to make 1 Gallon	1/6; 15/- doz.

Ink Eradicator.

INK ERADICATOR AND STAIN REMOVER, removes ink and other stains from paper and clothing without leaving a trace, and without injury to article. Two bottles provided with glass rods and rubber stoppers, in neat cardboard box, with full instructions 1/3 box

Fountain Pens.

MG 126.—THE "CHEAPSIDE," LONDON-MADE FOUNTAIN PEN, can be supplied in fine, medium, or Broad Points

The special feature of this Pen is in its being no thicker than an ordinary penholder, thus making it pleasant to hold, without cramping the hands. The ink capacity is large, and being of simple construction the Pen is not likely to get out of order. Full directions are given with each Pen.

The Nib is a fine English-made gold pen of 14 carat, with iridium points. A wonderful line for the money, 3/- each.

THE "LASSETTER" No. 5 FOUNTAIN PEN—Fine, medium, or Broad Points. A first-class British-made Pen; will last, with ordinary care, for many years. Any Steel Pen can be matched, with large 14-ct. Pen; finely polished, hard Vulcanite 4/6 each

THE "LASSETTER" No. 6 FOUNTAIN PEN can be supplied in Fine, Medium, or Broad Points. A strong useful Pen, Small Barrel, Waistcoat Pocket size. 5/- each

THE "LASSETTER" No. 9 FOUNTAIN PEN, with patent underfeed special ducts in the feed bar, prevents blotting. The Pen is simple in construction and is easily cleaned; holds a large supply of ink; fitted with strong Gold nib with channelled feed. Price 4/- each

MG 437.

THE "GLOBE" No. 13 FOUNTAIN PEN, in Fine, Medium, or Broad Points made in the new art green vulcanite, with two Rolled Gold Bands; a splendid Pen for presentation, packed in velvet-lined cases; a very popular line, and quite new. Splendid value, and specially recommended. With twin-feed and silver wire (as illustrated) 6/6 each

MG 127.—THE "SIMPLEX" SELF-FILLING FOUNTAIN PEN, fitted with 14-ct. Gold Nib, with channelled feed; self-filling, self-cleaning, nothing to get out of order, no perishable rubber tube. The "Simplex" Pen is cleaned by a few turns of the piston in clean water. Because of the ease with which the "Simplex" Pen can be cleaned, copying or any other ink may be used. "Simplex" Fountain Pens are made on the principle of a syringe, and are filled by simply pulling out the piston rod. A splendid Commercial Pen; Nibs to suit all writers, and of the highest class workmanship. The simplest Pen made, and every Pen a pleasure. The Gold Nib is Iridium-pointed, and therefore indestructible. Note the reduced price 5/- each

Popular Stylograph Pens.

MG 143.—THE INDEPENDENT STYLOGRAPH PEN, in Burnished Vulcanite, with large Reservoir for ink.

The special feature of this Pen is the same as in the Fountain Pen. It is no thicker than an ordinary pencil, and is light and convenient for the hand. The point and wearing parts are made of specially hard metal, carefully made and finished, so as to write smoothly and regularly as if with a pencil. It is always ready for use. Superior and well made reliable Pens at moderate price. By an ingenious arrangement the flow of ink is regulated, thus preventing any leakage. The Independent Stylograph Pen, in a box, with ink, price, each 2/6.

Cleaning from time to time is advisable, as it insures a constant and regular flow of Ink.

MG 144.—THE "CROWN" STYLOGRAPHIC PEN, a very strong, well-finished Stylo Pen. Simple in construction and of good workmanship; large ink-holding capacity; has a steel needle, will last for years; packed in box, together with filler, etc. Exceptionally cheap and a leading line, price each 2/6.

MG 145.—THE "DWARF" STYLO PEN, finished in the new polished Vulcanite; a handy Pen for the coat pocket, being only 4 inches in length, at the same time holding a large supply of ink. Each Pen in neat box, with filler and directions, 3/6 each.

For vertical and fast writing, the Stylograph Pen takes the place of the Steel Pen or the Lead Pencil.

The "Long-Short" Stylo

Long for writing—Short for pocket, purse, wrist bag. Writes smoothly just like a pencil, and lasts for years. Price 3/6

Length when open for use, 4 inches when closed for pocket, 2 1/2 inches.

MG 447.—"LONG-SHORT" STYLOS—

Spring Needle, extra smooth point, in black, tan, and mottled

3/6

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

The New Patent

Anti-Blotting Pens.

These Pens are made in various forms and different-sized points, to suit most hands. The annoyance caused by a pen dropping the ink whilst taking it from the inkpot to the writing paper, and even after beginning to write, has been felt by most people. The construction of this pen prevents the dropping of the ink if the pen is not shaken vigorously, and also, by this arrangement, the peculiar formation of the point also gives the pen something of the goose-quill action, and is used by some writers, and also acts to some extent as a reservoir pen.

5d. per box

Waverley, rapid and quill-like in action.

Big Waverley, softer than above, similar action.

Packwork, suitable for swift commercial writing.

Owl, turned-down point, perfect flexibility.

Nile, firm and free, great ink capacity.

Phaeton, turned up points, great ink capacity [also medium points].

Hindoo, fine degree, strong lasting pen.

Flying Scotsman broad point, flanged to retain the ink.

Scotch Express, soft and flexible, flanged to retain the ink.

Flying Dutchman, turned-up points, writes 300 words with one dip of ink.

The J, a favorite pen.

ALL AT 5d. PER BOX.

Brook's Famous American Pens.

Relief, a yellow metal engraving pen does not easily corrode. 5d. per box.

Probate, large engraving, medium points. 5d. per box.

Blackstone, a broad point engraving pen. 5d. per box.

THE JUDGES' QUILL PENS, very durable and smooth in action 5d. box.

MITCHELL'S SELECTED STEEL PENS, for easy writing writers 5d. box.

M Pens 5d. box

Joseph Gillot's Celebrated Pens

For Ledger work.

No. 292, 293, 294 1/6 gross box.
No. 404, Fine or Medium 1/6 gross box.
No. 303, Extra Fine 3/6 gross box.

All the above are stocked in 6d. boxes.

ADVANTAGES OF THE BALL-POINTED PENS.

This is without doubt the most important improvement in steel pens since they were first introduced.

BALL-POINTED PENS are suitable for Writing in every position; glide over any paper; never scratch; never spurt. Being made of the finest Sheffield rolled steel, broad-pointed Pens are much more durable, and therefore more economical than any other.

Suitable for all Writers.

506 - Falcon Pen.

MG 211

**A MOST
USEFUL
NOVELTY.**

MG 212

MG 211 and MG 212. EAGLE "ARROW" PENHOLDER—

This penholder is more especially intended for pocket use, as it is hermetically sealed against dirt or dust when closed.

In appearance and working it greatly resembles the celebrated Automatic Pencil, though in its mechanism it is entirely different.

A simple pressure upon its cap when held point downward, will release the check or button, and the pen drops into position, the check slipping into a groove made for the purpose in the penholder, and holding it securely.

To close the penholder simply reverse it, and press upon the cap, when the check will be released, and the pen slides back into the holder.

THE "ARROW" POCKET PENHOLDER, in black japanned case 5d. each; 4/9 per doz

UNIVERSAL PROVIDERS.

RUBBER TYPE SETS.

ENDLESS VARIETY. ALL STERLING VALUE.

Each Type Set in Box complete with all necessary Punctuation Marks, Tweezers, Hand e Holder, Pad, Ink etc. When purchasing a Type Set, it is always advisable to get a good one at the start. We do not recommend the cheaper Sets for constant business purposes.

THE SUPERIOR OFFICE PRINTING OUTFITS are the best value in Type Sets known. Every letter is perfectly made of the VERY BEST RUBBER and the alignment is perfect. We have these in four sizes as follows:

Office Printing Outfit No. 0.

Contains 12½ Letters, Figures, Stops, Spaces, etc., complete, also Type-holder for setting up a two-line stamp, Pad, Ink and Tweezer. The letters are Capitals only, and are slightly smaller than those in the No. 2 Outfit. Price, 1/6.

OFFICE PRINTING OUTFIT, No. 1, contains 151 Letters, Figures, Stops, Ornaments, Spaces, etc., just as shown, also Type-holder for setting up two lines (name and address, for instance), also Self-Inking Pad, Tweezers, etc., complete in box. Price, 3/6; Extra Holders, 1/6.

OFFICE PRINTING OUTFIT, No. 2 contains 253 Letters, Figures, Punctuations, Ornaments, Spaces, etc., also Type-holder for setting up THREE LINES Superior, Self-Inking Pad, Tweezers, etc., complete in box. Price, only 5/-; Extra Holders (3 lines) 2/- each.

"PARA" SOLID RUBBER TYPE
No. 1.
Business Printing Outfit.

Complete
RUBBER STAMP
CATALOGUE
on Application.

OFFICE PRINTING OUTFIT, No. 3.

This is the most popular, most serviceable, and best value TYPE SET we have. Being fitted with a Type-holder for setting up four lines, it is most useful for printing Tickets, Addresses, Envelopes, Tags, etc., etc. Contains 260 Letters, Figures, Punctuations, Ornaments, Spaces, etc., also 4-line Holder, "Excelsior" Self-Inking Pad (the Pad alone is worth 1/-), Tweezers, etc. A Magnificent Outfit. Price, only 8/6.

SIGN-MARKING OUTFITS.

No Up-to-date Shopkeeper should be without a SIGN-MARKING OUTFIT. The very low price, and the many purposes these sets can be used for should cause even the smallest business concerns to have at least one set in constant use; for it will pay its way every day, and, as only the best materials are used throughout in their manufacture, the "Sign" Markers are practically indestructible, and will last a lifetime. They are very effective for printing tickets in shop windows, and numerous other display purposes. We have a very large assortment, including the following popular lines:—

No. 10 Sign-Marking Outfit.

ABCD

Consisting of Capital Letters A to Z, Figures, Punctuations, Punctuation Marks, Pad, Ink Gauge and Rule, complete in Box for 8/6.

No. 11 Price-Marking Outfit.

Same as No. 10, but including Capitals and Small Letters. Price 10/6.

No. 12 Sign-Marking Outfit

Supplied only with 2 Lines. Price 12/6. Also No. 10. Price only 3/6.

No. 13. Price-Marking Outfit.

Same as No. 12, only a little larger. Only 4/6.

Aa

No. 14.

WINDOW TICKET
PRINTER.

This is one of the most popular Sets we have. It contains a very complete set of Letters (both Capital and Small), Figures, For, And, etc., Ornaments, Spaces, etc., and is supplied with Wooden Rule and Metal Spacer, also a Tube of Black Ink, and Type-holder, Inking Pad. Each letter is mounted in Varnished Moulding. They are put up in extra-strong boxes, highly finished, and are without doubt the best Sets sold at the price which is only £1/10.

Latest and Best Numbering Machines

Besides the Repeating, Consecutive and Duplicating movement, this Machine can be set to Triplicate and Quadruplicate.

The different movements are instantly changed from one to another by simply turning an indicator. The dial will always show the operator how the machine is set.

The machine is an advanced improvement on all other Automatic Numbering Machines in the market. It is a Marvel of Simplicity, works accurately and does not get out of order through mechanical complications. The highest possible grade of materials, workmanship and finish has been attained in this machine. It is light in weight, has steel wheels, and drop ciphers. All the wearing parts are of hardened steel.

Samuel

AUTOGRAPHS.

Your signature accurately reproduced in Rubber. When ordering send the desired signature written on clear white paper, with Black Ink, and examine carefully particularly the connections of the various letters. **Price**, any signature up to 2½ inches long 7s. 6d. Over 2½ inches, 1s. per inch extra. Or 2 stamps of the same signature, up to 2½ inches long; over that 2s. per inch extra. We recommend our Quick-Drying Pads (price, 1s. 6d. each) for use with Autographs, owing to its great similarity to ordinary ink, and the clear impression it gives.

Crests, Emblems, Trade Marks, etc. Accurately Reproduced in Rubber

We do a great deal of this class of work. Prices range from 1s. upwards according to the amount of matter. This price also includes specially executed block for printing purposes. Trade Marks, &c., from 5s. each. Always send design required.

THE COUNTING HOUSE FLEXIBLE RULER.

Makes Ruling a Pleasure

Consists of two flexible plates made of best nickelled
watch-spring steel, interlaid with blotting paper,
preventing blotting the books and soiling the fin-
gers. Being flexible, it will adapt itself to the
curved shape of account books so that rules can
be drawn at a single stroke without shifting the
ruler. By using this Ruler all possibility of ink
smearing is avoided. Made in France & 7/6

12-inch	6d.
15-inch	1/-

TO SAVE TIME IS TO LENGTHEN LIFE

THE PATENT "LOCK-CLIP" BOX FILE.

Handsomely Bound with Cloth Backs. Attractive Label on Back.

THE STRONGEST,
THE NEATEST,
THE CHEAPEST,
AND BEST.

The Simplest, most Rapid,
and most Economic method
of filing **LETTERS, INVOICES,
AND PAPERS OF
ALL KINDS.**

MG 390

The special feature of this File is that the "Lock Clip" when pulled into position remains fixed, and leaves both hands free for the handling of papers.

Inside Measurement
Letter size, 11 x 9 x 1 1/2 in. 19 each
Folio size 14 x 9 x 1 1/2 in. 27- each

MG 263.—Showing Arch Folded down for Packing.

MG 263 THE "PACKWELL" APRON FILE (made specially for the country trade). The arch, by very simple action, folds down for packing and so cannot get bent. When the files are in use, the arch stands and is perfectly rigid. These files pack quite flat, and therefore not only do not run any risk of damage, but save freight. Safe, light and extra strong make a special feature of this File is that the arch opens UPWARDS (and not sideways), which will be found of great advantage when the File is partly filled with papers—

1/- each, 11/6 doz

THE NEW SERIES OF WIRE PAPER-CLIPS.

Superior to Pins or Paper Fasteners, for attaching Cheques, Drafts, Cards, etc., to Letters.
We are headquarters for the supply of these Clips.

The Bendover Fastener.

(Patent)

Absolutely Secure
No Pins or Points
No Holes in Paper

The Bendover Fasteners are an improvement on the old style of Fastener, especially for letters and the thinner bundles of papers; they are easily applied, do not mutilate the papers, and can be used many times. In boxes of 100 fasteners, 8d. box.

The New Series Paper Clips

Leading Features.—1. Does not mutilate papers or correspondence. 2. Fixed instantaneously. 3. Easily detached. 4. Very useful for enclosures in Letters.

THE "NIAGARA"—the Double-grip Paper Clip—is the Strongest, most practical Clip on the market. Made of Best Spring Brass Wire, giving proper tension. 100 in box—
8d. per box, 1/- per doz. boxes.

THE "DAISY" PAPER CLIP. Holds securely from the Thinnest Sheet of Paper up to 4-inch in Thick ness. 100 in box—4d. per box, 3/6 per doz. boxes

THE RING PAPER CLIP. A Practical Paper Clip, easy to use, fits the fingers, holds papers securely. 100 in box per box 8d.

MG 200.—THE "SERVICE" PAPER CLIP. Best Plated Steel Wire. These handy little Clips do not pierce or mutilate the papers or prick the fingers. They are quickly applied and removed without injury, and may be used over and over again—
8d. per box, 5/3 doz. boxes

In Ordering, Please State Number, Description, Size, and Price.

Firmer Clips.

THE "FIRMER" PAPER CLIP, a necessity, does not mutilate your papers.

The "Firmer" Paper Clip is the latest, the quickest, and by far the neatest and best invention for the fastening together of letters and papers of every kind without mutilation. Can be attached and removed in a moment, and can be used over and over again.

POINTS.

1. Perfectly flat.
2. Will not slip.
3. Quickly attached.
4. Easily removed.
5. Can be used over and over again.
6. Will hold one sheet of paper as firmly as a number.

The Perfect Composition Roll

A new and improved method for reproducing letters, plans, circulars, Customs entries, manifests, typewritten matter, music, bills of fare, etc., etc and all written or drawn work

MG 277

For Duplicating
Letters, Plans,
Music, Typewritten
Matter, &c.

MG 278.

MG 277.—THE PERFECT COMPOSITION ROLL
is composed of a strong cartridge paper, surfaced to a certain thickness with a composition which has the properties of reproducing copies (see directions for use).

9 INCH "ROLLS"	10 6 each
11 INCH "ROLLS"	12 6 each
15 INCH "ROLLS"	17 8 each
18 INCH "ROLLS"	25/- each

MG 278.—INK FOR THE PERFECT COMPOSITION ROLL—

Colors of Inks	Price.
Black	1/6 per bottle
Violet	1/- per bottle
Green	1/- per bottle
Red	1/- per bottle

Black Ink is the most powerful ink we manufacture—150 copies can always be taken from one impression.

Violet, Red, and Green are equally popular, and will give up to 100 excellent copies

If only 3 to 10 copies are required, use Violet or Green Ink for the original.

One hundred copies can always be taken from a typewritten original if a Hectograph Ribbon or Hectograph Carbon has been used in the Type writer

Hectograph Ribbons ... 3/6 each; 4/6 per post

Hectograph Carbon Paper ... 5/6 qr.; 8/- per post

The Neo-Cyclostyle Duplicator.

(Gestetner's Patent.)

SIMPLE, INEXPENSIVE, DURABLE.

A Perfect Stencil Copying Machine—2,000 copies from one original.

Handwriting—Typewriting—Drawing—Music.

MG 519.

The Advantages claimed for the Neo-Cyclostyle over other processes are as follows:

- 1st. Superiority of Work.
- 2nd. Number and Uniformity of Copies.
- 3rd. Extreme Simplicity.
- 4th. Rapidity.
- 5th. Errors can be rectified.
- 6th. Economy in use.
- 7th. The Writing is done from beginning to end without having to shift the Stencil Paper.
- 8th. Copies can be printed and figures filled in to any Ruled or Printed Form, or Lists by means of a celluloid sheet.
- 9th. The Neo-Cyclostyle Copying Process is practically the only one that will work satisfactorily and continuously in a hot climate.
- 10th. Unrivalled for Copying Music.

UNIVERSAL PROVIDERS.

"Dancing Girl" Crepe Paper.

MG 607

The Crêpe can be folded, twisted, plaited, stitched by hand or machine, like cloth, and is confidently recommended as an effective substitute for silk and other expensive materials for all kinds of decorations, etc.

The "Dancing Girl" Crêpe Rolls, although nominally 7 feet long, stretch easily to 14 feet of finely creped paper.

THE "DANCING GIRL" BRAND CRINKLED PAPER in rolls 20½ inches wide and about 7ft. long. Stocked in 40 colors, for making Lamp Shades, Candle Shades, Fans, Fancy Ball Dresses, and an endless variety of Fancy Articles. The demand for this brand has reached large proportions because of its uniformly high grade, delicate coloring, and great strength. 5d. per roll, 4/6 doz.

When Ordering it is sufficient to quote Number only.

W. F. LASSETTER & CO., LIMITED

CHEMISTS' DEPARTMENT

Showing a small selection from Stock carried of Pure Drugs, Chemists' and Druggists' Sundries, Proprietary Medicines, Perfumery, Brushes, Etc.

In issuing this, we would call attention not only to the moderation of our prices, which are acknowledged but to the excellent quality of the whole of our chemists' stock, fresh, up-to-date and, when seen, most inviting. Visit this department and judge for yourselves.

Dispensing Department

This most important section of our business is, by agreement with our Mr. Arthur Bainbridge, under his personal supervision—his qualifications are now too well known to need repetition suffice it, his West End, London, and ripe Australian experience is a guarantee that the ethics of the profession will be duly and faithfully observed. Only qualified dispensers are employed, and only recognised and purest drugs, chemicals and pharmaceutical preparations used. We would impress upon the Medical Profession and our friends generally that, where possible, our drugs are standardised and physiologically tested.

Our well-known facilities of quickly reaching our most distant customers, is a great argument in favour of this department. "Urgency" in medicines necessitating quick despatch, our friends may rely upon our immediate attention to their wants in every branch of this business.

As we are the only chemists who have as large a country connection as a town one, it follows that we have a larger volume of business than any other chemist. This in itself is a guarantee that our **DRUGS ARE ALWAYS FRESH.**

Drugs and Chemicals in Common Use

ACID, BORACIC, Powder or Crystals .. per lb. 6d.

Elastic Silk Hosiery

Best Quality

In all cases the exact measurement of the limb, taken next to the skin, must be sent.

Measurements should be taken on first rising in the morning, since the limb is then in the most natural condition.

MH 34

Directions for taking measurements for Stockings. Kneecaps, Anklets, etc., etc.

For an Ankle, take circumference at A B C and length of sole of foot to C.

For a Kneecap, take circumference at E F G.

For a Knee Legging, circumference at C D E F G, length from C to F.

For a Knee Stocking, circumference at A B C D E F G, length from sole of Foot to F, and from F to G.

For Garter Legging, circumference at C D E, length from C to E.

For Garter Stocking, circumference at A B C D E, length from sole of foot to E.

For Thigh Knee Cap, circumference at E F G H I, length from F to I.

For Thigh Legging, circumference at C D E F G H I, length from C to F and from F to I.

For Thigh Piece, circumference at G H I, length from G to I.

For Thigh Stocking, circumference at A B C D E F G H I, length from sole of foot and from F to I.

N.B.—If a pair is required, the measurements of both limbs separately should be given.

Prices for Stock Sizes

Kneecap	per pair	6/-
Garter Stocking	per pair	10/-
Garter Legging	per pair	9/-
Anklets	per pair	6/-

N.B.—Stock sizes of Elastic Silk Hosiery are numbered from No. 1 to No. 12; and when measurements are sent to us, in a great majority of cases a stock size will fit occasionally through swelling and other causes it is found necessary to have them made specially—we therefore quote prices for those when made to order.

FORMALIN SCHERINGS, 1/6 and 2/6 per bot.; 14/6
per gallon.

The value of disinfectants is fully recognised to-day, but it is not always easy for the public to discriminate between those that are of first-class quality, and are real disinfectants, and others that are less worthy of patronage. There need be no mistake, however, if one selects the disinfectant used in His Majesty the King's Household, and in the Royal Stables and Kitchens, for to gain such distinction a disinfectant has to pass through severe tests. It is interesting and valuable to know that Jeyes' Fluid is the one thus honored.

JEYES' FLUID has been recommended by the Medical Profession for over 30 years, and is the ideal disinfectant for household, stable and general disinfection. One of the most important points about Jeyes' Fluid is that it is **non-poisonous**, so that it may be placed without fear in the hands of inexperienced persons.

JEYES' FLUID, 4oz., 6d.; 9oz., 1/-; 1-gall. tins, 7/-; 5-gall. drums, 30/-

UNIVERSAL PROVIDERS.

MEAT SAFE AND STERILIZER

Walmesley's Patent.

A boon to the Farmer and Settler, or anyone not having a daily meat supply.

Perishable foods, such as meat, fish, and eggs, can be kept absolutely fresh and sweet for weeks without the aid of ice.

When not required for sterilizing, it can be used as a meat safe.

It costs threepence to sterilize the contents of a safe having a capacity of 10 cubic feet.

Price, 63/-.

Sterilizing Tablets, 6/- box of 100.

MJ 168.

THE "TRITURATOR" SOUP STRAINER.

These machines are extensively used in hotels, restaurants, soup kitchens and large establishments for straining soups.

65/- each

MJ 167.

THE "HOME" CAKE MAKER.

This machine is simple in construction and easy to work and clean. It mixes rapidly and thoroughly. The capacity of the Pan is one gallon, which is made of one piece of Sheet Steel heavily Tinned, which prevents the batter becoming darkened, and prevents rusting.

Price—8/6 each.

Specialities for the Kitchen

THE UNIVERSAL BREAD MAKER.
For Cakes or Puddings (MJ 169).

The Bread Maker is Simple, Economical, Sanitary, easy to operate and clean, mixes and kneads bread in three minutes. Hands do not touch the dough.

Capacity 4 to 6 loaves, 12 lb.

MJ 165a.—TON GUE or BROWN PRESSERS.—

Extra Strong Tin.
8 lb, 9 lb, 11 lb each

WARREN'S COOKING POTS (OVAL).

2 gallons ...	25/- each.	4 gallons ...	36/- each
3 gallons ...	30/- each	6 gallons ...	40/- each

The novel process introduced consists in cooking without the viands coming in contact with water or steam. The meat is cooked in an inner vessel, the outer one containing the water being kept at a boiling point.

The food thus prepared is cooked in its own vapour, and none of its nutritious properties wasted.

OHIO STEAM COOKER

The Ohio is a cooker, not a cheap bucket steamer. It costs a little more than the round kind, but is worth a great deal more. The Ohio is constructed on scientific principles, everything from soup to dessert can be cooked at the same time, over one burner, without the intermingling of odors whatever.

UNIVERSAL PROVIDERS

Ironing Day's Wants

MJ 204.

"MRS. POTTS" IRONS. Nickel-Plated.

The great merits of these irons are universally known. They are better made and fine finished, and hold the heat longer than any other iron, and being double pointed will iron either way. The handle is made of walnut, and detachable by a spring, and being circular shape fits the hand naturally, so all straining is avoided. The sets comprise three irons and one handle. No. 1 weighs four lbs., No. 2 five lbs., No. 3 six lbs.

Per Set of Three, with handle and stand 5/6
Extra Stands each 6d.

THE "DALLI" BOX IRON.

Double the work in Half the Time.

As the "Dalli" Box Iron gives intense and uninterrupted heat, all the labor is saved of taking the iron to and from the stove, and as the iron never loses its heat it need not be passed over the linen so often, like the old-fashioned iron; a vast amount of muscular energy is therefore saved. Directions for use are attached to each iron.

6/6 each.

Silicated Carbon Filters (MJ 314)

Patent Self-Aerating Movable Block.

Each time that the Filter is filled, the air under the Aerated Cover is forced in the direction shown by the arrows through the Silicated Carbon Block, so that the water is aerated and filtered simultaneously, rendering it ever after pure, bright and palatable. The Silicated Carbon Block can be instantly removed, leaving the whole of the filter open for inspection and cleansing.

DOMESTIC FILTERS, in cream-colored Stoneware, with Covers and plated Taps—

Summer Goods

The "Zero" Combination Cooler

CRAWFORD'S PATENT.

MJ 329.

Will keep Provisions, Milk, Butter, etc., Cool and Fresh, and effectually prevents souring.

It is also a reliable Filter and Water Cooler.

The provision chamber is surrounded by the water cooling compartment, and is fitted with a well ventilated cooling cover and two large direct exhaust cowls, which keep a continuous current of cool air circulating throughout the compartment.

The filter is connected with the outer cooling compartment, and the water is thoroughly cooled before being filtered.

The "ZERO" is strongly made of the very best materials, and fitted with ropes for hanging under shade in a good draught.

Price 40/- each

MJ 416.

The Best Spring Brass Wire is used in the construction of our cages. Every wire is firmly rivetted to the rails by machinery, no solder being used. This, together with the closing of the wires at the top into a heavy brass ring, in place of the usual method of soldering, gives these Cages a strength and firmness combined with lightness, and a durability unequalled by any other on the market.

Among the other special improvements which these Cages possess, attention is called to the patent fastening of the body to the base. This is so arranged that it can be reached easily, being on the under side of the base; and it is not necessary when attaching the body to place it in any particular position. However placed, the sides hold equally well, and in a way that makes accidental unfastening impossible.

Breeding Cages

The Best and Cleanest for Kitchen Use

Aluminite

A New Porcelain which withstands the effect of fire and may be placed directly on the flame of a stove

French Fire-Proof China

The tables made in this celebrated Fireproof China are admirably suited for cooking purposes. The Cafetieres, though made on the same principle as metal ones, are far sweeter. Coffee can be boiled in them and remain without taint. Saucepans, Milk Boilers, etc., are equally serviceable, and are always kept in stock. It is certain that the superiority of French cookery is mainly due to the extensive use of this Fireproof China.

Watch, Jewellery & Optical Department.

Each Section is complete with nothing but HIGH QUALITY GOODS
AT THE VERY LOWEST PRICES

WE have endeavoured to illustrate for the benefit of our patrons most of the leading lines with which this Department is stocked. As our London Buyer sends us a continual supply of all the most modern designs in Artistic Jewellery and Up-to-date Optical Goods, we, of a necessity, are quite unable to give an adequate description in the following pages of the immense stock we carry. Should we have omitted to mention or illustrate any particular article required, we shall be only too pleased to forward a detailed description of same with quotations per return mail.

It is our endeavour always to sustain the reputation we have enjoyed for so many years of being able to guarantee the quality of every article supplied by us.

WATCHES A SPECIALITY.

25 YEARS GUARANTEE WITH LASSETTERS' WATCHES.

We make a speciality of a line of **WATCHES**, which are illustrated in this section. Every Watch sent out bears our guarantee that satisfaction will be given or money promptly returned.

We employ First class Watchmakers only, to undertake repairs of any description of Watches or Clocks sent to us, also a Staff of Working Jewellers who will remodel your old Jewellery into modern designs or repair your broken Jewellery.

First-class Workmanship and moderate charges ensured.

OPTICAL DEPARTMENT.

We ask you, under no consideration, to miss reading our remarks and words of advice which are printed on Pages 434 and 435; you may save another's sight even if your own is perfect.

Our stock of Spectacles, Frames, Reading Glasses, Compasses, Thermometers, Barometers, Telescopes, Field and Opera Glasses, is one of the most complete in the Commonwealth.

F. LASSETTER & CO., LIMITED

Lassetters' Famous Watches Warranted for 25 Years

ML 1.—LASSETTER'S FAMOUS "WANDERER" WATCH. This is the article which has built up a great and lasting reputation for a most reliable and strong Watch Lever Movement, Heavily Silver plated Case. Post free 17/6.

Every watch is thoroughly examined and regulated by our own watchmaker before delivery.

ML 2.—LASSETTER'S DEMI HUNTING "CAPTAIN CUTTLE" WATCH. Same movement as our Hunting Case Captain Cuttle. The case of this watch has enamelled figures on the outside; thus the movement is kept cleaner, there being no occasion to open the front to see correct time. You have the facilities of an open face watch and the protection of a double case. Post free 25/-.

ML 3.—LASSETTER'S OXIDISED "WANDERER." Precisely the same as our Famous Silver-plated "Wanderer," only in a strong, well fitting Oxidised Steel Case. Post free 20/6.

Should any of our watches prove unsatisfactory, we will willingly supply a new one in its place.

ML 4.—LASSETTER'S RENOWNED "CAPTAIN CUTTLE" WATCH. This Watch is specially built to stand rough and hard wear. Lever Movement, Strong, Heavily Silver-plated Hunting Case. The Watch for Station use or Farm Work. Post free 22/6.

ML 5.—LASSETTER'S "TRUE AS STEEL" WATCH. This watch was specially built to Mr. Frederick Lassetter's own specification, and has proved itself a most accurate and reliable timekeeper. Fully Jewelled Movement, in a neat Sterling Silver Hunting Case. Post free 40/-.

ML 6.—LASSETTER'S DEMI HUNTING "BARON." A high-class Fully Jewelled Movement, in a well-made and handsome Sterling Silver Demi-Hunting Case. Post free 45/6.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Lassetters' Watches—Accurate, Reliable and Inexpensive

ML 7.—LASSETTER'S "VICTORIA" WATCH. High class Fully Jewelled Movement, in a Sterling Silver well finished Open Face Case. Neat, Accurate and Reliable.

Post free 32/6.

ML 9.—LASSETTER'S PRESENTATION GOLD WATCHES. We have a large and varied stock of these watches, and for price and grade of watch we guarantee every satisfaction.

1st Grade £7/10/-, £10/10/-, and £12.
2nd Grade £5, £6 and £7.

ML 8.—LASSETTER'S OXIDISED "CYRUS" WATCH—Gent's Size. A splendid Fully Jewelled Movement, in a strong well finished, dust proof Oxidised Open Face Case.

Post free 30/-

ML 10.—LASSETTER'S DEMI HUNTING OXIDISED "CYRUS". A beautifully finished and strong Watch—the Height of Neatness. One esteemed Charman is wearing one of these watches, and he declares it to be the best timekeeper he ever carried.

Post free 50/-

ML 11.—LASSETTER'S ASSORTED GOLD "CYRUS" WATCH. 1. engine turned case. English made. This watch is equal in appearance to a handsome solid gold case. Movement is freely jewelled. A watch we can recommend for timekeeping and appearance.

Post free 55/-

ML 11a.—LASSETTER'S HIGH GRADE ROLLED GOLD DEMI-HUNTER WATCH, Plain or Engine Turned Case, equal in appearance to a handsome solid gold case. These are accurate timekeepers.

Post free 57/6

Eyesight Defects and Cures

WARNING.

IMPORTANT

INTRODUCTION.

Selecting Spectacles at random is Most Injurious to the Sight.

Read what an eminent Oculist has to say on this Subject :

A mere *spectacle vendor* is not an *optician*. He is a particularly dangerous quack. He should be shunned even more than the so-called quack doctor—because why? The eyes are most important organs in the human frame, and require most careful attention.

"There is one chance in a hundred that the glasses bought from one of these spectacle vendors will assist your eyesight, but there are ninety-nine chances they will seriously injure it, therefore it is very important that your glasses should be *exactly correct*."

A slight correction, promptly and properly attended to, may ensure you perfect vision to the end of your life.

The skilful optician has special methods for aiding defective sight. A careful study of the laws of optics, the anatomy and physiology of the eye, makes it possible to correct or assist all ordinary defects by the adoption of suitable lenses.

The knowledge of our optician is at your service FREE GRATIS. He will examine your eyes and advise you honestly.

Call and see us on your next visit to town.

THE CONTENTS OF THIS SECTION MAY NOT
INTEREST YOU IF YOUR SIGHT IS PERFECT.

But IS IT PERFECT?

REMEMBER THIS :

Your Daily Bread
Your Happiness -
Your All - -

DEPENDS ON YOUR
- HAVING GOOD -
SIGHT.

Let us assist you to secure and retain the pleasure of GOOD SIGHT.
A pair of LASSETTERS' SPECTACLES will make all things clear and
pleasant.

You may save a friend's sight even if your own is perfect, or a child's future happiness may be saved even if your own is secure. Therefore, these facts are worth your keeping.

We do not intend to dwell on the numerous defects of eyesight, only giving space to a brief outline of the most prevalent. But we do want to impress on you the absolute necessity of having your eyes attended to, and at once.

**DO IT TO-DAY—for
TO-MORROW NEVER COMES.**

OUR KNOWLEDGE is the result of years of **CAREFUL STUDY.**
OUR METHODS and **INSTRUMENTS** are the **VERY LATEST.**
OUR CHARGES are the **LOWEST.**

NO CHARGE FOR EXAMINATION.

This is the Most Valuable Catalogue you ever had.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

OUR KNOWLEDGE IS YOURS FOR THE ASKING.

This illustration shows the parallel rays of light entering the pupil, passing through the refracting media, and coming to a correct focus on the retina. Such an eye is called "Emmetropic," or "In Measure."

Emmetropic Eye

Eye in Measure

Are YOUR Eyes "In Measure?"

ML 312.

Hypermetropic Eye

or

Long Sight Eye.

ML 311.

Owing to the eyeball being long, the parallel rays entering the eye come to a focus too soon, consequently they cross and cause imperfect vision. Patients with such eyes as this cannot see objects at any great distance, their vision being limited.

Myopic Eye

or

Short Sight Eye

ML 313

This is the result of advancing years, and is due to a natural hardening of the crystalline lens. The need of glasses begins to show itself from the age of 35 years.

PRESBYOPIA

Or OLD SIGHT.

Do you hold the paper further away than you used to?
Do your eyes soon tire after reading or doing close work?
Possibly headaches frequently occur.

The trouble is this: The crystalline lens is able, with the aid of the ciliary muscle, to change its convexity and so accommodate the eye for near and distant objects, but when this lens begins to get hard the muscle cannot get it to work so freely as it used to, consequently the aid of artificial assistance in the shape of properly adjusted lenses is absolutely necessary.

Reading, writing, sewing, or any near use of the eyes will become a pleasure when the correct lenses are fitted.

Our Home Testing Chart will place you in this pleasant position. You can test yourself, your friends and relations in your own home.

ASTIGMATISM

This defect is due to the irregular curvature of the cornea or outside portion of the eyeball. Although fully 50 per cent. to 60 per cent. of the headaches are caused by this refractive error, very few people will act wisely and have their eyes properly examined, and so do away with the trouble which causes these headaches.

We have the MOST MODERN of OPTICAL INSTRUMENTS.

We have the EDUCATION which enables us to FIND and CORRECT THE ERROR.

We have the LARGEST SELECTION of LENSES and FRAMES in the States.

We have the LOWEST SCALE OF CHARGES.

So why not hit the nail on the head, and have your eyes examined at once? It costs nothing for the examination, and we charge catalogue prices—not high fancy prices.

Hospital and Doctors' Prescriptions Accurately made up at Lowest Prices

Specialty Low Quotations for Charitable and Hospital Work.

YOUR EYESIGHT IS VALUABLE. DO NOT DELAY.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Over 1000 Pairs of Eyes successfully Fitted with Correct Glasses during the last 12 months.

F. LASSETTER & CO., Sydney.

Closing Remarks.

It is almost Imperative that, sooner or later, you must wear glasses.

Why ?

FOR THIS REASON—

The physiological change, as explained in this booklet under heading "Presbyopic," must come, and necessitate the wearing of glasses for near use, such as reading, sewing or kindred work; although you hear some people remark, "My father (or my great grandfather) never used glasses." How is that? The explanation is easy. In the first place, these people with the so-called wonderful sight had a defect in the early part of their life; this defect was "myopia," or short sight. But, being content to struggle through this error, and putting up with just reading or doing what the eyes would allow under this defect, they gradually drifted into the "presbyopic" stage, and as these two defects almost balance the vision, there was no need for them to wear glasses at the later part of their lives.

BUT WHY SHOULD YOU STRUGGLE THROUGH

as they did, and simply see and do things
which the eye will allow ?

A Pair of Correctly-Fitted Glasses will bring fresh visions of Gladness and
... give the Ease and Comfort we all hope and live for ...

EVERYTHING SOLID VALUE

Lassetters' Optical Information Sheet.

READING TYPE.—Bring the Test Sheet (on opposite page) towards the face until the letters seem to fade or run one into the other. Measure the distance between the Test Sheet and the Face.

DISTANCE TEST LINES.—See that they are in a good light.

Kindly answer these questions carefully, and **UNDER NO CONSIDERATION USE YOUR GLASSES** when going through these tests, but when you cannot see any of the reading type without the aid of your glasses you may then use them, but they must be sent along with answers to the Information Sheet.

Question No. 1.—Which test line can you see most distinctly when at a distance of 20 feet?

Question No. 2.—Which test line at 15 feet.

Question No. 3.—On holding the test sheet with both hands, with your back to the light but allowing the light to fall on the test sheet, what is the **very closest** you can read—

1st reading type?

2nd reading type?

3rd reading type?

Question No. 4.—What is your age?

Question No. 5.—Do your eyes ache when reading or doing close work, or does the pain in the eye-ball gradually drift to a headache?

Question No. 6.—To ensure our fitting the spectacles to rest comfortably on the face, kindly tell us—

Have you a wide, medium, or narrow face?

Is the bridge or smallest part of the nose high or flat?

Question No. 7.—Do you require glasses for close work, such as reading and sewing, or for distance?

Do not detach this sheet from Catalogue, but simply say when writing: Answer to Question No. 1, and so on.

LASSETTERS' SPECIAL SIGHT MEASURE will be posted promptly on receipt of address.

In answering Questions, say—Answer to Question No.

MM2 Old English Pattern

We have carefully tested all the Plain Nickel Spoons and Forks, and selected this as the most durable for wear and best color. The beautiful whiteness is the natural color of the metal, therefore it is impossible to change to the brassy appearance of other brands after a little use: in fact, it has the qualities of Silver, and is infinitely less expensive.

"Floral Aid."

These illustrations clearly show how flowers may be arranged in an open bowl by means of "Floral Aid."

MM 399.

MM 399.—"FLORAL AID" is specially designed for use in open bowls. By its help flowers of every description—and particularly those with long stems—can be arranged in hold, free, artistic groups with due regard to their natural pose and charm. With a little manipulation of the foliage "Floral Aid" may be easily hidden. For the purpose of changing the water daily "Floral Aid" can be removed without disarranging the flowers.

In five sizes, 1/-, 2/6, 3/6, 4/6, 5/6 each.

WILKINSON PATENT STROPPER, Double Action each 15/6

Thousands of Gentlemen know the difficulty of effectively Stropping a Razor on an ordinary Strop; they invariably cut and destroy the Strop in the process of Strop ping, and often spoil a good razor.

This is especially the case with the fine, hollow-ground razor now generally in use. All drawbacks incidental to want of dexterity and expertness in Stropping a razor on the ordinary strop is now overcome by this very ingenious invention.

Door Hangers

McCABE'S BALL-BEARING DOOR HANGER covers the requirements of all conditions of Siding Doors. The Steel Tube is made perfectly smooth on the inside to ensure easy running.

There is no possibility of wheels jamming the track. The Carriages are made with adjustments, whereby the door may be raised or lowered as required. All steel portions of carriages are case hardened, and in cases of Elevator and Parlour Door Hangers are supplied with compressed fibre wheels, thereby reducing noise to a minimum.

Sizes	3	2 1/2	2	1 1/2	1 inch
	2/6	2/-	1/8	1/3	10d. each

CARE AND ABUSE OF BRUSHES.

Persons should be very careful where they keep their brushes. They should never be kept near a stove or other hot place, but in a cool or damp spot, and as near the floor as possible. A continued exposure to heat will sometimes cause the wood to shrink and the best Brush to shed bristles.

Before a new Brush (Paint or Whitewash) is used, or should a Brush have shrunk from above causes, place it in water for about five minutes.

Whitewash Brushes should never be put in hot or newly-slacked lime, or lime with acids in it, as this burns the bristle and causes it to lose its vitality, and makes the ends break off.

A Brush, after being cleaned, should not be placed near a fire nor exposed to the sun.

Varnish Brushes must not be soaked in water, as they are generally cemented at the bindings, and the water softens the cement, with the result that the Brus. falls to pieces. After use they should be kept in linseed oil.

W. F. LASSETTER & CO., LIMITED

PAINTS, Etc.

MASURY'S PAINTS, FOR COACHPAINTING, &c.—

Made up in 1-lb. tins. Ground in Japan, Japan Gold Size, or Varnish, as may be required by the peculiar natures or properties of the various Paints, and they are all quick-drying. The dry ing may be retarded by adding a little raw linseed oil. The Paints simply require thinning with Turpentine to be ready for use, and finished off when dry with good Body or Carriage Varnish. Among some of the colours we stock are:—

Coachpainters' Green, Light, Medium, or Dark, per lb. 2/3

Quaker Green, Light, Medium, or Dark, per lb. 2/3

Brewster Green Light or Dark per lb. 2/3

Royal Green, Light or Dark per lb. 1/10

Special Black per lb. 1/2

Drop Black per lb. 1/8

Ivory Black per lb. 2/3

Chrome Yellow, Light per lb. 2/6

Chrome, Orange per lb. 2/6

Golden Ochre per lb. 1/10

Road Card Red per lb. 2/8

Eureka Vermilion per lb. 2/8

1894 Red per lb. 2/3

Tuscan Red per lb. 2/2

Indian Red per lb. 1/11

Aurora Red per lb. 4/8

English Vermilion, Dark per lb. 8/-

Ultramarine Blue per lb. 4/-

9500 Blue per lb. 2/8

Prussian Blue per lb. 4/8

Coachpainters' Brown, Light per lb. 2/-

Wine Color per lb. 2/3

Carriage Part Lake per lb. 3/-

Baldwin Brown per lb. 2/8

Flake White per lb. 2/7

Tint Card forwarded on application.

SENOUR'S FLOOR PAINT
MANUFACTURED BY
SENOUR MANUFACTURING COMPANY.
25 & 25-27 DUNDY STREET,
CHICAGO ILL.

MP 20.

This Paint is composed of Natural Mineral and Hydraulic Cement, and will outwear other pigments. It will cement up the cracks, fill the pores of the wood, and make a hard and serviceable covering. Floors are necessarily washed frequently—this Paint will harden almost to stone under the influence of water by reason of the cement. Does not scratch like the old-fashioned stains. Sold in 10 colours. Tint Card forwarded on application.

COPPER PAINT—

Tarr and Wonslow's, in quart tins. 3/- each.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

ASPINALL'S SUPERIOR ENAMEL PAINTS—

Tins 1/1. Tinslets 8d. each.

Brilliant gloss, works easily, and flows well under the brush, very durable. Fifty Tints stocked. Tint Card forwarded on application.

GOLF BALL ENAMEL PAINT—qd per tin.

ASPINALL'S SPECIAL BATH PAINT—

Resists hot water. Colours stocked—White, Flesh Colour, and Eau de Nil. 14 per tin.

SAPOLIN BATH ENAMEL—

An excellent Paint. Colours stocked—White, Nile Green and Rose. 11d., 1/6 and 2/10 per tin.

Calcimine

A Sanitary Calcimine for interior decoration. Simply requires mixing with cold water. Sold in 24 Tints and White. Made up in 5-lb. packets
 1/3 per packet.

Indelible

A washable, sanitary, fireproof, weatherproof, and durable preparation for interior and exterior work of every description of buildings. Will not rub off or peel away (if applied to a solid surface). It is a substitute for Oil Paint. Sold in 24 Tints and White Made up in 5-lb. packets.
 1/10 per packet.

Riley's Refrigerating Composition

For coating roofs of buildings, either of slate, iron or glass, at a very moderate cost.

It is invaluable for reducing the temperature of warehouses and iron stores. It will not wash off provided the roof has been coated 24 hours previously to its raining. It may require renewing with one coat (only) every year or two. It has been successfully used for many years. It will not injure rain water, but will harden it at first. We would suggest that, where the water is used for domestic purposes the first shower or two be allowed to run to waste, which can be done by putting something into the mouth of the down-pipe which conveys the water to the tank. After that, scarcely any traces are left in fact, what remains will tend rather to purify the water than otherwise.

Sold in 50-lb. cases, with instructions for mixing and application, which are extremely simple. It only requires water to mix with the composition. A 50-lb. case will do about 170 yards superficial. Applied with a whitewash brush

12/6 per case, 4d. per lb

Painters' & Plumbers' Lamps

MP 31.—THE "PACQUELIN" LAMP.—Burns Benzoline—

MP 31

ADVANTAGES.

FOR PAINTERS.—This Lamp removes old paint in less time and gives a greater heat than any other Lamp in the market.

The flame penetrates into the mouldings and sash bars, and in a few seconds softens the paint for removal by a chisel knife without breaking the glass, etc.; it is particularly recommended on this account. It can be used in any position.

It gives a heat of more than 1,500 degrees.

It is thoroughly safe, and so simple that a boy could use it.

It is easily extinguished by blowing through the hole at the bottom, and instantly re-lit if blown out.

It should not be placed on the cold ground or stone when heated.

It will work in a gale of wind.

It has no complications, and duplicate parts can be obtained at a small cost.

No pumping required, the action being quite automatic.

It only weighs 20 ozs., so can be used with one hand without any fatigue.

The cost of its working is about 1d. per hour.

It repays its cost with a week's use.

12/6 each.

Also suitable for Plumbers and others.

THE PETROLIA BRAZING LAMP, burns Kerosene 20/- each

MP 32.

MP 32.—THE "ETNA" LAMP.—Burns Kerosene.—For Plumbers' and Painters' use. Substantially made of stout Brass. The flame is easily regulated. Will work in wind or rain. One of the best lamps for tradesmen's use. 12/6.

MP 33.

MP 33.—THE "NEW" LAMP.—Burns Benzoline.—

For burning off paint, soldering, etc. It works immediately, and produces an intense heat in the open air, which can be regulated by means of the Regulator. The Lamp is put out by closing the Regulator, thus saving the Benzoline which is not yet burnt. In some of the other Lamps, on being put out, the vapor continues to escape, which means a serious loss. Price, 11/6.

LIQUID VARNISH REMOVER—

Instantly removes old Varnish from Woodwork, etc.

Quart bots. 3/-, pint bots. 1/6.

William Harland and Son's Superior English Varnishes

For Coachbuilders

BEST PALE DURABLE BODY VARNISH—

The palest, most durable, and lustrous Coach Varnish manufactured. Used for finishing coats on the bodies of carriages. Dries in about 10 hours.

1 gal. 27/6, 1/2 gal. 14/6, 1 quart 7/6, 1 pint 4/6.

BEST PALE CARRIAGE VARNISH

For carriage wheels, shafts, and underparts of carriages, etc. It possesses perfect flow, is easy to work, and has most brilliant lustre. Far more elastic than any other varnish sold under this term. Dries in about 10 hours.

1 gal. 20/6, 1/2 gal. 10/3, 1 quart 5/6, 1 pint 3/6.

HARD-DRYING CARRIAGE VARNISH—

Has all the good qualities of the above, with slight increase of drying and hardening qualities.

1 gal. 20/6, 1/2 gal. 10/3, 1 quart 5/6, 1 pint 3/6.

WAGGONETTE VARNISH—

Prepared especially for waggonettes and common carriage work. A very useful and durable article.

1 gal. 16/6, 1/2 gal. 8/3, 1 quart 4/6, 1 pint 2/6

BLACK JAPAN VARNISH—

Specially adapted for black work on carriages. Flows well and dries an intense black. It is rendered more durable by coating afterwards with Durable Body Varnish.

1 gal. 20/6, 1/2 gal. 10/3

JAPAN GOLD SIZE—

A splendid article to mix with patent filling-up powder for stopping and preparing coach panels, etc.; for mixing with colors to make them bind well and enrich the shades; also used for gilding and bronzing.

1 gal. 18/6, 1/2 gal. 7/6, 1 quart 4/6, 1 pint 2/6.

For House Painters, &c.

PALE COPAL VARNISH—

A pale and superior Varnish. Dries in about 8 hours.

1 gal. 15/6, 1/2 gal. 7/6.

FINE OAK VARNISH—

Good hard-drying Varnish for ordinary work—

1 gal. 10/6, 1/2 gal. 5/6, 1 quart 3/6.

PALE CRYSTAL PAPER VARNISH—

A delicate Spirit Varnish, perfectly white and transparent, for wall-paper and white enamel work.

1 gal. 15/6, 1/2 gal. 7/6.

FRENCH POLISH—

Brown, for Furniture.

1 gal. 13/6, 1/2 gal. 6/6, 1 quart 3/6, 1 pint 2/6.

White, for Light Furniture.

1 gal. 17/6, 1/2 gal. 8/6.

PATENT KNOTTING—

For covering knots in wood, also for damp walls.

1 gal. 12/6, 1/2 gal. 6/3.

WHITE MARBLE VARNISH—

The Clearest Oil Varnish made. Largely used for white enamel work.

1 gal. 28/6, 1/2 gal. 14/3.

TEREBINE—

A perfect liquid drier for varnish or paint.

1 gal. 11/6, 1/2 gal. 5/6.

BOATBUILDERS' COPAL VARNISH

1 gal. 15/6, 1/2 gal. 7/6, 1 quart 4/3.

CHURCH OAK VARNISH—

1 gal. 14/6, 1/2 gal. 7/3.

William Docker's Noted English Varnishes

A1 CROWN SPIRIT VARNISH, White or Brown—
1 pint bot. 1/6, 1 quart bot. 1/6.

POINTS ON OIL VARNISHES.

Drying and Hardening.—Proper light and ventilation are absolutely necessary to facilitate drying and hardening. Varnish applied in buildings that are damp and not properly heated in cold weather will be considerably retarded in drying and hardening. Extremely hot weather will also keep varnish soft for a long time. The best results are obtained at a temperature of 70 to 75 degs. Fahrenheit.

Turning White.—Is caused by the action of water and dampness. The more elastic the varnish the better it will resist this action, whereas cheap, brittle, quick-drying varnishes are very easily affected.

Brittleness.—Is an inherent defect in the varnish caused by an excess of dryer, lack of oil, or by adulterated materials having been used in its manufacture. If a varnish powders white under friction of the finger, or easily scratches white, that is incontrovertible evidence of its poor quality. Brittle varnishes should not be used, even for the undercoats, as they destroy the toughness and durability of the finish, despite its being protected with an elastic, durable finishing varnish. It is poor economy, in any event, to use brittle varnishes, as the cost of application, which is the main expense, is the same as if good material were employed.

Chilling.—As its name implies, is caused by exposure to cold weather. Varnish should never be used when chilled. The remedy is to keep the chilled varnish in a warm room until it has been restored to its normal condition. Long exposure to cold weather may also cause the varnish to become "specky" and "seedy," in which event it is necessary to keep it near a steam pipe or warm stove for some time until the chilled particles have disappeared.

EVERYTHING SOLID VALUE

F. LASSETTER & CO., LIMITED

Cracking.—Is caused by the undercoats not having been dry when the finishing coat was applied, or when abnormally heavy coats have been used, especially for the undercoats. Brittle varnishes are liable to crack when exposed to sudden changes of temperature.

Blooming or Going Foggy.—Is caused by exposure to dampness, moisture, or gases after the varnish has become hard. The more elastic the varnish, the less liable is it to "bloom" or become "foggy."

Wrinkling, Crawling, Crimping, or Sagging.—Is caused by applying the varnish too heavily or by exposure to sudden changes of temperature while in the process of drying, or if the undercoats are not dry when the finishing coat is applied.

Deadening or Sinking Away.—Is caused by the undercoats not having been allowed sufficient time to dry, resulting in the finishing coat becoming absorbed while in the course of hardening. Insufficient foundation coats will also cause the finishing coat to sink away.

Blistering.—Is caused by the action of heat, especially from the concentrated rays of the sun, or if sap or dampness is retained in the wood, or if moisture exists in the undercoats when the finishing coat is applied.

Fitting.—Is caused by applying the varnish over an oily or damp surface, also if the varnisher is not careful to thoroughly incorporate the turpentine in reducing the varnish, or uses improper thinning material.

Thinning.—When found necessary, should be done with spirits of turpentine. In order to ensure proper amalgamation, neither the varnish nor the turpentine should be too cold when mixing. The warmer the varnish and turpentine, the quicker the amalgamation. After reducing the varnish, allow it to stand a while before using. Oil, Japan, or liquid dryer should never be added to varnish.

Sweating.—Is caused by rubbing the undercoats before they are thoroughly dry.

BLUNDELL'S TRANSPARENT PETRIFYING LIQUID, for Damp Walls. Sold in $\frac{1}{2}$ -gal. tins. 17/- gal.

McDOUGALL'S INSECTICIDE WASH, for Fruit-
growers and others. Exterminates all Insects.
Mixes with Cold Water. Harmless to Foliage.
Reliable, Cheap and Handy. Free from Arsenic
or Copper. Directions:—The wash is a thick
liquid, mixes readily with cold water, and produces
a soapy solution like milk. Use soft water (rain
or pond), in preference to hard, if it can be ob-
tained. Caterpillars of all kinds, Green and Black
Fly, and all Insects of similar kinds: 1 gall. Wash
to 100 galls. water. American Blight or Woolly
Aphis, Red Spider, Thrip and Scale, Earwigs,
Ants, Wood Lice and Grubs, and Insects of similar
kinds. 2 galls. Wash to 100 galls. water. Spray
freely under as well as over the leaves and
branches, seeing all parts are well wetted by
means of usual spraying machines. The
washings, or sprayings, should be repeated ac-
cording to the degree of fresh insect attack. Sold
in:—

1 pint tin. 1-quart tin. 1-gal. tin. 5-gal. drums.
1/3 1/9 5/6 22/6

McDOUGALL'S FUNGICIDE WASH, for Fungus.
same price as Insecticide Wash.

PUMPS, KEROSENE—

KEYPOVA

MP 39.—KEYPOVA—

This is now extensively used for preserving eggs.
It requires to be thinned with water—12 parts of
water added to 1 part Keyova. When cold,
place the eggs in solution, and keep them submerged
in it until required for use. The solution may be
used more than once. Full directions sent with each
package. It should not be kept in tins for any length
of time, as it becomes discolored.

15	8	9	10	11	12	13	14	15	16	17	18	18	20	21	22	

Example.—The thick line shows that a room 10 feet high and 40 feet round the walls requires 8 pieces of paper to cover it.

DARK PULP—

Floral, Geometrical, and other designs, in dark colors from 3½d. per roll; 3/3 per doz.

LIGHT PULP—

Similar Patterns, but in lighter shades—

from 4d. per roll; 3/0 per doz.

The variety of color and pattern in this make of paper is almost inexhaustible. They are suitable for Kitchens, Dining Rooms, Bedrooms, Parlors, etc.

SANITARY WALL PAPER—

from 5d. per roll; 4/0 per doz.

Sanitary Wall Paper, being stained or printed in oil, is less likely to absorb injurious particles than other kinds. It can be washed with warm water when soiled, no small advantage.

Dados, Dado Rails, Friezes, Borders and Ceiling Decorations to match Sanitary Papers. Prices on application

FLORAL AND OTHER PATTERNS ON LIGHT OR DARK GROUND—

For Dining Rooms, Bedrooms, Parlors, etc.—

from 6d. per roll; 5/4 per doz.

These papers, from the best White Pulp, are machine or hand-made, according to price. Some really lovely effects are available.

GOLD PAPERHANGINGS—

In endless variety of pattern and shade, and in qualities ranging from 10d. per roll, with Dados, Friezes, etc., to match.

IGNOMUR—

A most suitable material for wall and ceiling decoration, in high relief, and of light texture. It adapts itself to any scheme of decoration.

SELF-COLORED INGRAINS—

All Colors from 1/8 per roll

DECORATED INGRAINS—

All Colors from 2/- per roll

SILKS—

Floral and Striped, all Colors .. from 10d. per roll

EMBOSSED PAPERS—

All colors from 2/6 per roll.

IMITATION LEATHER PAPERS—

In all Wood Colorings from 4/6 per roll

CEILING PAPERS from 6d. per roll

DAMP-PROOF PAPERS—

For Damp Walls 8d. per roll

TINTED SELF-COLORED LINING PAPERS—

from 9d. per roll

BORDERS—

To match all Wall Papers, from 3, 5, 7 to 10 in.

FRIEZES—

To match all Wall Papers, from 18, 21 to 30 in. wide.

Patterns and Prices on application.

How to Select Papers

Dark Papers reduce the Glare in a too bright room.
A light paper must be put in a Dark room.

In the DRAWING-ROOM OR PARLOR, if you have old-fashioned, heavy furniture, never use delicate tints of Wall Papers.

Papers with Green, Red, Brown, or Blue Grounds are best suited. If the furniture be quite modern, delicate tints are, as a rule, the most successful.

In the modern house it is important that the HALL should possess a harmonious color scheme, as in it the visitor gains his first impression of the interior of the house. Hall and Staircase look well hung in green, because the eye is usually fatigued with the strong glare of the sunlight, and Green is the most refreshing color. Besides Green, Red, Browns, and Blues are all good shades for Hall Decoration.

The DINING-ROOM should always be made warm and cosy, not cold and cheerless. As a rule, rich Browns, Reds, or other warm colors are much preferable to delicate tints.

To the LIBRARY or STUDY a plain or decorative Ingrain Paper, with a plain Frieze to match, goes well with pictures and books.

BEDROOMS should always be papered with a cheerful, light colored paper, with Frieze border to match.

A Decorative Papered Ceiling will last clean much longer than the one that is whitened. It is then economical to paper your ceilings.

Hints to Users of Paper-Hangings

Whilst the greatest care is exercised in the manufacture of Ingrains and Plain-tinted Papers, blemishes will sometimes occur, and they are only offered subject to such. Plain papers often give beautiful effects, but perfect solidity of color can only be ensured by "Flatted Paint," and users of these papers should bear this in mind.

PERMANENCE.—All colors are more or less susceptible to influence of light, gas, damp, etc. This is naturally more apparent in plain than figured goods, and more in certain colors than in others.

PASTE.—Owing to the delicate nature of some of the dyes used to produce the shades manufactured, it is imperatively necessary that none but a perfectly pure flour and water paste be used, entirely free from acid or other preservative. If used stale, hot, or doctored with alum, it is very injurious to colors. We recommend all plain papers being hung over a white lining paper; especially in the case of Reds is this precaution most necessary.

HANGING.—Great care should be exercised in the hanging of same to effect perfect joints, and to this end a minimum quantity of paste should be used, and the lengths should on no account be allowed to soak, or the resulting shrinkage of the paper when dry will show the walls through the joints. It is better to reverse every other length in hanging to avoid any variation in shade which might occur.

Write for Samples, which will be posted free.

F. LASSETTER & CO., LIMITED

F. LASSETTER & CO., Limited,

For the Best Assortment of Scales, Spring Balances and Weighing Machines in the Commonwealth.

MR 1.

Fairbanks' Austral Scales

MR 1.

We have much pleasure in recommending these Weighing Machines. They are specially designed and adapted for weighing Wool, Grain, etc., and being entirely constructed of Iron, Steel, and Gun Metal, they are proof against hot winds and white ants. They have large platforms, and are furnished with wheels and back rack, and are beautifully finished.

They have the following points of superiority over other Scales in the market:—

1. The metal being of superior quality, it is not necessary for them to be so heavy, thus effecting a saving in carriage to the country
2. The beam is of gun metal, consequently it can not rust.
3. It has a Slide Poise, which is much more convenient and quicker than the old style.
4. The beam has a capacity of 1 cwt. in the larger sizes, thus doing away with several small loose weights.
5. They will weigh accurately from the smallest to the largest weight in their capacity.

A station possessing a 10-cwt. Austral Scale and a Fairbanks' Union Scale will be well equipped for all necessary weighing, from half an ounce to half a ton

MR 2

MR 2.

PHYSICIAN'S SCALE.

FAIRBANKS'.

Fitted with N.P. Measuring Rod.

Capacity, 300 lbs.

Platform 13½ x 19.

Suitable for HOTELS, HOSPITALS, CLUBS, DOCTORS, etc., etc.

£8. 15 -.

Prices

Capacity.	Size of Platform.	£ s d
3 cwt. ..	20 x 22 inches	6 7 6
4 cwt. ..	22 x 26 ..	7 5 0
5 cwt. ..	25 x 25 ..	8 5 0
7 cwt. ..	30 x 42 ..	11 5 0
10 cwt. ..	32 x 50 ..	12 5 0
20 cwt. ..	38 x 57 ..	19 10 0

We are now importing (at no extra cost to purchaser) these machines with two sets of Weights, one set marked in hundredweights and the other set in centals, or hundred pounds. Should customer, when purchasing one of these machines, require it to be tested by the Government Inspector there will be a Government fee of 6d. per cwt. extra. For instance, a 5-cwt. machine, when weighed to its full capacity, will weigh 5 cwt.; therefore, the fee for a 5-cwt. machine with one set of Weights would be 3s., and with both sets of Weights tested the fee would be half as much again, viz., 4s.

Mitre Boxes

MR 102. STANLEY'S IMPROVED MITRE BOX—

This Mitre Box can be used with a back saw or panel saw equally well. If a back saw is used, both links which connect the rollers, or guides, are left in the upper grooves, and the back of the saw is passed through under the links. If a panel saw is used the link which connects the rollers on the back spindle is changed to the lower groove, and then the blade of the saw will be stiffly supported by both sets of rollers, and work like a back saw. Moulding of any size up to 4 inches can be cut in this box

Saw Clamps

MR 102.

rect position loosen the wing nut and move the guide around to the point desired; after tightening wing nut loosen screw in the file handle until file gives the shape tooth wanted

A good way is to select a tooth of correct shape and let file down into it, tighten set-screw in handle, then file a tooth to see if the shape suits. If not, turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth. When one side is filed, reverse the saw and attachment and file the other teeth. For Rip Saws, place the file at right angles with the saw, and file every tooth. Always keep the file as nearly horizontal as possible

This guide is sold only attached to out No. 3 clamp, and price includes Clamp, Filing Guide, File and Handle—9/-.

MR 102 - DISSTON'S SAW VICE, with Filing Guide Attachment—

Especially Designed to assist those not skilled in the art of Saw Filing to File a Saw Correctly.

This cut shows :— and the attachment in proper position for filing the first side. There are three marks on the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position for first side, and the other designates when it is in position for filing the other side. The third or centre mark shows when it is in position for filing Rip saws. To obtain the cor-

MR 103—NO. 4 ADJUSTABLE SAW CLAMP, Japanned

Particularly adapted for use when filing narrow band saws, etc. The supporting levers are adjustable, and can be regulated to suit the various widths of saws to be filed, the blade being maintained in the same position throughout, and by slightly raising lever, can be moved along.

Canvas

MR 201.-STANLEY'S BUTT GAUGES 3/- each

Improved Butt Gauge.

A Metallic Butt Gauge, having one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The other bar has a steel cutter to accurately gauge for the thickness of the butt

The form of this Tool is convenient for carrying in the pocket. It is so constructed that the bars cannot fall out of the stock.

Wood Bottom—
Length 8 inches,
2 inch cutter
5/6 each

MR 307.—WOOD BOTTOM—Length 15 inches, 2 1/2 inch cutter 6/6 each

MR 308.—ADJUSTABLE CIRCULAR PLANE
10/6 each

These planes have a flexible steel face, which can easily be shaped to any required arc, either concave or convex, by turning the knob on the front of the plane.

MR 309.—WOODWORKERS' ROUTER PLANE—
6/9 and 7/6

This tool should be added to the kit of every skilled carpenter, cabinet maker, stair-builder, pattern maker or wheelwright. It is perfectly adapted to smooth the bottom of grooves, panels, or all depressions below the general surface of any woodwork. The Bits can also be clamped to the back sides of the upright post, and outside of the stock. In this position they will plane into corners, will router out mortises for sash frame pulleys, or will smooth surfaces not easily reached with any other tool.

MR 310 IRON SCRUB OR GERMAN JACK PLANE, length 9 1/2 inches, 1 1/2-inch cutter .. 3/6 each

MR 311.—CHAMFER PLANES, with beading attachment. For beading, reeding or moulding a Chamfer, with 6 cutters sharpened at both ends, including a large variety of ornamental forms. Length 9 inches, 1 1/2-inch cutter 11/- each
Chamfer only, without reeding attachment, 7/6 each

MR 312.—ADJUSTABLE BEADING, RABBIT AND MATCHING PLANE. Nickel Plated .. 29/6 each
"A Planing Mill within itself," says a country carpenter. This Plane embraces.—(1) Beading and Centre Beading Plane; (2) Rabbet and Fillet; (3) Dado; (4) Flow, (5) Matching Plane; (6) Sash Plane; and (7) a superior Slitting Plane.

Iron Planes

MR 314.—DUPLEX RABBIT PLANE and FILLER, iron stock and fence, 8½ inches long, 1½ inch cutter 5/3 each
Remove the arm to which the fence is secured and a handied Rabbit Plane is had, and with two seats for the cutter, so that the tool can be used as Bull nose Rabbit if required.

MR 318.—HAND BEADER, for Beading, Reeding, or Fluting straight or irregular surfaces, and for all kinds of light Routering, with a Square Gauge for straight and an Oval Gauge for curved work 3/6 each

MR 315.—PATENT UNIVERSAL PLANE 56 6 each

This Tool, in the hands of an ordinary carpenter, can be used for all lines of work covered by a full assortment of so called Fancy Planes. Fifty-two Tools, Bits, etc., including Moulding Plane, Match, Sash, Chamfer, Beading, Reeding, Fluting, Hollow, Round, Plow, Dado, Rabbit Filerster, and Slitting Plane.

In addition to the 52 irons supplied with No. 55 Plane, there are 41 other irons made same pattern as those supplied, only that they are different sizes Extra irons for No. 45 and No. 55 from 1/4 to 1/8 each

MR 319. — TONGUEING AND GROOVING PLANE—

The Plane has two separate cutters, a suitable distance apart. When the guide, or fence, is set as shown above, both cutters work and a tongue can be made. The fence is hung on a pivot, and can be swung around, end for end. This movement covers one of the cutters, and also furnishes a guide for grooving an exact match for the tongue.

Saw Swages

THE CONQUEROR, JUMPER OR UPSET—

No. 1, for large Circular Saws 2/3 each

No. 2, for small Circular and Mill Saws .. 2/- each

The upper opening in the swage being rounded on the bottom, takes its bearing on the centre of the tooth, spreading and shaping it as shown on section

of tooth H. The lower opening (in which section of tooth is inserted) is used for squaring up, and leaves the tooth as shown at G.

The teeth of a saw require to be swaged to a sharp, keen edge. The bottom of the openings in the Conqueror being slotted, it is impossible to blunt or injure the fine cutting edge of the tooth, which is frequently the result with solid swages.

One of the principal drawbacks in the manufacture of solid swages has been the difficulty experienced in properly hardening them at the bottom of the opening, which portion of the swage does all the work, and requires to be hardened in the most perfect manner. The Conqueror is hardened before the sleeve is driven on, and the hardening composition passes freely through the slots at the bottom of the openings, thus ensuring the even and correct hardening in that portion of the swage where it is most required.

MR 367.

Saw Sets

DISSTON'S STAR

SAW SETS—for Hand,

Back, Band Web,

Wood, and small Circular

Saws, not thicker

than 18 gauge.

MR 368.

A is the plunger, which can be operated by a

treadle attached to E, under the machine, and a slight

tap with the foot will set the tooth; B, the hammer

or striking part; C, the anvil; D, the movable

gauge; F, the screw to regulate the amount of set.

The striking part and the anvil, or portion which

receives the blow are star-shaped, and similar in

construction. The points are all different sizes, and

are numbered from 1 to 6, and are designed to set

different sized teeth. It will strike a blow as sharp

and effective as though done by a hammer, and is

the most useful and complete saw-set that has ever

been offered. If the saw is hard, several blows

should be given in setting it. Raise the back of

the saw from the guide-screw F, when the first blow

is given, and gradually lower it with each blow un-

til the process is complete. Thus many a good

saw will be saved from utter ruin. A trial will suf-

fice. Be sure to clean the saw-teeth before setting

Instruction for Fret Work

Having chosen your design, procure a piece of wood, planed quite smooth on each side, and from $\frac{1}{16}$ in. to $\frac{1}{4}$ in. thick, according to the size and strength of the work required. The woods most suitable are Mahogany, Walnut, Oak, Holly. Paste the design upon the wood, and give it time to dry; then with the drill bore a small hole through each of the interior part of the design which have to be cut out. The bradawl may be used for this purpose, if the wood be of a kind, soft nature, but greater care will be required to avoid splitting it, and for the same reason it is better to bore all the holes before cutting out any part of the design.

You might obtain or make a Cutting Board.

Fix the Cutting Board firmly to a table by means two Screw Cramps, allowing one of the ends with a V shaped opening to project a few inches beyond the table.

Next fasten one of the Saw Webs in the lower part of the frame, being particular to place the teeth so that they will cut most acenly with the downward stroke of the saw.

Seat yourself opposite the board, but rather to the left hand, and place your work upon the table, thread the Web through one of the holes in the design; now compress the frame with thumb and finger of one hand, and while thus held, secure the Web with the other to the upper part of the frame, and when the pressure of the thumb and finger is removed the Web will be found to be sufficiently tight.

Now cut round the pattern, feeding the work to the saw, and turning it upon the board with the left hand until the piece is cut out; then detach the saw from the upper part and proceed as before.

When the whole of the work is cut out, the paper side of it should be slightly damped with a sponge, or, better still, a piece of wet blotting paper placed upon it for a few minutes, when it will readily come off. Care should be taken not to use more water than is necessary, or it will cause the wood to warp.

It should now be trimmed up with the files where required; then got up smoothly with sand paper, which should be wrapped tightly round a small square piece of wood, and the work rubbed with it in the direction of the grain, and not across it.

After this finishing process, the work can either be considered completed, or it can have a coating of French Polish, according to taste.

FRET SAW BLADES, STAR—

No. 00, 0, 1, 2, 3, 4, Per gross, 2/9; per doz., 3d.
No. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Spokeshaves.

MR 377 1/- each

MR 378 1/- each

Wood - MR 379. 2 1/2 3 3 1/2 inch.
 Boxed 10d. 11d. 1 1/3 each
 Boxed 13 1 1/3 each
 Box 1 1/3 each
 Box, plated and screwed, 3 inches 3/- each
 Coopers' (White's) with wood handles 5/0 each
 Coopers' (Stanley's) all iron 2/3 each

MR 380.

UNIVERSAL SPOKESHAVE (MR 380) 5/- each

Both Handles are detachable, and either of them can be screwed into a socket on the top, so that the Tool may be used in a corner which you could not reach with any other Spokeshave. It also has two detachable Bottoms, which allow of it being used for straight or curved work, and by means of a movable width gauge it may be used for Rabbeting.

Chamfer Shaves 1/3 each
 Sash Routers—Oval 3/3 each

MR 381

Sieves.

MR 381.—GALVANISED WIRE, Wood Rims, any Mesh from 1-16 to 1/2 inch—

Diameter 18 20 22 inch
 3/3 3/6 3/9 each

Do., with Galvanised Iron Rims, for Ashes, 20in. x 1in. 4/6 each

Stocks and Dies.

Engineers' Withworth Thread, for tapping and screwing bolts and nuts, etc

MR 382.

Daniels' English Make, with Plug and Taper Taps—
 1/8, 3-16, 1/4, 5-16, 3/8 3/4, 7/8, 1 1/2 inch
 24/- 27/6

1/4, 5-16, 3/8, 7-16, 1/2 32/6
 3/8, 7-16, 1/2, 5/8 36, 3/4, 3/8, 1/2 inch
 28/6 33/-

1/2, 3/4, 5/8, 3/4, 1 1/2, 1 1/4, 1 1/2 inch 50/- per set
 19/- 47/6

Ditto, Ditto, Left Hand—
 1/4, 5-16, 3/8, 7-16, 1/2 36, 3/4, 3/8, 1 1/2 inch
 27/6 33/- each

MR 383.

Baker's Best Quality, with Plug and Taper Taps—
 1-16, 3/8, 3-16, 1/4 3/8, 3-16, 1/4, 5-16, 3/8
 11/6 15/- per set.

1/4, 5-16, 3/8, 7-16, 1/2 inch 18/6 per set

1/2, 3/4, 5/8, 3/4, 1 1/2, 1 1/4, 1 1/2 inch 42/6 per set

Cheaper Quality—
 1/4, 5-16, 3/8, 7-16, 1/2 36, 3/4, 3/8, 1 1/2 inch
 12/6 30/- per set.

EVERYTHING SOLID VALUE

Stocks and Dies

The Latest Patent Stocks and Dies for Screwing Bolts and Nuts, Whitworth Thread. The Stocks have adjustable guides which are a great improvement.

UNIVERSAL PROVIDERS.

Walworth Stocks and Dies (Solid Dies).

Gas Thread for Screwing Pipes.

Oster Stocks and Dies, Adjustable Dies, Gas Thread for Screwing Pipe

MR 386A

MR 387A.

No. 1	1 inch	26/-	per set without taps	Extra Dies for No. 1	2/6 each
No. 2	1 1/2 inch	27/-	per set without taps	Extra Dies for No. 2	3/9 each
No. 3	2 inch	22/-	per set without taps	Extra Guides	8d. and 1/- each

Stock and Dies (with Plug and Taper Taps) for Screwing Brass or Copper Tubes.

1/2 inch. With Taps.

Screw Plates.

With assortment of Taps.

MR 389.

Gunsmiths—	8	10	12 sizes			
	3/9	5/-	6/9 each			
	6	8	10	12	15 sizes	
	3/9	5/6	7/-	8/3	13/6 each	
Between Watch and Clock—	6	8	10			
	4/6	6/6	8/-	8/-	8/-	8/-

Customers are sometimes under the impression that the same set of Stocks and Dies will suit both pipe and bolts and nuts. So far there is nothing made, as pipe is measured in a different way, and has a different thread from that put on bolts and nuts. Pipes are measured inside, whereas bolts and nuts are measured over all. Take, for instance, an 1 inch Die to fit on 1 inch pipe, would fit on about an 1 1/8 inch bolt.

UNIVERSAL PROVIDERS.

The Latest Pattern of Spanners

The "Autorette"

"RAT" chet

Box Spanner Set with Extension Adapter and Tommy Bar,

MOUNTED ON
SOLID LEATHER CASE.

EASY TO CARRY
SIMPLE TO USE

Each Set consists of the RAT-chet Spanner, one Extension Adapter, one Tommy Bar, and a number of Box Spanners in different sizes for Whitworth Nuts. The top side of all Box Spanners fits in the small opening of the RAT-chet Spanner, whilst the larger opening of the RAT-chet Spanner takes the top side of the Extension Piece and the other side of the Extension Piece takes the top side of all the Box Spanners.

The Autorette is made in the following sets:—

- Set 1.—Containing 1 RAT-chet Spanner $\frac{1}{2}$ x $\frac{3}{4}$ in., with Box Spanners $\frac{1}{2}$, 5-16, $\frac{3}{8}$, 7-16, $\frac{1}{2}$ and $\frac{3}{4}$ in. Whitworth; also Extension Piece and Tommy Bar. Size of complete tool bag, 12 x 6 $\frac{1}{2}$ in. Price 15/- per set.
- Set 2. Containing RAT-chet Spanner $\frac{3}{4}$ x $\frac{1}{2}$ in., with Box Spanners $\frac{3}{4}$, 9-16, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$, and 1 in. Whitworth; also Extension Piece and Tommy Bar. Size of complete tool bag, 14 $\frac{1}{2}$ x 7 in. Price 21/- per set.

The "Gryp" Patent

The most versatile Spanner on the Market.
It is the only Practical Ratchet Spanner.
It is a fixed Spanner at any angle.
It tackles successfully the most awkwardly placed nuts.

No. 2 opens to 1 inch 7/-

MR 466.

MODE OF USE.

The head is adjusted to fit the nut and engages it; then the handle is swung to whatever angle is desired and gripped firmly, and the teeth in handle becoming engaged, the whole forms an absolutely rigid Spanner. If desired, the handle may be oscillated far enough to allow the teeth to advance the distance of one tooth at a time—the head being by this means moved through an angle of about 45 degrees; whereas the end of the handle only moves through, say, 10 degrees of space. Thus, the Spanner becomes a Ratchet Spanner.

The "Newleva" Patent Spanner

Especially adapted for Motor and Marine work, for nuts in confined spaces.

Turns nuts impossible to work except by hammer and chisel.

MR 467.

No. 2 opens to 1 inch 7/-

Mode of Use.—This Spanner can be inserted, for example, between the spokes in the wheel of a Motor Car to adjust a nut on the chassis, which might otherwise entail crawling under the car to reach. Adjust the jaws to fit the nut, and engage same. Take hold loosely of the bars in the left hand, and the end lever in the right. Then pull towards you or push this lever away from you, according to whatever nut is to be tightened or loosened, keeping the left hand stationary, the result being both easier and more certain than with the ordinary spanner. Work the end lever only. Note.—Use as directed only.

Spanners.

MR 108

"BULL DOG" WRENCHES

- No. 1, 5½ inches long, will hold pipe ½ to ¾ inch; will hold round iron ½ to ¾ inch..... 7d. each
 No. 2, 9 inches long, will hold pipe ¾ to 1 inch; will hold round iron ¾ to 1 inch..... 1/6 each
 No. 3, 16 inches long, will hold pipe 1 to 1½ inch; will hold round iron 1 to 1½ inch..... 3/- each

These Wrenches are forged self in one piece, from a special grade of steel selected for that purpose. They have ratchet teeth, cut diagonally across one jaw, thus enabling them to bite with three teeth at once. A single wrench will hold many sizes of nuts or bolts without adjusting. They are invaluable to engineers, gas fitters, blacksmiths, and jobbers of all kinds, and for general household or farmers' use.

Twin, 11 inches long, will hold pipe ½ to 1 inch; will hold round iron ½ to 1 inch..... 2/- each

The Hawk Eye Wrench has three Dies—5-16, ¾ & 1 in.—which are very useful when the thread of a bolt gets bruised. The jaws open same size as the MR 471. Price 3/-.

Lamb Tailing Machine

TABLE TOP LAMB TAIL SEARING MACHINE.
 With Two Irons..... 20/- each

Directions for Working the Table Top Lamb Marker.

Bolt machine about 8ft from left hand end of cutting rail.

Keep the irons red hot, either in an open fire or in a small furnace. The cutting edge of the irons must be good is then required.

See that the whole of the cutting edge of iron rests on the fat of the lamb when it is drawn.

The irons should have a smooth cutting edge, and should not be too sharp.

When the lamb is drawn on the cutting edge, the whole of the cutting edge should be kept in contact with the fat of the lamb. The irons should be kept in contact with the fat of the lamb, and not with the wool and dirt.

DENYER'S BLOAT OR HOVEN TROCARS

One of the most fatal ailments, unless quickly relieved. Treatment very easy.

A
 Great
 Necessity
 About
 Every
 Farm or
 Stable.

Will Last
 a Lifetime
 with Care.
 Nothing
 to get
 Out of
 Order.

MR 479.

The above illustration shows a cow afflicted with Bloat, and shows where Trocar is inserted.

Above indigestion or Bloat, sometimes called Hoves, is the result of excessive quantities of food of a musty or mouldy character, or any foods that have been cured improperly, also from drinking too much cold water. It is sometimes caused by over feeding of wet grass, or grass covered with dew, frost, or rain, especially clover.

Directions. Take some Antiseptic Soap in a bucket, and then add the desired amount of warm water. When good lumps appear, place the nozzle in the rectum of the horse or in the womb of the cow or mare, and move handle up and down very gently, as this instrument is very strong and if used with too much force, one may break through some of the delicate membrane. It can be supplied with several nozzles, the larger one for horses and cows, the smaller one for colts, calves and dogs.

The Denyer Special Horse and Cattle Syringe is the best and most complete injection syringe on the market to-day and is especially recommended for colic and cases of indigestion, etc. The uses of this Syringe are too numerous to mention. Price 30/-.

We also make many other patterns of Sheep and Cattle Pliers. There are occasions when you require two different pattern of mark. for a sheep's ear. When this occurs, and the marks are not required too far apart, we can make one Plier to cut the two marks at the same time. There is no saving as regards price. The only advantage is that it saves time and is, perhaps, more convenient; for instance, where we could supply two pairs of Pliers, each a different pattern, for 16/- for the two, one pair of Pliers to make the two marks (at the same time) would cost about 27/6.

The New Aluminium Ear Tag or Label

For Cattle, Sheep, Pigs or Stock of any kind

CLOSED.
MR 583.

OPEN.
MR 584.

ADVANTAGES.

1. It is light, and can be put on Lambs almost as soon as born, without injury. One-sixth of the weight of other tags
2. Being made of Aluminium, which is a non-corrosive metal, it will not rust and fester the ear, as iron ones frequently do.
3. It is durable, and cannot be torn out of the ear, being round, it revolves readily, and therefore will not catch in anything.
4. It is so good and the price is so low that no owner of stock can afford to do without it.
5. It is the simplest most easily applied, and best looking Ear Tag on the market.
6. Last, but by no means least—
When once fixed it cannot be removed without destroying the Ear or Tag, and rendering it useless. So it is not worth stealing, but is worth buying.

PRICE.

EAR TAGS, MR 583, 584, with Initials and Number, 15 6 per 100. 1 PAIR PLIERS for Adjusting and Punching, 15/-

DIRECTIONS.—Pierce the ear, place large size in hole, insert other half of Tag, and squeeze two halves together with the Closer. When putting the tag on, dip both parts of tag, also punch, in Phenyle before you insert them. It will assist the ear to heal.
When ordering Ear Labels (especially MR 583 and 584) you will want to allow us about a week to execute order.

If you want to Fence Cheaply use a "Ferris" Post Hole Digger

Simpler, Stronger and Quicker than any other Digging Tools.

For Pastoralists, Farmers, Contractors, Railway and Telegraph companies; and others who have holes to dig. Orchardists and Nurserymen, etc., for Tree Planting—they are great labor savers.

With it one man can do four times the amount of work that can be done by any other means.

The blade and point are of malleable steel, the upright bar is of wrought iron pipe, the handle wood.

Cuts a clean hole just large enough for the ordinary Posts, not so much ramming. It leaves the hole level on the bottom, and brings up every bit of core.

MR 585

Will stand plenty of rough usage.

By extending the pipe, a man can bore for water though wet or dry sand and clay.

Its simplicity ensures durability. There are no parts to get out of order, or need removal.

The edge can be sharpened by anyone.

One man can work any of the sizes, in wet or dry ground.

From blade to handle is 3ft. 4in., a convenient height for ordinary purposes, but if deeper holes are required, the handle has merely to be unscrewed and extended lengths attached. Any lengths can be supplied at nominal cost.

Gives unqualified satisfaction.

KIRBY'S LITTLE RABBIT TERROR.

Shape somewhat similar to a Brass Garden Syringe

This is the Lightest, Strongest, and Most Effective Fumigator on the market.

It weighs only 4lb. 6oz., is made of Brass, and when filled discharges 250 teaspoonfuls of Bisulphide of Carbon. One 5-gallon drum gives 8,000 discharges, which costs 30 in Sydney F O B.

DIRECTIONS FOR USE.

Inject three charges into each burrow, fill up tightly with loose earth. In river banks inject 5 charges into each burrow, fill the same way. The larger the warrens the more effective the fumigating with this machine.

The work of using this Fumigator is very simple.

Should this Fumigator leak at issuing end, hold the end up, draw plunger once or twice, letting go sharply. Leakages are caused by grit or sediment getting in front of the plunger.

When Fumigator is empty and not in use, put a teaspoonful of oil into it, which will cause the plunger to work freely.

1 1/2	1 1/2	1 1/2	2 1/2	4 1/2	5 1/2

IMPORTANT NOTICE

When ordering Hose Unions, give the following particulars:—

If the tap has a thread on the nose, to take a screw union, give the exact diameter, measuring carefully from outside to outside of thread. It is also necessary that we should know the size of thread, and, to give us this information, count the number of threads to the inch; be very careful, as one thread to the inch, more or less, will prevent the union fitting properly. Another way is to take a stiff bit of white paper (wax would be better, if you could forward it to us so that it would not get crushed) and press it hard on to the thread so that it leaves a clean impression on the paper. If the tap has a nose without a thread, quote the outside diameter mentioning "Plain Tap."

EVERYTHING SOLID VALUE

Hose Fittings

Tap Unions

MS 100.

ROYLE'S PATENT TAP UNION (for Plain Taps).
A unique device for connecting Flexible Hose to Ordinary Domestic Water Taps without requiring any screw or other preparation on the tap. Its advantage over the ordinary union is obvious. To make the connection to the tap it is simply pushed on; the water pressure makes the joint, and its principle of action is such that the greater the pressure the tighter the joint becomes, and the more firmly it holds on to the tap. It cannot leak.

To suit Tap $\frac{1}{8}$ inch, $\frac{1}{4}$ inch, $\frac{1}{2}$ inch, $\frac{3}{4}$ inch, 1 inch, 2 inches

Extra Rubbers— $\frac{1}{8}$ and $\frac{1}{4}$ in., 6d. each; $\frac{1}{2}$ in., 8d. each

Garden Hose Menders

MS 101.—THE "HUDSON."

This device is put up in boxes, and is especially adapted for family use. It is made in three sizes, for $\frac{1}{8}$ -inch, $\frac{1}{4}$ -inch and $\frac{1}{2}$ -inch hose. Each box contains 1 pair Pliers, 6 Tubes and 20 Bands. The Pliers are made of refined iron, nicely japanned. The tubes are of sheet brass, and the bands of malleable brass wire. The device is SO SIMPLE A CHILD CAN USE IT. Hose can be mended or couplings fastened on more securely than with any other device. Screw menders will tear the lining from the hose; ours will not. Every person who uses hose should have one of these boxes. We furnish extra parts when wanted.

	$\frac{1}{8}$ -inch	$\frac{1}{4}$ -inch	$\frac{1}{2}$ -inch
Per box	1/6	2/-	3/-
Wires only	6d.	6d.	7d. doz

Lawn Sprinklers

THE "DAISY" SPRINKLER. The 3-inch Garden Spray is a perfect Gem, sending forth an even shower over a distance of 25 feet. Made Brass.

3 inch Spray	8/6 each
4 1/2 inch Spray	11/6 each
6 inch Spray	16/6 each

MS 111. IMPROVED "BUTTERFLY."

MS 111

It gives all the execution that a large and expensive lawn sprinkler does. It is so arranged that the spoon revolves, no matter at what angle the hose or sprinkler may be held. When used in connection with the "Neptune" Hose Holder, or attached to the end of hose and set in any position, the spoon revolves rapidly and freely, never gets out of order, and throws a spray as far as a great many sprinklers which cost five times as much.

Price, 1/6.

MS 112.—"DANDY."

MS 112

Price, as illustrated

Elevated with 1 ft. pipe and sled 6/- each

Fitted to 3-ft. standard as shown in 8-arm sprinkler 10/- each

This sprinkler consists of an Improved "Butterfly" Sprinkler attached to a sled in such a way that it can be unscrewed from the base, and used on the end of hose if necessary. It possesses varied advantage in that it distributes water freely and is not affected by sand or dirt in the water.

MS 113

MS 113.—"VORTEX."

The water is broken up into a coarse spray by means of an arrangement of the water way which causes the water to rush out in the form of a whirlpool or vortex.

Screwed for 1/2 in. iron pipe	1/3 each
Fitted to sled, same as "Dandy"	3/6 each
Fitted to sled and elevated with 1 ft. pipe	4/6 each
Fitted to 3 ft. Standard as MS 116	8/6 each

MS 114.—"SIMPLEX."

MS 114

It throws a more uniform stream than any other sprinkler we know of in its class.

It is attractively finished in vermilion enamel.

Will cover a space from 30 to 40 feet in diameter.

Price, 2/8 each.

MS 115.—"REVERSIBLE."

MS 115

This sprinkler is suitable for use with either high or low water pressure; the cap is reversible, and a high or low spray covering a wide area of ground may be secured by simply reversing the cap.

Price, 3/6 each

Lawn Sprinklers

MS 116.—"THE DELUGE"—4-Arm.

MS 116

Four Arms, height 24 inch, with Hose or Coupling.
8/6 each.

MS 117 REVOLVING EIGHT-ARM LAWN SPRINKLERS.

MS 117

These Lawn Sprinklers are both very useful and ornamental, and positively indispensable in dry weather. They are well finished and will work and wear well. Fitted with Union for Hose, A large area of lawn can be readily watered with them, and they are easily moved from place to place. The arms and head are nickel-plated to prevent rust. It makes a beautiful fountain.

Height, 3 feet.
Price, with coupling,
19/6 each.

MS 118.—"DELUGE"—3-Arm.

MS 118

The "Deluge" Lawn Sprinkler, for price and utility, easily stands first. It is a great water economiser, and will cover a circle of from 20 to 60 ft. according to the pressure supplied.

Three Arms, height
12½ in., with Hose
Coupling,
6/- each.

MS 119.—THE COMBINATION SPRINKLER.

MS 119.

The Combination Sprinkler is of the Evanston type, but somewhat modified. It gives not only a full circle, the same as the Evanston, but by means of a cut-off, the spray can be regulated so as to cover a fraction of a circle only.

The operation of the Sprinkler is plainly shown in the cut. When the brass slide is pulled back, the usual full circle spray results; when it is pushed forward, a half circle spray is obtained.

This is particularly desirable, when it is desired to place the Sprinkler near the sidewalk, so the Sprinkler may operate and not wet the sidewalk.

Made in iron with brass slide and thumb nut nickel-plated throughout. It stands a trifle higher than the Evanston Sprinkler.

Price, 5/6 each.

C. CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Hose Holders

MS 121.—NEPTUNE NOZZLE HOLDER

With Ball and Socket Joint.

A simple device for holding the hose nozzle when sprinkling lawns, trees, shrubbery, etc. The holder consists of an adjustable clamp connected to an iron rod by ball and socket joint. The lower end of the rod is pointed, and provided with a step by means of which the standard is easily set in the ground. The nozzle may be placed in any position, and while in full play the direction of the stream changed at will, without coming in contact with the water, by moving the hose at a point outside the area being sprinkled. This can be accomplished with no other appliance, and is a feature to which we call particular attention. Specially adapted for using with the "Butterfly" Sprinklers. The holder is made of carefully selected material, and is practically indestructible. Total length, 33 inches; from step to clamp, 21 inches; diameter of rod, 9-16th inch.

3/6 each.

MS 122. — "ATTWOOD" HOSE HOLDER.

A very ingenious idea: has three legs, with swivel joint so that the stream may be changed to any direction.

Height overall, 15 inches

2/- each

Best Imported Folding Wood Lattice, Smooth Finish.
Suitable for Garden Trellis, and a variety of Horticultural Purposes.

MS 123. This illustration represents a New Folding Wood Lattice, most admirably adapted for a variety of ornamental and horticultural purposes for gardens, trellis, protection against frost, or for fowl-runs, &c. It is especially suitable for training peas, beans, &c.; will last for several seasons, is very portable when closed, and is easily stacked away for the winter. It is also very extensively used in conservatories, and it makes a capital croquet lawn or lawn tennis border, as it can be put to any height, from one foot to eight feet high, and patterns will be continuous

Closed

MS 123.

Open.

For sidewalks in either vegetable or flower gardens, for fruit trees, tomatoes, sweet peas, and other creepers it makes a first-class fence, and when stretched out, a long length makes capital garden arches 5-inch mesh (placed). Size of laths, 1/2 inch by 1 inch. Timber, Baltic, White Pine.

Pruning Tools

The "Standard" Tree Pruner

AND ITS ADVANTAGES.

During the past few years several inventions for pruning trees have been placed in the market, each being constructed differently, but none of them meeting the actual wants of the gardening public.

In the "Standard" Tree Pruner we claim to have overcome all the objections raised against previous inventions which have either been worked by a cord, or by a pole, or other method.

The "Standard" Tree Pruner, as will be seen on reference to the engraving, is a very simple, yet ingenious invention, consisting of a pole, hook, metal rod, lever and blade. The knife being connected with and operated upon by a metal rod attached to the lever, it will readily be seen that the power afforded is immense, and infinitely greater than is possible to be obtained by an implement worked by cord or spring. Whilst the branch, being encircled by the hook, is altogether under the control of the operator, and cannot escape until the portion to be removed is severed.

9 inch, with long handles for doing Banks 37/6 each				

IMPROVED "FAIRY."

MS 162.

This Mower is made of the very best material throughout, and special pains have been taken to see that all parts are strong where strength is needed.

The tie rod and reel shaft are made from solid steel, and the reel and bed knives from special lawn mower steel. The reel shaft is set well forward, enabling the operator to cut close to a tree or bush. The reel shaft box is fitted with split metal bushings, and is so constructed that grass will not wind around reel. All parts of this Machine are turned and accurately fitted, and the pivoted bed knife makes it very easily adjusted. It is interchangeable throughout, and all gearing is encased to prevent dirt entering and interfering with the perfect working of the Machine.

RANSOME'S PATENT DOUBLE ANGLE CUTTING BARREL.

MS 164.

Fitted to the Gear Automations only, without extra charge.

The Knives are made in two sections, and set at different angles to deliver the cut grass into the centre of the box.

The Knives are steel faced with tough wrought iron backs, and being riveted to the barrel cannot get loose.

MS 166.

BALL-BEARING LAWN MOWER.

In the Ball-Bearing Lawn Mower is realized the culmination of mechanical skill in lawn mower construction. No effort or expense has been spared to make this mower perfect in every respect.

The material is the best that money can buy. Where two parts are joined together in this mower, they are machined with the greatest care, so that they will fit together with mathematical exactness. As a result, there is no lost motion anywhere about the mower; it combines strength with lightness, and is noiseless in operation. The mower is graceful in appearance and is highly finished. Ball-Bearing Mowers have not been successful in the past, because of the difficulty of devising a means to take up wear in the bearings. We have mastered this difficulty by the

MS 167.

RANSOME'S PATENT SINGLE SCREW AND FRONT ROLLER ADJUSTMENTS

MS 165.

The Single Screw Adjustment has a strong spring under the bearings on each side to support the cylinder. One set screw only is fixed above each of the cylinder bearings, forming the simplest and most effective means of adjustment ever brought out.

The Front Roller Adjustment is very simple, requiring no spanner. The rollers are carried by a crank lever which turns on a centre, and by unscrewing the small hand wheels and moving them along the segments, the adjustment is made on both sides in the tenth part of the time occupied by the old-fashioned and troublesome method of having to use spanners to unloose the nuts.

RANSOME'S PATENT RIBBED ROLLER.

MS 166.

The Patent Ribbed Rollers prevent a machine from slipping downwards on sloping ground, and skidding on dry or wet grass. They also give a better finish to the lawn.

the introduction of a most simple device (see direction sheet), which can be operated by any unskilled person.

The mower has a reel adjustment, and the cutter bar is therefore bolted solidly to the mower, which gives the additional advantage of holding all working parts in perfect position.

The revolving cutters, four in number, are spiral, and give a continuous shear cut.

All blades are of best crucible steel, tempered in oil.

This Mower is made in sizes of 12, 14 and 16 inches.

NEW DOUBLE-CYLINDER GARDEN ROLLER.

Prices and Sizes.

Width.	Weight—Cwt. qrs. lbs.	Price—£ s. d.
20 inches	2 2 0	3 12 6
22 "	3 0 0	4 7 6
24 "	3 6 0	5 5 0

The above are all of English Manufacture, free from flaw or blemish in the castings, with perfectly smooth face.

These newly designed Rollers are made with two Cast-iron Cylinders, the outside edges of which are well rounded off. They have an exceptionally good appearance and are moderate in price.

We beg to call special attention to these new Garden Rollers, which can be loaded with water or sand. A patent has been completed for making the cylinders of cast metal with rounded edges instead of wrought iron. This enables the manufacturers to reduce the prices considerably, while the efficiency of the Rollers is fully maintained. For keeping Lawns and Tennis Courts in perfect order these Rollers are invaluable. When the ground is soft they may be used empty, and in dry weather, when all others are useless, they can be filled and worked to advantage.

JAPANNED LANTERN, plain glass sides instead of bevelled glass each 2/-

Shades for Incandescent Kerosene Lamps.

MI 117.

MI 117.—THE KINGSHOLM. Opal Dome Shade, Eye Cup and Brass Carrier, for Incandescent Kerosene Lamps. each 3/6

When fixing a new Mantle see that it hangs full on the support, and that the support does not nip the Mantle against the Burner or it will cause the Mantle to split when first lighted

MI 633.

Gas Globes

MI 634.

It would be impossible for us to illustrate our numerous designs of Gas Globes for Ordinary Gas Burners (not incandescent), as styles and colors are always changing. Globes as used for the Ordinary Burners are suitable to be used with the Acetylene Gas Burner.

GAS GLOBE, Moon Shape, 2 1/2 inch fitting—Opal or all White 10d. each Sand Blast or Frosted, assorted patterns .. 1/- each

Q.F. LASSETTER & CO., LIMITED

Verandah Nosing and Steps

To make a good finish to a Tiled Verandah, a nosing of marble or slate is necessary.

SICILIAN MARBLE NOSING—

1 in. thick, 12in. wide	per foot run 2/6
1½ in. thick, 12in. wide	per foot run 3/4
1¾ in. thick, 12in. wide	per foot run 3/8

SLATE NOSING—

1½ in. thick, 12in. wide .	per foot run 2/3
1¾ in. thick, 12in. wide .	per foot run 2/6
2 in. thick, 12in. wide ..	per foot run 3/1

As the cost of marble is constantly fluctuating, the prices quoted are subject to alteration without notice

Tiles for Everybody and Everything

We hold an immense stock of all patterns of Tiles for Verandahs, Walls, Hearths, &c. We carry out any kind of Tile work that is required to be done. Competent workmen can be sent at a moment's notice.

Hearth Tiles

As in other things, the way the Hearth of the Fireplace is finished has to bend to the will of evolution. Where our ancestors were satisfied with the old Hearth-Stone or Cement Hearth, the modern house or cottage must be fitted with Tiles. We have large stocks of all patterns of Tiles—Printed, Colored Printed, Majolica, Enamelled, and Tiles for making the Patched Hearth, as illustration.

MI 652 PANIILED HEARTH.

As illustration, in Fancy Colors 10/6 to 17/-.

Panel, 30 x 6 in., to be fixed in Cheeks of Tile Grates, to match Panels, from 4/- per pair.

HEARTH TILES—

6 x 6 in., Print, Single Colors	per doz. 3/-
Ditto, Fancy Colors	per doz. 4/6, 5/-
Ditto, Fancy Majolica	per doz. 6/- to 12/-
6 x 3 in. Strips for Borders, to match above Tiles	per doz. 2/-, 2/6, 2/8, 3/-

Plain Enamelled Tiles, all sizes, from 6 x 3 in. to 6 x 1 in., in the different art colors in which it is possible to make them, from 13/- per hearth.

We also stock Enamelled Tiles, called "Briguettes," which are specially adapted for use in open fireplaces or coverings, as being considerably thicker than the ordinary Tile. The cement which is used to fix the Tiles is less likely to be perished from the heat of the fire, and allow, which is sometimes the case when the ordinary Tiles are used, the tiles to fall down. Prices for Brigquette Fireplaces on application.

When ordering Tiles for Hearths, it is very essential that the measurement be sent showing the exact length and also width from wall.

Wall Tiles

Glazed, Enamelled, and Majolica Tiles, suitable for Bathrooms, Pantries, and Dairies, Dadoes in Halls and for other purposes, where a permanent, beautiful, and sanitary Wall Finish is required. Prices and designs, with samples of colors, will be submitted on application.

GAS FITTINGS

Incandescent Gas-Lighting Requirements

In the small space allotted in the catalogue to this section we are only able to show but a tithe of the different styles that can be seen in our showrooms. It gives, however, a fair idea of what we stock, but as numerous alterations are always being effected in the designs of Gas Fittings, those in search of the latest and most up-to-date appliances for lighting should pay a visit to our spacious showrooms.

We stock all the requirements for Gas Fittings, and also everything necessary for Gas Lighting in Private Houses (both for the Mansion and the Cottage), Churches, and all kinds of Private and Public Buildings.

Surprise Pendant

This kind of pendant is specially recommended for Dining Rooms, Studies, Offices, etc. It may be drawn down, close over the centre of the table, so that the eyes may be in the shade while the table is brilliantly illuminated. Its construction enables it to be balanced in any position and to be moved with finger touch. All pendants fitted with Ball Joints, and prices quoted do not include Incandescent Burners or Shades unless specially mentioned. Full particulars of Incandescent Burners on page 782.

System for Domestic Hot Water Supply.

Instructions for Fixing:—

MI 245

We show here a system of Hot water service to be used in connection with our Leamington Ranges. The sketch shows the system as applied to a three-storey house; but the same directions can be carried out in a cottage. We keep a special staff of experienced men to do this work; and would furnish approximate estimates if supplied with a rough sketch showing positions of bathroom, sinks, etc., with measurement of distances.

Directions to assist in Setting Close Fire Leamington Ranges.

MI 286.

In setting Close Fire Ranges, care should be taken to prevent the air getting into the Flue, except through the Fire.

The whole of the bottom part under the Ovens (see Plan) should be built up solid nearly to the level of the soot or cleaning doors, which are placed in the Range Front under the Ovens.

The arrows in the sketches indicate the direction taken by the smoke and heated air on leaving the Fire. The Flue E is carried over the top, down the side, and under the bottom of the Ovens, passing round a Check Plate F, and entering the bottom of the vertical or upright brick Flue H behind the Oven—at the corner nearest the Fire. The Flue at this part should be carefully rounded off, and made sufficiently large to prevent the accumulation of soot.

It is necessary that for the Fire there be also a separate or distinct Flue, the damper of which should be shut when the Ovens are in use. It is also recommended that where the third Flue is adopted, the dampers of the Ovens be closed when not in use.

Special attention is requisite to the construction and finishing of the Flues, which, for Ranges 4 feet and under, should have an area of not less than 36 inches for each Flue—say 6 x 6 inches, or 9 x 6 inches if more convenient. For Ranges above

4 feet, an area of at least 48 inches is required for each Flue, while for extra-sized Ovens a proportionate increase is necessary.

The foregoing principles are also applicable to the setting of Ranges with Ovens and Necked or Nozzle Boiler.

If the Range be with raised Ashpan, and side Boiler without neck, the Flue can be brought round under the Ashpan, and along under the bottom of the Boiler, and up its outer side, or at the back.

The sliding Register Top Plate must be fixed, so that soot can get into the Chimney, except through the Flues. The sliding door therein is used for cleaning the Chimney and for ventilation, when required.

The Damper, are built in, so as to be a complete check when required.

The Fireplace should be kept free from accumulation of Ashes, and the surfaces of Ovens and Boilers also the Flues, free from soot, otherwise the efficient working of the Ranges will be impeded, and Fuel also unnecessarily expended.

We keep a special staff of competent Stove Fitters, which we can send to fix the Ranges, if desired.

The "Bonny Bridge" Dover Stove.

MI 291.

THREE SIZES—
No. 6, No. 7, and No. 8,
WITH IRON LININGS,
DROP DOWN FRONT
BARS, AND EXTENDED
FIRE BOX FOR WOOD
FUEL.

This splendid new Design has been got up to meet the demand for a cheap Stove of moderate capacity but free from the usual glaring defects of this class of Stove, and calculated to save the Public the annoyance and worry entailed upon them by continual complaints from those who do not take into consideration the fact that in a cheap Stove they ought not to expect all the good qualities of the more expensive sorts. To obviate the necessity of either pulling the Stove out of the fireplace to get at the side soot door, or scooping out the soot from the flues with the hands, both serious objections to this class of Stove generally, this Stove is fitted with Patent Removable Combined Oven Bottom and Fine Divider, and Sliding Soot Door in front under Oven not liable to be mislaid and lost like the lift off kind, whereby the flues of the "Bonnybridge Dover" are more easily and thoroughly cleared of soot with the ordinary Rake than those of even the most expensive Stoves.

The Fret Extension of Hot-Plate fits either end of the Range, the mouldings are deep and bold, and they, as well as the corners of projecting Hearth Plate, have strengthening webs cast on them to obviate as far as possible breakage in transit, whilst the bulged style of Oven Door in addition to its handsome and massive appearance makes the Oven actually larger than the net measurements indicate. The Fire Door and Oven Door Knobs and Name plate are handsomely Nickel-plated.

BLUE FLAME OIL STOVE

A Working Flame at the Moment of Lighting.

One Burner Stove	32/6
Two Burner Stove	47/6
Ovens for either of these Stoves ..	11/8 each
Three Burner Stoves	62/6
Oven, 14/6 extra	

These Stoves are a Safe Investment, as they ensure Perfectly Cooked Meals, a Contented Wife, and a Happy Household.

These Stoves represent the latest improvement in Perfection Blue Flame Oil Cooking Stoves. They are fitted with Gas Valves, and are operated like a Lamp, but are so designed that they cannot be turned too high, thus avoiding any possibility of smoking. They are beautifully finished in Black Japan, and are fitted with Best American Blue Enamel Funnels, which give them a very attractive appearance. They are also provided with legs, which obviate the necessity of placing them on a table or a box.

Breakfast Gas Grillers.

Sanitary Baths

The great advantage of Porcelain or Vitreous Enamelled Baths is beginning to be more generally recognised by the public. They are quite as beautiful as Solid Porcelain, while they are much lighter in weight. They rapidly acquire the temperature of the water in the bath, and never feel cold to the touch when filled with warm water. The amount of heat absorbed by them is infinitesimal.

LASSETTERS' KEEP THE LARGEST AND BEST-ASSORTED STOCK OF THESE BATHS

MI 395.

DOULTON PORCELAIN ENAMELED BATH (MI 395).

Patent Bath Heaters

MI 450

MI 451

MI 450. BATH HEATER FOR GAS.

Awarded First Prize all Exhibitions.

No danger of explosion or chance of leaving the gas burning. These Heaters are made in copper, and are acknowledged to be the most perfect and safe Water heaters for Gas in the market, and are suitable for bath, kitchen, or general use.

High-pressure, £5; low-pressure, £4.

The above Heaters are made to suit high and low pressure water supply, and great care must be taken in ordering as the High-pressure Heater will not work satisfactorily at a pressure of less than 25 lbs.

When ordering Face Outlet, state which hand fire box or taps are to be on.

MI 452.

MI 452. £8-10.

MI 461.

MI 461) FOR WOOD FUEL.

The simplest and most perfect system of heating water yet invented.

A hot bath for one handful of chips. Water heated to any temperature as it runs through the machine.

No. 1—1 gall. per minute . . . Iron, £2; Copper, £4

CYCLONE "N" GATE

RABBIT NETTED.

MI 525

MI 525 represents the "Cyclone" Gate, made rabbit-proof by attaching galvanised wire netting, 36in. high, 1½in. mesh, 17 gauge wire. We recommend that an rabbit-proof gate be hung on the sides of the posts, as this permits the gate to close hard up against the posts, and makes it absolutely rabbit proof. Another advantage of hanging the gate in this way is that it is not liable to be damaged by a vehicle passing through.

Square Corners can be attached to the bottom bar at an extra cost of 1/6 per gate.

			Rabbit Netted.	Plain, Not Netted.
10ft. wide.	4ft. high.	77lbs. weight	20/6	22/6
11ft. wide.	4ft. high.	85lbs. weight	20/3	25/-
12ft. wide.	4ft. high.	92lbs. weight	32/-	27/6
13ft. wide.	4ft. high.	100lbs. weight	34/9	30/-

Prices are for Gates complete, with hinges and catch. Special Railway Gate Springs can be supplied at an extra cost of 3/6 per Gate

CYCLONE "M" GATES

MI 526.

This design of Gate is only made in sizes 14 to 16ft. openings. These Gates are exactly the same construction as the N Gate, Fig. MI 525, but owing to the increased length, are fitted with an additional diagonal stay. Square Corners can be fitted on the 15 and 16ft. Gates are supplied with an iron stay rod to support weight of Gate. An extra post must be erected behind the gate post on which the Gate is hung, to carry the rod; the rod has a tightening screw to provide for any movement in the gate post.

			Plain	Rabbit Netted	Do. Square Corners.
14ft. wide.	4ft. high.	112lbs. weight	32/6	37/6	38/-
15ft. wide.	4ft. high.	130lbs. weight	45/-	50/3	51/6
16ft. wide.	4ft. high.	138lbs. weight	47/6	53/-	54/6

Prices are for Gates complete with hinges and catch, and special stay rod described above with 15 and 16ft. Gates

These Gates are made rabbit-proof by attaching 36 x 1½ x 17 gauge galvanised wire netting. See illustration, MI 525.

Always state distance between posts when ordering Gates.

UNIVERSAL PROVIDERS.

"Cyclone"

Single and Double Stay Gates

The frames of these Gates are made of 1 1/2 in. diameter steel tube, the stays 1 1/2 in., the latter being secured at either end by two 1/2 in. bolts. The horizontals consist of two No. 9 galvanised wires tightly cabled together, with Cyclone Droppers attached in centre. Gates for openings of less than 5 ft. are made without stay, but have four horizontal wires braced with No. 4 Cyclone Droppers. Single Stay Gates are made in sizes 5 to 7 ft., and Double Stay Gates, in 8 to 9 ft. If required with square corners on the bottom bar, 1 0 extra per Gate.

MI 527

SINGLE WALK GATES.

PRICE LIST.

			Plain.	Rabbit Netted.	Do., Square Corners

Ornamental Cyclone Gates

MI 528

Double

Drive-way Gates

The frames of (MI 528)

Gates are made of 1 1/2 in. steel tube. The inside or ornamental scroll work is 1 1/2 in. flat iron. The bottom portion is woven wire, 14 gauge galvanised

DOUBLE GATES.

8ft. wide.	4ft. high	52/0
9ft. wide.	4ft. high	60/-
10ft. wide.	4ft. high	67/6
11ft. wide.	4ft. high	75/-
13ft. wide.	4ft. high	80/-

SINGLE GATES.

30in. wide.	4ft. high	26/-
36in. wide.	4ft. high	22/6
42in. wide.	4ft. high	28/-
4ft. wide.	4ft. high	27/6
4ft. wide.	4ft. high.	35/-
4ft. wide.	4ft. high	37/6

These Gates are made in sizes as per list. They can be made in any size required, but intermediate sizes will be charged at the same price as the next size larger on the list; for instance, an 8ft. 6in. will cost same as a 9ft. Gate. Gates can be made higher by increasing the height of the woven space, and cost will be 1/3 per square ft. for added height.

All prices are for Gates complete, with hinges and catch. Always state distance between posts when ordering Gates. Special sizes can be made; price on application.

MI 538

Steel Diapers.

6in. and 8in Patterns. Supplied in Sheets 6ft. x 2ft.

These patterns may be cut up to the cornice, and thus they can be used without a border and moulding.

These styles are mainly intended for large rooms, where the effect produced is that of the ceiling being specially designed for the particular room in which it is used. With ceilings of this kind a border and moulding will mostly have to be used. The measurements of the area covered by the ceiling itself must be factors of 12in. The inequalities in the sizes of the room can be made up in the border which may be moulding.

STEEL PANELLING.

Supplied in Sheets 6ft. x 2ft.

While the panelling shown on this page may be cut up to the cornice, and thus save the extra expense of a Border and Moulding, the employment of the latter is much preferable as it gives a finished appearance to the room, and since the patterns would not then be cut, it would give the effect that the ceiling had been specially designed.

Plain Steel Cornices

(MI 552.)

We stock Mitre Leaves for these Cornices (see Price List).
As the bottom flange of all our Cornices returns into the wall, an extra flange, supplied in a separate piece, should be ordered when the walls are also to be of metal.

Supplied in stock lengths of 8 feet. 5in. wide,
7in. girth 12

MI 553.

Combination Cornice, Border and Moulding in Steel.

MI 553.

Supplied in lengths of 8 feet. 5in. wide, 7in. girth or 5in. on ceiling, and 1 1/2 down wall 14
These pieces or Border Finishes as they are called, form a very effective and economical method of finishing ceilings. They give the same effect as cornice, border and moulding in three separate pieces. The ceiling patterns must be cut to suit irregularities in sizes of room, if any.

Steel Border Finish

12in. on Ceiling
6in. down Wall

8ft. Lengths,
3/- each.
Mitre Leaves,
1/1 each

MI 554
With all border finishes we supply Steel Mitre Corners. These are manufactured with a flange on each side, up to which the border finish can be cut.
For border finishes shown on this page we supply mitre leaves for all angles.
These larger pieces produce very fine effects at a small extra expense, but the ceiling pattern must be cut to make up any irregularities in sizes of rooms.
All these Centre-flowers are perforated and provide ample ventilation. They can be easily applied to wood as well as metal ceilings. If desired they can be purchased fixed in panels complete (See page 843.)

Zinc Centre Flowers (See Page 766).

STEEL BORDER FINISH, 5in. wide, 1 1/2in. girth, 5in. on wall, 5in. on ceiling, 1/10 per length; angles and corners, 8ft., 6d. each.

STEEL CORNICE, 5in. girth, 2 1/2in. on wall, 2 1/2in. on ceiling, 1/10 per length of 8ft.

WOOD MANTEL PIECES

In Modern Houses Wood Mantelpieces are now very largely used. We keep a large stock of the latest and most modern designs from the plainest to the most elaborate, and the prices are the lowest. In wood mantelpieces the most essential thing is that the wood used should be dry and well seasoned. We make a special point that all our mantelpieces are made from well seasoned Timber.

Prior to fixing mantel, the back should be painted with a heavy coat of white lead and oil or any good paint. If this is done there should be no fear of our mantels warping or twisting. Should our clients require mantels and overmantels made up to their own designs or details, we shall be pleased to forward quotations.

In the prices given in this Catalogue PRIMED means painted with one coat white lead and oil, STAINING means stained either Walnut, Rosewood, Oak, Green, of various colors, and Cedar.

WHEN GIVING MEASUREMENTS OF FIREPLACE OPENING PLEASE GIVE SIZE AS PER DIAGRAM BELOW.

MI 559

State also whether the Fireplace is an ordinary Breast or on the angle

Measurements Required

A to B, side of jamb; C to D side of jamb; B to C, width of opening; B to E, height of opening; G to H, height of opening over all.

The Stock Sizes of Wood Mantels up to 35.- are 36in. x 36in., higher priced designs, 36 x 36, or 37in. Special sizes at increased cost, according to size required. When ordering please state height and width of opening. Mantels are finished either Stained Walnut or Enamelled Marble.

Marble Mantelpieces

Our stock of Marble Mantelpieces comprises the newest styles and patterns made. Having our own Marble Factory, and buying the Raw material direct from both the Continental and local quarries, we are enabled to produce Mantelpieces at the lowest possible price, and at the same time the quality of the work produced is the very best.

We hold large stocks of Sicilian, Rouge, St. Ann's, and also Colonial Marbles, Boremore, etc., and are able to quote for any special Marble work required, such as shop fronts, interior decorations, etc.

The openings of Marbles shown are to take grates up to 38 inches x 38 inches. Special sizes are made to order.

Marble Kerbs for Hearths

To properly finish a Tiled Hearth it is necessary to have a Kerb to match the color of Mantel-piece. In Kerbs, nothing looks as well, or is so serviceable, as Marble. The stock sizes of Kerbs, and for which prices are quoted, are 4ft. long and 12in. wide, inside measurements. When ordering, it is very essential that exact measurements should be sent so that the Kerbs can be cut to suit.

Can be supplied with Round Top or Chamfered. Round Top is always sent unless specially mentioned

Sicilian Marble—

Height 3in., width 14in., Round Top	15/6

Grates of Various Patterns

For the comfort of a house a good Grate is very necessary. There are Grates of various kinds—the ordinary Register Grate, the Grate with Side Lugs for Tiled Panels and the latest and most modern, the "Interior" Grate, the latter fixed with Tiles at each side. Our stock is replete with different patterns of the above Grates; and we also show the many various kinds of Grates in our Illustrations of Mantels, as follows—

Register Grate, from	10 8
Tiled Grate	22 6

MI 603.—INTERIOR GRATE.

This Grate is specially adapted where there is a likelihood of the chimney smoking. The Grate is fitted with two Dampers; by opening the lower Damper, which is directly over and close to the fire, it forms a strong direct draught, which, as soon as it heats the flue, forms a rapid current of air, thus carrying off the dense smoke. When the fire is well under way, the lower Damper can be closed, the upper one remaining open.

This Grate has a very large Firebox, suitable for burning logs of wood, and it can be supplied in various handsomely finished designs. The Grate has a front attached, which is removed when the fire is aught, but can remain fixed when Grate is not in use.

A large assortment ranging from 1/- up to 95/-.

Vowel A size is a favorite family machine. Its merits are a simple, compact, portable and efficient Washer are universally acknowledged. Twelve shirts can be easily washed in 15 minutes by this machine. Weight, 1 cwt. 2 qrs. 10 lbs.

Price, without Wringer, £6/15/-.

F. LASSETTER & CO., LIMITED

Mangles

This is a Department we have spent some time and labor upon. We had a celebrated English maker here and described to him the very things we wanted. The result was that we produced together the "Crowning Glory" and "Mantolini" Mangles.

Badly-made Machines are dear at any price, and cost more than their original value in repairs. We have had no complaints, but frequently our customers speak of the great satisfaction the Mangle has given, and have recommended their friends to purchase.

Each Mangle is fitted with Patent Roller Bearings, which reduce the friction, making the Machine so easy that it is a positive luxury to use it.

THE "MANTOLINI" MANGLE (MI 626).

This is a well-designed and handy machine. It is fitted with Patent Roller Bearings and improved Slides for holding Mangle Boards.

We keep a stock of every part, so that if a mishap occurs it may be rectified at once.
No. 260—21 in. Polished Rollers, weight 2 cwt. 0 qrs. 21 lbs. 65/-
No. 251—24 in. Polished Rollers, weight 2 cwt. 1 qr. 10 lbs. 70/-

Owing to the demand for a Cheap Good Serviceable Mangle, we can supply a Mangle similar to the "Mantolini," called "The Crown," without Roller Bearings.

Length of Rollers, 22 in. 60/-
Length of Rollers, 24 in. 65/-

MI 625.—THE "LITTLE NIPPER" TABLE MANGLE. 20 in. Rollers, will fit on any table, 32/6
"HOUSEHOLD" TABLE MANGLE. 24 in. Rollers

35 -

The Crowning Glory Mangle.

(MI 627.)

(Registered.)

We recommend this machine with great confidence; it has been designed to meet the wishes of our numerous customers. The framework is exceptionally strong, with heavy Wood Rollers. It is also fitted with Patent Roller Bearings, which make it the easiest working Mangle in the market.

THE CROWNING GLORY MANGLE (MI 627).
No. 252 24-in. Polished Rollers, weight 2 cwt. 1 qr. 20 lbs. 84
No. 253 27-in. Polished Rollers, weight 2 cwt. 3 qrs. 21 lbs. 84/10/-
No. 254.—30-in. Rollers, weight 3 cwt. 86

Duplicate parts can always be had.

D.M.L. Tyre Bending Machines

MT 26.—No. 5A Machine: Capacity, 4 x 1 inch Tyre;
Approximate Weight, 12 cwt. . . . £8 10s. each

MT 26.—No. 6A Machine: Improved Capacity, 6 x 1½ inch Tyres, Approximate Weight, 3½ cwt. £13.

These Machines are recommended as being more durable and efficient than any other Machine of the kind. The Machines have solid cast iron frames and very powerful gearing. The cylinders are **Wrought Iron**, case hardened. The two outside cylinders are fluted, pressure being effected by set screw underneath. A Welded Tyre can be replaced in the Machine for finishing off by simply drawing out spindle of the top cylinder. The larger Machine has extra gearing and either Machine requires little power to work it. Warranted to bend a bar of iron to any desired compass.

"Green River" Tyre Welding and Upsetting Machines

CHEAPSIDE, SYDNEY.

Blacksmiths' Materials

BAR IRON

For Wheelwrights' and general Smithing purposes, we stock Netherland Bar Iron, which many years' experience has proved to be uniform in quality and most suitable for the above purposes, and which we can thoroughly recommend.

For Horse-Shoeing we keep "Rivet" brand, and, after making exhaustive tests, can confidently recommend this brand to Farriers. The "Rivet" was selected, from a large number of others, by the Sydney Tramway and Omnibus Company, and has been used by that Company and other leading Farriers for years past with most satisfactory results.

Ordinary sizes, £12/5 - per ton, 12/6 per cwt., subject to usual list of extras.

Shoeing, £13/5- per ton; 13/6 per cwt.

Price, 30/-. For 5 cwt. or over, 1/- per cwt. less.

You cannot expect to get good work out of your horse unless he is well fed, well sheltered, and, above all, well shod. You want a shoe that fits and is adapted to the horse's shoe. This we can supply in the A 1 Crown Horse Shoe.

We use only the best material in our Horse Shoes, as it is impossible to make a good Shoe out of poor iron. Supplied with the best material, and employing only the most experienced workmen, we turn out Shoes superior in shape fitting, and finish to the best imported Shoes, and at a much cheaper rate, as they are entirely free of duty.

We stock many shapes and styles, but only one quality the best. We feel confident that we can supply the wants of consumers, wherever situated. The quality, finish, and standard of our Shoes cannot be improved upon, and we will gladly furnish samples of any pattern on request.

Don't waste your money by purchasing LASSETTERS' "SCRUTCH" BARBED WIRE

LASSETTERS'

"PATENT SCRUTCH"

GALV'D. BARBED

WIRE.

F. LASSETTER & CO., Ltd., SYDNEY.

SOLE AGENTS

MT 63.

Our present price for 12g is £10, for 14g. £20/10/- per ton.

READ THE FOLLOWING CAREFULLY.

The consumer is more interested in the cost per mile than the price per ton. The "Patent Scrutch" and Ordinary Barb Wire are constructed of Two-Strand Galvanised Steel Wire, with Four-Point Barbs 3 inches apart. The following comparative statements show the advantage of using "Patent Scrutch" Barb Wire:—

1 Cwt. 14 gauge Patent "Scrutch"	Measures about 810 yards
1 Cwt. 12 gauge Patent "Scrutch" 610 yards
1 Cwt. 12 gauge "Ordinary" only 460 yards

1 Mile 14 gauge Patent "Scrutch" .. 2cwt. 0qr. 10lb	Wages approx.
1 Mile 12 gauge Patent "Scrutch" .. 2cwt. 3qr. 15lb	
1 Mile 12 gauge "Ordinary" 3cwt. 3qr. 15lb

1 Ton 14 gauge Patent "Scrutch" .. 9 miles 364yds.	Measures about
1 Ton 12 gauge Patent "Scrutch" .. 6 miles 164yds.	
1 Ton 12 gauge "Ordinary" .. only 5 miles 20yds.	

Saving of 18 1/2 per mile for each Wire.

Saving of £1/6 2 per mile for Two Wires.

Saving of £2/14 3 per mile for Three Wires.

Saving of £3/12 4 per mile for Four Wires.

Samples of our "Patent Scrutch" posted free on application.

Our "Patent Scrutch" Barbed Fencing is made from Steel Wire, galvanised by an exclusive patent process, securing the greatest tensile strength and imperishableness. It is the most effective Fencing in use. A single strand of Barbed Fencing will greatly increase the effectiveness of all styles of old Fencing. Steel Barbed Fence saves all waste of soil from occupancy and shade. For close enclosures of

Thus 1 mile of Ordinary Barb Wire at £16/- per ton costs £3/2 7 per mile; 1 mile of 14-g. "Patent Scrutch" at £20/10 per ton, costs £2 4/8.

SAVING 17/10 PER MILE
And also 46 per cent. of freight and team charges

So that you get 7 miles of our "Patent Scrutch" Barbed Wire for what you would have to pay for 5 miles of Ordinary, and a much superior article in every way, besides the 46 per cent. saved on the carriage

But this is not all. Our "Scrutch" takes the strain equally on both wires, whilst the ordinary Barb Wire takes the strain on one wire only, which will snap before any strain comes on the second wire. Thus our 14-g. "Scrutch" is stronger than Ordinary 12-g., and only half the weight per mile

gardens and choice fruit. Steel Barbed Fence forms a barrier impregnable to all trespassers. The double twisted wires of the Steel Barbed Fence respond to all change of temperature without changes of length. It is a steel thorn hedge, instantly available, instead of the tardily-grown, vermin-haunted live hedge, with its great waste of soil by its occupancy and by its shade. It can be constructed dog and dingo proof. As a pig-tight fence it checks the most troublesome swine. The petty thief observes it with "marked" respect.

Our "Patent Scrutch" Barbed Wire has a new style of barb, which is a decided improvement on the ordinary brands. It will prick just as keenly as the old patterns; at the same time, it cannot tear or damage the animals, the latter feature being a valuable consideration where blood stock are concerned.

"Patent Scrutch" Barbed Wire is cheaper and better than any other.

Under all circumstances, Steel Barbed Fence has shown all the best qualities of the perfect fence. It is easily erected. The material is easily handled. Three men can build half a mile of fence in one day — posts already set. Only a few simple tools are required, and no more mechanical skill is called for than is found on every farm. It can be kept tight — does not vibrate to changes of temperature. It will not snap when cold, nor sag and grow loose in heat. It will not blow down, burn down, nor tumble down. It is staunch. It cannot be thrown down by the careless or mischievous trespasser, and in place it is permanent and indestructible. Cattle and stock let it alone. We find sales on every estate in neighborhoods where Barbed Fence has been well tested

UNIVERSAL PROVIDERS.

Best Drawn Fencing Wire.

For the convenience of our customers and buyers generally, we have carefully and accurately compiled, as shown hereunder, a scale showing weights, lengths, and breaking strain of our well known "AI Crown Best Round Steel Wire," which will be of assistance to those working up estimates of Wire Fencing.

The information given below is intended to assist those who contemplate using "AI Crown" brand of Fencing Wire.

The above Trade Mark (the property of the undersigned) is Registered, and stringent measures will be adopted to prevent any infringement or piracy.

C. CHEAPSIDE, SYDNEY.

MACHINERY DEPARTMENT.

WE HAVE PLEASURE in drawing your special attention to our Machinery Section in this Catalogue. Our experiences of nearly a century have enabled us to design and complete a class of implements to suit the requirements of all settlers on the land. Our tillage implements have been built and designed after trials in all conditions of soils, and we can supply Plows and Cultivators to suit either sandy, black or any soil.

PUMPING MACHINERY.—When making enquiries with regard to Pumping Machinery, we would suggest you inform us the quantity of water you require per hour or per day, the distance and elevation (if any) the water has to be forced; if pumping from a well, kindly state depth and distance you require the water forced, and whether you require it to be worked by horse, hand, wind or steam power.

HARVESTING MACHINERY. This is one of our specialities, the Mowers are specially built to suit all conditions of crops, and we were the people to break up the "Binder Ring," which existed to keep up the high price of machinery some years ago, and the low prices of Reapers and Binders to day is due to our effort. We do not appoint agents or employ a number of travellers or touts, as by this means we are in a position to sell to the Farmers at much lower prices than other Importers, and by dealing with us you save the middleman's profit.

WEARING PARTS OR SPARES. We have an exceptionally large stock of Spares or Wearing Parts, and when ordering will you kindly inform us the Maker of your machine, about the date of purchase, and the casting number on the old parts. Should you forward any old parts for repairs, please attach your name and address to the label, as this enables us to trace whom the parts are from.

UNIVERSAL PROVIDERS.

Ransome's Prize One-Wheel Colonial Ploughs

N.S.W. SERIES.

MU 4

These Ploughs combine all the advantages of the Best English Patterns, and all their parts are of very strong construction. The beams, frames, and land side handles are of wrought iron, and forged in one piece, which gives them great rigidity and avoids the use of nuts and bolts. The breasts are of steel. Complete as per illustration.

Buchamburra, Nelligen.
Messrs. F. Lassetter and Co., Ltd., Sydney.
Dear Sirs, I am pleased to state that I am in receipt of ploughs and shares, also all previous goods, and in good order. I must say that I am well pleased with the N.S.W. Plough since I gave her a trial. Thanking you for your kind and prompt attention I remain, yours truly,

Ransome's Extra Strong Colonial D.A.M.H. Ploughs

The "Monarch"

MU 5.

These ploughs are specially adapted for dam and road making, ploughing among large roots and stumps, trenching, draining, etc. They are fitted with a wrought iron frame, steel breast, and special bar share of wrought steel. They are suitable for from 4 to 8 horses when doing ordinary ploughing, but are strong enough to withstand almost any strain that may be put upon them when ploughing on stony or rocky soils.

The shares take the same marks as the ploughs

Ransome's Patent Trussed Beam Plough, Y.O.H.

Skim Coulter and Furrow Wheel extra.

MU 6

These are simple, light, and strong wrought iron ploughs, and enjoy a very high reputation throughout Australia. They were the first Ploughs used in the Colonies, and continue to be preferred by many to all others. They have patent trussed beams, and are fitted with one or two wheels and with wrought or cast shares, and steel or cast mould-boards as ordered. The mould-boards are short, and turn a broken rectangular furrow.

They are simple in construction, low in price, and are useful for general purpose Ploughs, suitable for light or mixed soils. Many thousands are in use in all parts of New South Wales.

Mark	Size of Furrow in inches	Average Weight	Draught
Y.O.H	4 to 7 deep x 8 to 10 wide	196lb	2 horses
Price,	£6 15/- each	Skim Coulter, 7/6 each	Furrow Wheel, 15/- each extra.

Ransome's "Steel Chill" Digging Plough, G.D.L.

MU 7.

These Digging Ploughs will plough a greater depth and width than any ordinary Plough, and with less draught, breaking the furrow slice to the bottom. All the wearing parts are made of chilled cast iron, which is harder than steel, and the breast is thoroughly glazed that no soil will stick to it. They have a knife tailpiece, and leave the soil thoroughly broken and pulverised and fit for sowing immediately complete with Knife Coulter.

With these Ploughs a man can easily plough up yards of an acre of land in a day of eight or nine hours.

Mark	Size of Furrow in inches	Average Weight	Draught
G.D.L	4 to 8 deep x 12 wide	220lbs	2 horses
Price,	£7/10/-		

Ransome's "Steel Chill" Digging Ploughs

With Patent Divided Shares

MU 8.

These Ploughs are similar in design and construction to the I.R.C.P. Plough, but the share is made in parts. The wing and point, being separate, are renewable at a small cost and the chilled cutter, which takes the place of the ordinary coulter, forms part of the Plough body, and is also renewable.

Weight, 68lb. Price £1/12/6,
Order Quality by Number.

14 TOOTH HARROWS.

Just the Tool for Small Plants. Adjustable in Depth.

Our 14-Tooth Steel Harrow is a tool that is taking well among the farmers and gardeners over the whole country. This tool is used for working very closely to small plants of corn, cotton, potatoes, etc., it thoroughly pulverises, but throws no dirt on plants. It is also used as a straight Diamond Tooth Harrow; also a smoother with sharp points down in order to cut and level the surface, the tooth, with beveled end down, being less liable to injure young plants when smoothing over corn, potatoe etc. For very close work other tooth can be quickly removed.

THE "NEW DEAL" DOUBLE FURROW PLOUGH. Fitted with Steel Shares, Discs, Scales and Breast, and Wrought Feet.

MU 16.

The "NEW DEAL" Double Furrow Gang Plough is more desirable for all general purposes than the Single Furrow, one extra horse only being required, and will plough 8 to 4 acres per day, and is the most economical Plough that a farmer can use.

Cut 10in. each Furrow.
Approximate weight 480 lbs.
Price, £10 10/-, with Knife Coulter.
Disc Coulters, 20/- each extra.
Subsoil Attachment, £2.
Seat Attachment, £3.

To Messrs. F. Lassetter and Co., Ltd., Sydney.

Dear Sirs,—I have much pleasure in stating that the John Deere's "New Deal" Double Furrow Plough, which I purchased from you some three years ago, has given ever satisfaction. My man ploughs some three acres a day with it, and yet finds time to milk eight cows morning and evening. It is the simplest and most ingenious labour saving machine that I have ever seen. The plough has been in constant use during three years, and has cost nothing for repairs, with the exception of relaying the shares, which our local smith can do.—Yours faithfully,

Penrith.

Messrs. F. Lassetter and Co., Ltd., Sydney.

Dear Sirs,—The Plough is doing splendid work. I had it ploughing in ground so hard that the bullocks bent the draw bar but still the plough stopped in the ground.—Yours faithfully,

Emu Creek, Walcha.

Specially Designed for General Requirements.

These Two-Furrow Ploughs are similar in construction and are suitable for the same class of work as the Ploughs of the S.M. series, being fitted with steering levers and movable bodies. Complete with Knife Coulters.

EVERYTHING SOLID VALUE

RANSOME, JENNER & CO., LIMITED

Ransome's Double-Furrow Steel Plough.

"Planet,"

Average

Weight,

262 lbs.

£9 5.-

This Double Furrow Plough, which is made entirely of best steel, has great clearance under the beams, to ensure perfect freedom from choking when ploughing in tall weeds, meale stalks, etc.

The Shares and Breasts are made of high class steel of great durability, and the latter are of good turning capacity. The leverage for putting the plough in and out of work and regulating the depth of ploughing, is simple, easy and effective, and the depth of the work can be varied by the lever whilst the plough is in motion.

The wheels, which have renewable centres, are practically dust-proof.

A carrying wheel is sent with the plough, which should be attached as shown in illustration when transporting the Plough from one place to another, to prevent wear on the slade.

A simple steerage, by which the draught can be moved to the right or left and rigidly held in any position, can be supplied for hillside work at a slight extra cost.

Ransome's Strong Two-Furrow Ploughs.

Fitted with Governor Steerage.

MU 18.

These Ploughs are adapted for the strongest work on stony soil. They are made entirely of wrought iron, are fitted with friction wheel to reduce the draught, and with large land and furrow wheels. The land wheel has a long lever for regulating the depth and raising the Plough out of work, and the furrow wheel is furnished with a steerage lever. They can be fitted with ordinary coulters, or, when required for ploughing grass or soil with much herbage, with

wheel or disc coulters as shown. The furrows can be adjusted to different widths, viz., from 9 to 14 in. wide and 4 to 6 in. deep. A special colonial steering apparatus, when desired, is attached to these Ploughs, which ensures the straightness and uniformity of the furrows and enables the ploughman to take out any short bends or other irregularities in the work with greater ease than by the handles.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

MU 19.

On the large wheat farms of the North-west and of the Pacific Slope, there is a demand for a Plough that will turn more land than the ordinary single or double furrow Plough. The principles upon which the New Deal is constructed are applicable to a gang of almost any number of Ploughs. These Ploughs have attained unqualified success, and are the leading large Gang Ploughs of the trade. It requires but little more labour to handle them than it does to handle the two furrow Plough. Each of these Ploughs, in addition to the regular equipment of the New Deal, is provided with a landing device by means of which the clevis can be changed and the landing of the Plough

changed accordingly, while the team is in motion. The Ploughs are handled by a single lever. There is little chance of comparison between these Ploughs and similar Ploughs of other makes, for our New Deals are so much lighter in weight and draught, and so much more easily handled, that comparison is not necessary.

The "New Deal" Three-Furrow is fitted with Steel Beam, Steel Breast and Shares, and the price, £12/10/-, includes Knife Coulters, Disc Coulters (20/- each extra if required). This Plough can be fitted with a Seat attachment, £2/10/- extra.

MU 21.

2, 3, and 4-Furrow Disc Ploughs.

We have pleasure in drawing your attention to the new Disc Ploughs which we have had specially designed and built to our own order by Messrs. Ransomes, Sims, and Jefferies.

These Ploughs are manufactured throughout from the very best materials, the best steel only being used for the beams and other parts subjected to great strain, thus combining the qualities of great strength, light weight and easy draught.

Two special features are the set of Discs and the general construction of the plough, which enables it to penetrate any land.

The steering gear is of the most perfect character. The furrow and hind wheels are coupled by connecting rods and both wheels are controlled by a lever which enables the driver to steer the Plough quickly in either direction or hold both the wheels rigid in work

By this arrangement the Plough can also be turned at the ends to the right or left hand, but it should always be turned to the left if possible.

The width of the furrows can be adjusted by sliding the Disc bodies on the beams, and moving the furrow wheel in or out to correspond. No bolts have to be removed to effect this operation. Prices as follow:—

Two-Furrow Disc Ploughs, with 4 flat steel beams, main beams and stay 3 x 1½, arms for carrying disc bodies, 4 flat steel 3 x 1½, bodies adjustable by staple from 8 to 10in. cut. The Tyres of wheels are 2½in. wide, with approximate weight:—

	wt. gr. lb.

No. 69/8.—1½-storey 8-frame DOVETAILED HIVE, for ex-racted honey. Includes bottom, cover, and body, with 8 Hoffman full depth frames, and division board; 1 super, with 8 shallow Hoffman frames and follower, including nails, foundation starters for both sets of frames per hive, 10/8

No. 66/8.—2-storey 8-frame DOVETAILED HIVE, complete, for extractor. Includes bottom and cover, 2 bodies, with 16 Hoffman frames and 2 division boards, nails, foundation starters for frames per hive, 11/6

HEAVY FRAME HIVES

No. 610.—1-storey DOVETAILED HIVE. Complete with frames, cover, and bottom board, per hive 8/6

No. 64/10.—1½-storey DOVETAILED HIVE. Fittings same as No. 64/8, with the addition of the extra frames, sections, holders, separators, etc., necessary to complete a 10-frame hive per hive 10/8

No. 69/10.—1½-storey 10-frame DOVETAILED HIVE. Fittings same as No. 69/8, with the addition of the extra frames, etc., necessary to complete a 10-frame hive per hive, 12/6

No. 66/10.—2-storey 10-frame DOVETAILED HIVE. Fittings same as No. 66/8, with the addition of the extra frames necessary to make a 10-frame hive complete per hive, 14/6

All Hives are fitted with Excelsior or Gable Covers and DANZY or Combined Bottom Boards unless otherwise ordered. If Hives are set up add 1/- per Hive.

Honey Boxes, etc., per pair, as ordered unless specially ordered.

When ordering, it will only be necessary to quote the number of the hive as given above. If, however, the number or description of the hive required is not given, we shall conclude that the selection is left to our judgment, and shall send what we consider the best combination.

NOTE.—The No. 64/8 and 64/10 hives we furnish with 4½ in. beeway sections, 4½ in. square plain section, or the 3½ x 5 x 1½ in. plain section, as required. The Nos. 69/8 and 69/10 hive can be supplied with either the 4½ or 5½ in. shallow extracting frame in the super, as required. Please state which kind you prefer.

Bradley One Horse Corn Drills.

MU 2.

PRESSER-WHEEL ONE
HORSE CORN DRILL
No. 2 £5 10/-

The Bradley Presser-Wheel One Horse Corn Drill, No. 3.

Price, £8/10/-.

The distinction above made between No. 2 and No. 3 consists in having or not having the Fertiliser attachment. This attachment can be quickly and easily taken off or put on, without in any way interfering with the seed planting mechanism, so that a No. 3 can be changed to a No. 2 or vice versa. We give them these numbers to prevent mistakes in ordering.

They have an opening runner. It opens a furrow into which the corn and fertiliser are deposited and then covered by a presser-wheel.

Four seed plates are furnished—one drops the corn 11 inches, another 14 inches, and a third one 17 inches apart. The fourth plate is a blank, which can be drilled to plant peas, beans, Kaffir corn, cane seed, etc.

Corn can be drilled with the No. 3 without removing fertiliser box, but it is better to take it off if any great amount of corn is to be put in without fertiliser.

The Corn box or the Fertiliser box can be thrown out of or into gear whenever it is desired to stop or start them.

MU 24

Planet Jn. Farm and Garden Tools.

FIRE FLY GARDEN PLOUGH. PRICE 12/6.

This Tool is exceedingly useful to owners of small gardens. It will throw a furrow four to six inches wide, and one to three inches deep. Furrows for manure or seeds can be opened and covered. In cultivating, plough away weed and plough back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden.

Chicken Raisers find it of great advantage in ploughing up their scratching yards.

The Daisy
All Steel
Cultivator

This tool is one of the latest imported Horse Hoes, and is fitted with lever wheel depth regulator and outside handle braces. It has never been possible to regulate the depth of these tools perfectly until this wheel depth regulator was made. It can be set at any depth simultaneously with the front wheel by the wheel lever. It will make the cultivator run more steadily, and can be gauged to a nicety instantly while in motion. This rear wheel depth regulator will relieve the operator from all strain in holding cultivator from running too deep. It is used also for transport

ing from field to field without lifting the cultivator. The lever wheel enables the operator to change its depth in a moment and while in motion, and to turn easily at the end of the row, by the lever expander the width can also be changed instantly. The outside handle braces make the cultivator very solid and rigid. This rigidity is maintained while the tool is being expanded or contracted.

MU 30—PLANET JR. No. 72 Two-Row Pivot Wheel Riding Cultivator, Plow, Furrower and Ridger.

Corn and potato growers should first give attention to the implement they see above. It is the greatest labor-saving tool of the century. Its use means two rows cultivated at one passage, and it matters not whether the rows are straight or crooked, wide or narrow, regular or irregular in width. Think of the saving made in cultivating perfect, two rows of corn, potatoes or beans, at any crop planted in rows not over 34 inches apart at a single passage. This means double speed at single cost; and the arrangement of the fourteen teeth is such that all the ground is well tilled and the open furrows are left next to the crop. Price, £16/10/.

This new member of the 'Planet' family is very carefully designed, and is once simple, strong and effective, and under perfect control.

Extension for sides, £2/10/- extra
Two Horse £14

MU 30

MU 31A—PLANE JR. ORCHARD and UNIVERSAL CULTIVATOR.

Price, with Extensions, £14.

MU 31

MU 31—The Planet Junr. Riding Harrow and Cultivator.

The wheels are heavy and strong, 24 in. tread, 36 in. high, carried on a bent axle, to which the tongue is securely attached and braced. The Frame.—This is made of two bars of flat steel, 2 in. x 1/2 in., securely fastened together in truss form. The Seat is adjustable back or forward. The teeth are 16 in. long and 2 1/2 in. wide, with heavy steel standards, adjustable quickly by loosening a simple clevis. Depth.—This is instantly changed from a mere touching to the points of the teeth to almost any pressure, by a single lever within easy reach of the driver, combined with a powerful steel spring, which is connected at its lower end to a small 2-wheel truck, movable on a rack by means of the lever, both front and back of the axle, thus making it easy to use the extra pressure needed on the teeth, and also to raise them as ready for transportation. Extra Attachments.—To make the tool still more useful in orchard cultivation, we furnish strong extensions for the outer ends of the bars, each carrying an extra tooth. The 10 x 2 1/2 in. teeth are the regular equipment, but 24 in. may be used, or a set of scrapers. Any of our harrowing teeth also may be used, carrying three rows 8 to 10 ft. apart, or two rows 2 ft. 3 in. at the passage. The furrowers are adjustable teeth for making straight trenches in the center of two rows up to 10 ft. apart. Or, the total width of cut is 16 ft. 6 in. with extensions on 2 ft.

MU 31A

It is a simple, strong, and easy to use, but so complete in design, and so reliable and efficient, the fullest extent in one tool, incorporating in itself the advantages of our earlier patterns, with important improvements.

The steel wheels are a solid, sturdy enclosure by the frame. The teeth are made of high carbon steel, compact in form, well braced, heavy and strong. Width of the extensions at cut 4 feet in width, having seven stiff steel standards, carrying 2 1/2 x 10 inch teeth. The extensions at cut 6 feet 6 inches, carrying 11 teeth, and the main bar carries 11 teeth, but you width from 24 down to 4 feet.

New Steel Harrow with Folding Teeth.

With Channel Beams

This illustration represents a set of three Harrows folded and packed for transport. In this position they occupy but little space, and no charges for packing are incurred.

These Harrows combine lightness with great strength, and have been specially designed for the Australian trade. The Teeth and Beams are made of solid steel, and the particular construction and advantages of the Harrow will easily be seen from the engraving. They are readily folded for transport, so as to occupy but very little space, and all charge for packing is avoided. Four Beam Harrows, with 5 rows of Teeth and Wood Pommelree, complete.

F H. 54, Three Harrows to the Set, to cover 9½ ft., for 2 horses. Weight 184 lbs. £6/5/

New Steel Solid Frame Harrows.

MU 34.

These New Harrows are made with Steel Teeth, secured to the frame by nuts which are locked, so that they can never shake loose. The teeth are set at equal distances, and each tooth cuts a separate uniform track. Although the teeth are so securely fixed in the frame, there is, however, no difficulty in removing them for renewal or repair. These Harrows are very

durable, and thoroughly adapted for every description of work.

Four Beam Harrows, with 5 rows of Teeth, and Wood Pommelree, complete.

SH 54.—Three Harrows to the set, to cover 9½ feet, for 2 horses. Weight, 195 lbs. £5/10 -.

The Zig-Zag Steel Lever Harrow.

With 4in Teeth.

Covers 10 ft.

In Pairs, £25/5 -; weight, 272 lbs.

Sets of Three, £37/17/6.

Weight, 424 lbs.

Covers 15 ft

The above can be supplied in Single Harrows at £2.12/6.

MU 35

This is another new and important improvement in Steel Harrows. It may be seen by the illustration that in the construction of this Harrow the threaded tooth with a top nut has been dispensed with, and in its place a simple, strong clamp device is used, holding the square tooth firmly in its place, easily released, and admitting of adjustment for depth or for turning the tooth, so that different edges may be presented, thus insuring a keen cutting edge and

uniform wear. The bars, of channel steel, are set in collars at either end, giving a short leverage to the resistance of the tooth and a consequent light strain upon the frame. The range of the lever is sufficient to give the teeth any angle, from a slight pitch forward, backward to a horizontal position for transportation. The coupling or running rods are all upon the top of the frame, giving perfect clearance underneath with no tendency to gather trash.

MU 40.

1. Simplest and Strongest Cultivator in the Market, and with Fewest Parts.

This Cultivator has been specially designed throughout. It has ONE steel "through" axle, of very strong section, and ONE lever for raising and depressing the tines.

2. Strong Steel Wheels, with Renewable Centres.

The wheels are of steel (much more durable than wood), and the centres are made in such a way that when worn they can be taken out and replaced by new ones, thus making them equal to new.

3. Front Swivel Wheel.

A Swivel Wheel is attached to a short pole, and takes all the weight off the horses. In some districts this is considered an improvement on the POLE system, and it is given with no other Cultivator. A pole can, however, be fitted if desired.

4. Hinged Sectional Frames.

The Tines are carried by 4 frames, which are hinged in front. The tines are thus free to follow all irregularities of the soil.

5. Reversible Steel Points.

When one end of the steel points is worn, they can be turned round, and the other end used. The points are made with ribs on each side to strengthen them, and require ONE bolt ONLY to fix them. Patent chilled cast points are also supplied, and answer well on most farms. Hoes, 54 inches wide, can be supplied to cut all the land, and are suitable for fair working land which is not hard baked.

6. Spring Steel Tines.

The Tines are patented, and of taper spring steel, which no other maker can use. They can be moved sideways, and set with more or less pitch. Spira, instead of flat pressure springs are employed, giving greater freedom in work.

7. Pressure and Depth of Work.

The pressure can be varied at pleasure to work either shallow or deep. As this is a strong machine, it will work on harder land, and at a greater depth than others.

8. Tines are Adjustable.

The Tines can be moved sideways, and can be set with more or less pitch. On very foul land some of the tines can be removed to prevent clogging.

9. Advantage over Old Cultivators.

Having spring curved tines on hinged sectional frames, the action of this implement on the soil is much greater than with solid frames and solid tines. The soil and weeds are lifted and shaken, and there is all the difference between working DEAD and being ALL ALIVE. All the weeds are brought to the surface and killed, and the soil is thoroughly aired and sunned.

10. Finishes at Nothing.

The "Lipswich" Steel Cultivator will face the hardest baked soil, and even roadways will not stop or injure it; it goes through all alike.

11. The Farmer's Friend.

This Cultivator has been pronounced one of the most valuable labor-saving implements of the day. The difficulty is not in saying what it WILL do, but what it WILL NOT do.

Plano stands for all that is desirable in harvesting machinery. "Plano" means light running. This feature is indisputably an important one, and has always been characteristic of the Plano products. "Plano" also means durability. No farmer wants a machine that is going to wear out in a single season, and so this feature is never overlooked by prospective purchasers. A machine must last, and in this respect the record of the Plano is irreproachable. And again, "Plano" means ease and entire satisfaction in operating. The Plano machine is convenient to operate, requires little attention, few repairs, and in every way is a "dandy to run"—such a machine is the one to buy. When a machine is light running, durable, and properly designed, besides being convenient to

operate, the acme of perfection has indeed been obtained. Plano binders, mowers, reapers, rakes, knife grinders, and attachments embody these desirable features and commend themselves to particular farmers all over the world. In a word, "Plano" means "perfection."

(COPY.)

Wagga Experimental Farm,
Bomen, 10th October, 1906

To Messrs. F. Lassetter and Co., Ltd.,
George Street Sydney.

Dear Sirs,—In reply to yours of the 7th instant, No. D., I beg to state that I purchased the first Plano Reaper and Binder from you for the harvest of 1900, and another machine was obtained in 1908. They have been used for cutting very heavy crops, including wheat and hay yielding up to 4 tons per acre, and the machine first obtained has also been regularly used for cutting sorghum.

Their work has been of the most satisfactory character wherever we have used them.

The Plano is to be commended for its strength and simplicity of construction, and strong evidence of these qualities is given in the fact that notwithstanding the heavy work our machines have done, the cost of repairs to each has averaged only £2 11s. 8d. per annum.

Yours faithfully,

(Signed) G MAURICE McKEOWN,
Manager.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

The "Plano" Junior Vertical Mower

MU 43.

Small fields, parks and lawns can be most expeditiously and satisfactorily mowed with the Plano Junior Vertical Mower. In design and construction it follows exactly the larger machines. The extreme simplicity and ease with which it is handled make it a universal favorite. The vertical lift feature is especially desirable with this one-horse machine. The Plano Junior is equipped with various adjustments which makes it possible to cut lawn grass or roadside weeds

3½ feet. Price, £13.

MU 44.—PLANO VERTICAL MOWERS.
Two Horse.

The Plano Vertical Mower is constructed for use on farms or stations and is well proportioned and perfectly balanced and is the simplest mower constructed. All the important features which have been so prominent in making the Plano Mower the acme of perfection. The extra large steel sustaining spring amply balances the weight of the cutter bar and keeps it from dragging too heavily on the ground when cutting and makes it extremely easy to raise. The wheels on the regular vertical mower are 32in. high and the frame 44in. wide. These machines are specially built and designed to our own order to suit colonial requirements after most severe and practical field trials in all conditions. Prices are as follows:—

4ft. 6in. cut £18/-
5ft. cut £18 10/-

MU 44

We supply with these machines one knife on the machine, and one extra knife.

Reaper Attachment can be supplied for these machines at any time, at £6 and £4/10/- respectively.

On application, we will be pleased to post free of charge a most descriptive catalogue of the Plano machine of 20 pages.

MU 46.

THE PLANO MOWER WITH REAPING ATTACHMENT

The Plano Reaping Attachment affords a most economical machine for farmers who have only a little grain to harvest. It can be quickly attached to any of the Plano mowers, 4 or 5 foot cuts. The Reaping Attachment consists of a strong adjustable carrying platform and a grain divider, which are fastened to the cutter-bar, an extra seat for the operator and a hand rake. The extra seat is placed directly over the drive wheel next to the cutter-bar, so that the operator is convenient to his work. He has a foot trip by which the platform is dropped and the gravel allowed

to slide off to the ground. The Reaping Attachment is so perfectly designed, that with a well-trained team it may be operated with one man, but usually it has been found that two men, or a man and a boy, can operate the attachment to the best advantage. This Reaping attachment is provided with a centre guide on the cutter-bar, which prevents the rake from being caught in the knife. After a little practice the operator can leave the gavels in as convenient shape for binding as does a regular reaper. He can gauge the size according to his wishes and deposit his gavels when he pleases. In ordering it is necessary to specify the size of the machine, and to state whether it is for a vertical lift or a chain drive mower

CHEAPSIDE, SYDNEY

UNIVERSAL PROVIDERS.

PLANO

The "Plano" Sickle Grinder (MU 47)

is the simplest and only reliable Grinder in use.

It can be operated by the most inexperienced. All the farmer has to do is to adjust the sickle to the Grinder, turn the crank, and the machine does the rest. A sustaining spring carries the entire weight of the emery wheel in its upward movement. It is self-aligning on the sections. The emery wheel is given a high speed with a rapid vibrating movement the whole length of the section, which prevents the possibility of heating the knife. It is adjustable to a thick or thin bar, or any size sickle head, and will grind a short or long section with equal facility.

A unique feature of the Plano Grinder is the ease with which the grinding stone can be changed; only the removal of two cotters is necessary. It can be done in a minute, and the machine is converted into a stationary Grinder. This change affords the user of the Plano Grinder an advantage not found in any other similar machine, viz., he can transform it into a machine for general use, such as the sharpening of fine tools, scythes, axes, household cutlery, etc., thus making the Plano Grinder not only a necessity at harvest time, but a useful article in the tool-house or kitchen the year round. A special emery wheel is furnished for this change.

MU 47.

The Plano Sickle Grinder ready for Business.

Price, £1.

The "Rapid" Section Remover

MU 48.

There is a little tool called the "Rapid." It is for removing broken or damaged teeth from harvester blades. It does this quickly and well, and it is impossible for you to bend or injure the knife back. This "Rapid" section remover enables you to get on with your work quickly. It's worth having, for it will save you pounds in loss of time. They are cheap.

Price, as illustrated with Hand Tool and Punch 22/6 Hammer extra.

F. LASSETTER & CO., LIMITED

The "Plano"

Adjustable Hay Rake

Built of Special High Carbon Steel and Malleable Iron.

MAJ 50.

The setting lever of the "Plano" Rake affords instant adjustability for meeting all the varying conditions of the field or size of horse. Another feature of the "Plano" is an oil tempered cushion spring, which prevents jar, shock, or noise when dumping the rake; a bell-shaped axle shield which precludes the possibility of winding hay around the axle, as is so common with other rakes; its substantial, durable, steel wheels, with a wide channel tyre and strong spokes, more thickly and rigidly set than on other

rakes. It has more teeth to the foot than any other rake, which are strong and flexible, and will not break; it has an adjustable seat; longer and stronger shafts than the ordinary rake; it has a powerful rigid frame, which cannot bend or break. To put it briefly, the "Plano" Rake is the *no plus ultra* of perfection, and is without an equal. Like the binder and mower of similar make, it is an up-to-date implement, and highly suited to the requirements of New South Wales farmers.

Size 8 foot.

Price, £8 8s.

Lassetters' have the most complete Stock of Farm Machinery, if you don't see what you want write for full particulars of any Machine made, we can supply.

Ransome's "Through-Axle" Rakes

MU 61.

These rakes have a solid "through" axle. The teeth are of steel of "T" section, and can be taken out and replaced with the greatest ease.

The road wheels have detachable centres, which when worn can be quickly renewed at a small cost, thus making the wheel as good as new. These centres are of ample length to ensure durability and steadiness. Dirt is carefully excluded, and a covered oil-hole is provided.

The "Through Axle" rakes are always fitted with a seat, as shown, and also with a hand lever. The leverage is very light, and can be worked by a lad from the seat, or when walking behind the rake.

Size of Teeth	Mark	No. of Teeth	Height of Wheels	Width outside wheels	Average Weight	Price

F. LASSETTER & Co., Limited

Some advantages of the "Victoria" Oil Engines.

1. **Extreme Simplicity** is one of the leading features, combined with efficiency, and they will be unsurpassed in this respect by any other maker. All parts are made accurately to gauge, and thus ordinary renewals or repairs can be easily and quickly executed. The exceeding simplicity of our engines renders them the ideal engine for farm and colonial work. There are no pumps, no continuous burning lamp, no electrical battery, no innumerable parts.

2. **Great Economy** in oil consumption, being in strict accordance with the work done.

3. **Quickly Started** in about 5 minutes after lighting lamp.

4. **Little Attention Required.** Practically no attention is required after starting, except for oiling once or twice during the day.

5. **Cleanliness.** No coke, coal, ashes or smoke. No chimney, boiler, or exposed flame, and no objectionable smell.

6. **Safety.** Are entirely safe, the oil being contained underneath the engine, away from any flame, and only drawn up as required. No dangerous spirit is used, no exposed flame or continuous burning lamp.

7. **Continuous Running** is specially provided for, the engine being entirely automatic in action and the oil supply tank of sufficient capacity for a lengthy run at full load.

8. **Automatic Ignition**, without lamp after starting and no magneto or electric battery.

9. **Adaptability.** They can be used for almost every purpose where motive power is required and to mention their various uses would occupy too much space here.

10. **Perfect Governing** is obtained by the very simple and efficient governor, the oil supply being cut off automatically when no explosion is required. In addition to this, provision is made for regulating the supply of oil for each charge independent of the governor.

Mills and Crushers

MU 75

New Maize Mill (MU 75).

MM1. Price, £4.13/-.

The Roller is made of solid steel and case hardened, special machinery being used to ensure a keen and perfectly true cutting edge. The Cutting Plate is made of very hard White Pig Metal, and the bottom cutting edge is ground sharp and true, so that it lies parallel with the roller, thus producing a fine and even sample.

The Feed is regulated by a lever and screw.

Maize can be ground sufficiently fine for all feeding purposes; and by passing it through a second time it can be reduced to meal.

Oats can also be crushed without change of cutting plate or roller. Beans can be kibbled if perfectly dry, for which a special cutting plate is required.

Capacity, 3 to 4 bushels per hour.

MU 76.

MU 76.—IMPROVED MALT AND OAT MILLS, specially designed to suit Colonial requirements.

This machine will not crush corn—but for Oats only.

Bone, Shell and Corn Mill

"THE LASSETTER."! ALONSO

MU 80.

It is a well-known fact that bone meal, ground shells, cracked corn, etc., are excellent for poultry. This mill is especially adapted to grinding bones (when dry only), shells, corn, roots, bark, grain, chicken feed, etc. When it is considered that bone meal is one of the best fertilisers, it will soon pay for itself for that purpose alone. It is a good general mill for farmers, poultrymen, etc., and for compactness, strength, and durability, we regard it as unexcelled. This mill is not intended for grinding green bone.

Capacity—1½ bushels of corn per hour.

Price, £1/12/6.

Drilling Machines

(MU 90)

NO. 12 UPRIGHT WALL-DRILLING MACHINES
For Hand-power, Fast and Slow Speed. Self-feed.

The automatic feeding device of this machine is new and simple, yet efficient and positive. It is located at the back of the spindle and is worked by a cam on inside of main gear wheel. This cam is constructed so as to give nearly a continuous feed. By this arrangement the drill does not jamb into the work, as is frequently the case in the use of hand drills. The lower column is in nice alignment with the drill spindle and the table is at right angles with it. These points tend to lessen friction in the use of the drill and assure light draught. They also lessen the breakage of drill bits.

MU 90—No. 12.

Price, £3/7 6.

(MU 91)

NO. 13 UPRIGHT WALL-DRILLING MACHINES
For Hand-power, Fast and Slow Speed. Self-feed.

The general design of this drill is the same as No. 12, with the exception of the intermediate gear wheel introduced to change the direction (from the operator) on both speeds. The drill is also somewhat heavier which adapts it for larger works.

Earth Scoops

The "Columbus" Solid Steel Drag Scraper

MU 96.

MU 95.

Columbus Earth Scoop, showing runners on the Bottom.

The "Columbus" (MU 96) Solid Steel Drag Scraper

The perfect scraper, made of a single sheet of steel pressed into the best and most practicable shape for working, it is made with one continuous curve from the centre up the sides and back, giving it greater strength and capacity than can be obtained in any other way.

It is without joint or seam, and there is not a sharp corner, bolt, brace, or stay-rod about the scraper. It will work in any kind of soil, whether ploughed or not, and enters the ground as readily as a plough. We guarantee it to fill easier and clean better than any other scraper, and it will scour where no other scraper will. It is not injured by exposure to the weather, and there is nothing about it to get out of order.

The handles will commend themselves to everyone, as they can, if broken, be easily replaced anywhere. Bails of steel, and of improved pattern, with strong and perfect working swivels. The best bails ever put on scrapers. The entire bowl of the scraper is made of one sheet of heavy steel, and is the only one so made.

It is the lightest, strongest, and most durable, and will displace all others wherever it is known. Improved, in that we now make the scraper longer and deeper, so that, while it carries more earth, at the same time it runs much easier and has more wearing surface.

The "Little Giant" Wheel Scraper (MU 99)

MU 99.

With "Sarven" Patent Wood Wheels.

Price, £16/18/-.

In carrying position showing end gate detached

End gates always furnished with the scrapers

The Wheels are 31in. diameter and 36in. tread

The great success of our Solid Steel Drag Scraper has led us to make a Wheel Scraper having bowl of same shape, meeting the demand for a wheel scraper lighter, stronger, and cheaper than heretofore made. The lifting apparatus is entirely new, and so constructed that the team does the greater part of the work of lifting and dumping.

The end gate is simple in construction, automatic in action, and cannot get out of order, and the only one ever made that operates perfectly under any conditions. By its use the load may be hauled up and

down hill and over the roughest roads without loss. It is pronounced by all who have seen it the greatest improvement ever made in wheel scrapers.

The entire scraper is of wrought metal, steel and iron; no wood parts to rot or castings to break, and instead of the cheap wood hub wheels used on other wheel scrapers, the celebrated "Sarven" Patent Wheels, which are the strongest and most durable wheels made. It will stand exposure to the weather and the hardest usage without injury, and will work and scour where no other scraper will.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Drawing of Portable Engine driving a Centrifugal Pump

Price and Particulars of Steam and Oil Engines, Boilers, and Steam Pumps on Application.

If favoured with an order for pump, will you kindly inform us the quantity of water required per hour, and the distance and elevation, if any, the water has to be forced. If pumping from a well please state depth; if from a river or creek please state elevation and distance you require the water forced.

When ordering windmill please state the quantity of water you require per day, elevation and distance water has to be forced, if any. If pumping from a well please state depth; if from a creek or river, we will require to know elevation and distance you require water forced, as the efficient working of the windmill depends on its receiving wind from every quarter. We always advise our customers to erect the mill away from buildings or trees or any obstacle that will obstruct the mill receiving the wind from every quarter.

STEAM PUMPS: When making inquiries for steam pumps kindly inform us the following:—

- (1). Quantity of water you require delivered per hour.
- (2). Whether pumping from a well or river, if from well please state depth; if from a river elevation if any; and distance you require water forced.
- (3). No pump will lift more than 25 feet vertical, although the pump may be 50 or 200 feet away from the water or more providing the vertical lift does not exceed 25 feet.

EVERYTHING SOLID VALUE

Well Pump

Prices and Particulars of all classes
of Pumps on application.

Please state quantity of Water re-
quired, per hour or day.

If a well is 50ft. you will require
the following fittings:—

50ft. Pipe,

25ft. Rod to Handle over Surface,

1 Pump,

1 Bottom Valve,

2 Rod Joints,

2 Roller Guides to keep rod
in position

All Pipes measured inside.

This cut will explain how to fit up
a pump, for any well over 25ft. deep.
The Pump is secured to a plank
down the well within 20 or 25ft. of
the bottom, and connected to handle
at surface by rods. A tap or ordinary
pipe bend can be fixed on pipe, or
the water can be forced into a tank
or any direction required.

Manufactured specially for us.

THE MAST FOOS.

24 ft. \$18

10 ft. \$19

12 ft. \$27/10/-

Tower and Pump Extra.

MU 101.

The above cut represents the latest improved and most advantageous construction of a gearing to utilise the power of a wind wheel, and convert it in the best possible way to the operation of pumping and forcing water evenly under extremely high pressure.

In building the windmill we use a wheel constructed entirely of steel and iron, and built upon a plan adopted after years of scientific experimenting and close study of the action of wind currents on

surfaces of varying curves and angles, at rest and in motion. The result is a wheel of which each section contains a combination of a curved and spiral surface, so combined as to secure the greatest supporting strength and to present the best possible angle to the wind current, thus securing the maximum of power for a given sized wheel.

The buckets or sails are supported by Two sets of arms or spokes, and are secured together with stay rods to a truss which unites them into a strong and symmetrical wheel. The hub is clamped to the main shaft with a heavy bolt, and secured by the use of two set screws provided with lock nuts. The hub is hollow and projects back over the bearing in which the main shaft runs, bringing the weight of the wheel squarely over the supporting box of the main shaft, preventing any down sag of the wheel or uneven wear of the boxes.

The gearing or turntable is supported on steel rollers, located on top of a bed plate, which permits the greatest freedom of motion to the wheel to face the wind current

MU 102.

The governing device of the Back Geared Iron Turbine Windmill is very simple. The wheel is what is known as the solid or rosette wheel, and is held to the wind by the weight of the vane, which is supported by a brace rod, connected to which is a chain passing round a groove in an eccentric-shaped casting at the top of the mill.

In a light wind, the wheel, which is set a little to one side of the centre of the turntable, faces the wind squarely, but as the wind increases in velocity, it is forced back to an angle nearer in line with the vane. This tendency is counteracted by the weight of the vane acting on a gradually increasing leverage produced by the shape and position of the eccentric casting around which the vane chain passes. So it will be seen that to secure any speed at which it is

MU 103.

desired to run the wheel it is only necessary to adjust the position of the eccentric casting with reference to increasing or decreasing the leverage with which the weight of the vane acts.

The gearing on the Back Geared Iron Turbine Windmill consists of the internal gear and pinion. The latter is on the inner end of the main shaft, and acts upon the large gear wheel, to which is attached the wrist pin, which, in turn drives the

EVERYTHING SOLID VALUE

F. LASSETTER & CO., LIMITED

MU 104.

pitman of the windmill. This internal gear is devised so as to avoid the back lash common in spur gears, and by its use a normal speed is given to the pump, while the wheel is allowed to reach its maximum of power, the wheel making two revolutions to each stroke of the pump, more than doubling the power of the wheel on any given length of stroke.

Another advantage of a powerful windmill, operated on a long stroke, is that of throwing the wear over a larger surface of the cylinder and decreasing the valve action. It increases the life and utility of the pump as well as furnishing a better supply of water during a season of light winds.

The Imperial Steel Derrick

Is constructed in a most thorough and substantial manner. It is made in sections of 10 ft. each with cross girt every 5 ft., with corner irons and four bolts at each junction of girt and corner post, and is thoroughly braced; and, as shown in the cut, has a permanent ladder extending down the centre of one side of the structure.

These derricks can readily be erected from the ground up, putting on a section at a time, or may be put together on the ground and raised afterwards as is customary with other makes of derricks. Price, £10/10/-.

Angle Steel Derricks

Specially constructed for Mast Foss Windmills.

For 12ft. Mill, 30ft., £12.

For 24ft. and 10ft. Mill, 30ft., £11/15/-.

A Wood Tower, if preferred, can be built on the spot, and save carriage, as we supply with each Mill a diagram and full particulars for erecting. No skilled mechanic required.

Letter "A" Double Acting Suction and Force Pump "Leviathan"

3½-in. barrel, for 2-in. suction.

750 gallons per hour, 1½-in. delivery.

Price, £8/12/6.

This is the latest design of double action pump, and is strongly and very compactly built. The valves are all in one case at the front, and are very easy of access: this alone makes it vastly superior to the older style of double-action pumps. The valves are of bronze and rubber faced, and we can confidently recommend it as being far and away better than anything of its class on the market.

An improved force pump, having a cylinder surrounded by a water chamber serving to keep the lower valve and piston constantly submerged, and possessing all the advantages of the submerged pump without any of its disadvantages. The interior cylinder is all cast brass, and has a brass valve seat. The stud end of Rod is adapted to be attached to the working bar of a windmill, with which this pump is extensively used. This pump can be placed down a deep well, to within, say, 25 ft. of water, and the pipes and connecting rods attached to any crank or power above to work it, and will be found a very serviceable pump and decidedly effective.

Patent Suction and Force Pump "Selector"

The New Handy Wing Semi-Rotary Pump

With Iron Handle.

These pumps are the simplest, most lasting and economical that can be found, and most serviceable for wells, domestic purposes, watering gardens, spraying fruit trees, for drawing wine, beer, petroleum and all kinds of liquids, hot or cold.

1st.—There is less wear.

2nd.—Less power is needed to raise the same amount of water to the same height.

3rd.—Their wings or valves are stronger, and the internal parts fitted with the utmost care.

The same consists of a perfectly circular casing, in which a strong brass fan or "wing plunger" provided with two clock valves, is oscillated. The casing is closed by a cover fixed to the same by means of 4, 6, or 8 screws, according to the size of the pump, and which may be easily removed in case of any accidental disturbance of the working of the pump.

MU 116.

Mounted on plank with guide rod and air barrel (with brass piston rod). Can be supplied iron or brass barrels. Suitable for deep wells, but capacities calculated to work at a lift of 25 ft., and will force to any distance

	Iron Barrel.

THE "SID" BUCKET SPRAY PUMP

All Brass working parts. With indestructible Bronze Valves. Malleable Iron Combination Foot Rest.

The above cut represents our well known Success Spray Pump, with improved combination foot rest, bucket clamp, and bail holder. Florists, gardeners, fruitgrowers and farmers who wish a durable, convenient Spray Pump at a low cost can find nothing better. This outfit is a most excellent one for ordinary use in gardens, vineyards and orchards, for washing windows and buggies, and for the application of whitewash. Our new combination bucket clamp and foot rest enables the operator to have the pump and bucket clamped together as one outfit, with the bail standing upright in a rigid position. Thus the entire outfit can be carried in one hand - a feature possessed by no other Spray Pump. The Pump has a large air chamber and is double-acting, throwing a continuous stream either solid or in fine spray. It is provided with Bordeaux nozzle, and three feet of discharge hose.

This outfit should be on every farm. No matter what other style of Spray Pump one may possess, there is nothing quite so handy for general purposes. With this outfit the washing of windows and buggies, the watering of flowers, and the application of whitewash, become a pleasure. Its value as a protection against fire should not be overlooked.

"Climax" Spray Pumps

MU 125.

"CLIMAX" SPRAY PUMPS

We particularly wish to draw your attention to this illustration showing the "Climax" Pump mounted on a cask, after the legs have been unbolted and removed. It also shows the Automatic Agitator used in connection with Nos. 1, 2, 3, and 4 Pumps. It is easily adjusted to the top of the cask (as shown in the cut), and works automatically with every motion of the pump handle.

With this Agitator the liquids in the cask are stirred with each stroke of the Pump, and the first spray is as well mixed as the last that come from the cask. Its importance is plainly manifest.

We do not supply the Agitator unless specially ordered. Price 7/6 extra.

Empty oil casks, which are very suitable for mounting the Pump on, we can supply at 5/6 each

No. 1.—£3/7/6. Cask extra.

Is fitted with a cylinder 1½ in. diameter, 5 in. stroke, one length 12½ ft. ½-in. delivery hose, suction hose, and one Nozzle. Any other nozzles to the same value illustrated in this catalogue will be substituted if preferred. The Pump has two discharge orifices. Pump only, without Hose, Nozzle, or Fittings, 50/-.

No. 2.—£4/5/- Cask extra.

Is fitted with a cylinder 1½ in. diameter, 5 in. stroke, one length 12½ ft. ½-in. delivery hose, suction hose, and one Nozzle. Any other nozzle to the same value illustrated in this catalogue will be substituted, if preferred. The Pump has two discharge orifices. Pump only, without Hose, Nozzle, or Fittings, £3/7/6.

No. 3.—£6. Cask extra.

Is fitted with a cylinder 2 in. diameter, 5 in. stroke, two lengths each 12½ ft. ½-in. delivery hose, suction hose, and two Nozzles. Any other nozzles to the same value illustrated in this catalogue will be substituted if preferred.

Pump only, without Hose, Nozzles, or Fittings, £4/5/-.

No. 4.—£7. Cask extra.

Is fitted with a cylinder 2½ in. diameter, 5 in. stroke, fittings same as No. 3.

Pump only, without Hose, Nozzles, or Fittings, £5/-.

MU 126.

INDEPENDENT REVOLVING AGITATOR.

The Independent Revolving Agitator offers advantages over anything yet devised. Power is transmitted through a small pair of Bevel gears to a paddle wheel, comprising four arms set at such an angle that as the wheel revolves the liquid is carried both around and upwards in the barrel, thus insuring thorough agitation of the entire contents of the barrel.

Revolving Agitator only, 30/-.

UNIVERSAL PROVIDERS.

Spray Pumps.

MU 127.

GOULD'S "KEROWATER."

For Emulsifying and Spraying Kerosene and Water.
(Patented March 7, 1899.)

SIZES, PRICES, ETC.

Pump only.—Plunger 2in. diameter, 4in. stroke,
1 in. hose discharge.

Price, £2.

Outfit A, for Single Spray.—"Kerowater," with one
lead 12ft., 1/2in. discharge hose, with "Seneca" or
"Vermorel" Spray Nozzle. Mounted in barrel and
supplied with double shut-off.

Price, £2/15.

Outfit B, for Double Spray.—"Kerowater," with
two lead 12ft., 1/2in. discharge hose, with "Seneca"
or "Vermorel" Spray Nozzle. Mounted in barrel,
and supplied with double shut-off.

Price, £3.

The "Kerowater" is the most efficient apparatus
for mixing and spraying kerosene and water on the
market. It consists of a combination of two Pumps,
one for water, and one for oil, an inner tank for
kerosene and a barrel for water. The oil Pump is
contained within the oil tank, which partly surrounds
the water Pump. Both Pumps and the oil tank are
contained within the water barrel.

It is constructed upon an entirely different principle
from any similar apparatus now used. Instead of
mixing the oil and water at the suction, which cannot
accurately be controlled, we make the emulsion at the
discharge. The two Pumps, each independent of the
other, are operated by a common lever. Kerosene is
poured into the oil tank and water into the barrel.
By operating the lever an emulsion is produced which
can be applied where and when required.

MU 128.

"FIGARO" KNAPSACK SPRAY PUMP.

Fitted with indiarubber valves, 2ft. hose, lance,
and "Vermorel" Nozzle. The tank is copper, with
copper air chamber inside.

Price, £2/7/6.

HOW TO OPEN "FIGARO" PUMPS FOR INSPECTION.

Turn the Pump bottom up and remove the six
small screws that hold the valve cap KL in position.
Lift off the cap (possibly it may require force to
remove it, as the pressure of the screws will have
fastened the rubber to the brass). When the cap is
removed the whole of the mechanism of the Pump
is exposed. If the rubber disc and the cone are
sound, then the fault lies with the valve. Look into
the well from which you have removed the cone, and
at the bottom you will notice a piece of brass per-
forated; this is the valve seat F. When in use
the liquid is driven through these holes into the air
chamber; the rubber valve at the back of the seat
prevents the liquid returning into the well, and keeps
up the necessary pressure to make the spray. If the
rubber valve has perished, remove the seat, force the
small brass button at the back of seat through the
hole in the centre of valve, replace everything again
in position, and the pump will be found to be in
perfect working order.

NOTE.—After using, pump about half a gallon
of clean water through the Pump. After using any
mixture containing oil, see that the Pump is left per-
fectly clean, as oil will destroy the rubber valves and
cones. It is better to lubricate the parts of this
machine with tallow or grease—never with oil.

Don't forget that oil destroys rubber.

EVERYTHING SOLID VALUE

C. F. LASSETTER & CO., LIMITED

"Handy" Knapsack Sprayer

MC 128.

"HANDY" KNAPSACK SPRAYER.

For Vineyard, Orchard, or Field Service.

Will be found the best pump of this class upon the market. It is made entirely of brass and copper, with ball valves and metal plunger, all of which are easily accessible.

The discharge is at the bottom, and the Pump can be entirely drained of the liquid. Any leakage of fluid out of the stuffing-box will drip back into the tank. The change from the right to the left hand is simple, and made by disconnecting the bearer link and bringing it over to the jaw provided for it on the other side.

An eye on the top and back of knapsack enables one to suspend it steadily when he wishes to take it off his back. It should be carried on back with the straps crossed in front.

The reservoir is made of heavy copper, and will hold about five gallons of liquid.

SIZE, PRICE, ETC.

Complete as shown in cut, with 3½ ft. of ½ in. discharge hose, "Vermorel" Nozzle and lance for degroger. £3/18/6.

Formulas

Poison Insecticides or Arsenites.

(For Insects that Chew.)

PARIS GREEN.

Paris Green	1 lb.
Water	150-300 gals.
Quick Lime	2 to 3 lbs.

The usual strength for a summer spraying is ½ lb per barrel (about 45 gallons). Lime should always be added to a Paris Green mixture to avoid burning the foliage. Peaches and Japan Plums are most liable to injury. Stir the mixture frequently when spraying. A common method is to apply the Paris Green in Bordeaux; as for Apple Scab and the Codling Moth. The action of neither is weakened, and the Paris Green loses all its caustic properties.

GREEN ARSENOID, PARAGREEN.

To be used like Paris Green. They are cheaper, remain longer in suspension, and are equally effective. These insecticides deserve to come into general use.

ARSENITE OF LIME.

This insecticide is coming more into popular favor yearly, and is worthy of it. Arsenite of Lime is at least one-half cheaper than Paris Green, is equally efficient, and will not burn the tenderest foliage at the strength ordinarily applied. To make 800 gallons of spraying mixture:—

White Arsenic	2 lbs.
Sal Soda	8 lbs.
Water	3 gals

Boil all together for 15 minutes, or till the arsenic dissolves. One pint of this stock solution, and 2 lbs. of slacked lime, added to a barrel of water, is equal in insecticide value to ½ lb. of Paris Green, and costs half as much. Arsenite of Lime ought to be used more generally in place of Paris Green.

WHITE HELLEBORE AND PYRETHRUM.

Preferably in water, 1oz. to 3 gals.; or dr- mixed with ½ part of flour to make it adhesive. Hellebore and Pyrethrum are used chiefly on ripening fruit, as they are much less poisonous than the arsenites.

RESIN LIME MIXTURE.

In spraying for chewing insects on plants with smooth leaves as cabbage and cauliflower, it is difficult to make the poison adhere. This may be overcome by using the arsenites in the following material:—

Pulverised Resin	5 lbs
Concentrated Lye	1 lb
Fish Oil (or other animal oil except tallow) 1 pint	
Water	3 gals

Heat oil and resin with a gallon of water till the resin is softened. Add lye, the remaining 4 gallons of water, boil about 2 hours or till the mixture will unite with cold water. Add water to make 5 gallons of this stock solution. When needed for spraying take:—

Resin Mixture	1 gal
Whitewash	3 gals
Paris Green	4 lb
Water	16 gals

Use this mixture only in a barrel or knapsack pump, as it is liable to clog the valves.

Sulphurisers

"Knapsack" Sulphuriser

(MU 138)

For distributing Sulphur Flower and other Powders for the Destruction of Mildew etc.

Capacity, 22lbs

Price, £2/2/-.

MU 138.

The value of the "Knapsack" Sulphuriser is now fully recognised, and it should be in the hands of all up-to-date vigneron. For distributing sulphur it stands unrivalled, doing its work with economy. It does not blow the sulphur out in a thick mass, but distributes it in a fine cloud that enables the operator to give to the vines a sufficient quantity of the sulphur or other powder for the effectual destruction of the fungus pest it is desired to exterminate. This advantage would be fully appreciated by those who have used the old style bellows, and found the sulphur blown out suddenly in a thick mass, which, if not dusted from the vines, would eventually do more harm than good. Then, again, the saving of time to those who employ hired labor is a point that cannot be overlooked. If you do not use the "Knapsack," you are behind the times; obtain one for the present season, and, after using, its value will be fully appreciated, and you will be money in pocket. The illustration fully explains how it is used.

EVERYTHING SOLID VALUE

F. LASSETTER & CO., LIMITED

Spraying Nozzles

The use of the Nozzle in creating spray is universal, and by its wonderful adaptability all arsenical and poisonous preparations are brought directly in contact with insects, moths, etc., effectually exterminating them.

NOTE.—When ordering Nozzles, state the size and thread of the connection you wish to screw it on to; or if you wish us to supply nozzle and connection, quote the inside diameter of the hose.

MU 139.

"CLIMAX"
NOZZLES

These cuts illustrate the "Climax" Nozzles. No. 3 shows the outer end covered by a wire screen, which cuts the water into a mist or spray. No. 2 shows nipple end of same. No. 1 shows the Nozzle entire. The Nozzles are simple in construction, cannot get out of order, and are very durable, being made entirely of brass.

We stock four sizes, Nos. 2 to 5. These sizes are intended for conservatory, flower garden, orchard, and field use. Price 3/6

MU 140

"TRIPLE CYCLONE" NOZZLE.

This Nozzle is very well known. It has three discharge orifices on the main delivery. It shows a large volume of spray in a mist-like form, and will cover a tree quicker than any other Nozzle made.

Price 9/6.

MU 141

THE
"INCOMPARABLE" BOR
DFAUX SPRAY NOZZLE.

The "Bordeaux" Nozzle is the simplest and best combination spraying Nozzle on the market. It throws a solid stream or a fan-shaped spray, adjustable to any fineness; is readily degorged by turning the cock handle. It will also throw a long distance coarser spray for spraying very large trees; or it may be shut off altogether—features possessed by no other Spray Nozzle.

Price, Original Bordeaux, 4/6.

"VERMOREL."

Each with Degorger.

"Vermorel" Spray Nozzle with Degorger, affords a conical discharge, adapting it for close range spraying of vines, trees, etc. The liquid is forced through an eddy chamber and discharge cap.

This Nozzle is constructed in two sections, making it possible of being taken apart and cleaned. The one piece Nozzle, when plugged, is worthless. It has a stuffing-box, which prevents leakage. It is readily cleaned in operation by pulling or pressing the Degorger against limb of tree.

COUPLINGS.

Connection for Hose and Iron Pipe.

Is used on discharge hose of "Knapsack" Spray Pump, to connect Spray Nozzles. It is also used with iron pipe extensions. Price, cut for 3 in. Pipe and 1/2 in. Hose, 1/6.

MU 157.

BRASS STOP COCK.

Is designed to be used with any of our Spray Pumps, to shut off spray quickly and save loss of liquid. It has shank for attaching 1/2-in. discharge hose, and 1/2-in. male pipe thread to attach Spray Nozzle or extension. Price 2/3

BRASS WHEEL VALVE, used as above.

Price 3/6

MU 158.

NOZZLE HOLDER EXTENSION.

For spraying large trees, the Nozzle Holder Extension will be found a great help. Take a light pole, fit one end to holder, as shown in illustration. With this the Nozzle can be elevated amongst the branches, and the highest trees sprayed with ease. The holder will fit all our Nozzle Connections, except "Figaro." Price 3/-

MU 159.

BAMBOO EXTENSION.

In place of long pole mentioned above, the Bamboo Extension will be found an improvement. This consists of a length of bamboo with a piece of solid brass tube running through the centre; to the latter are fastened two nipples, one end screws on to the tap connected with the hose, and on the other to the nozzle for distributing the liquid. The connection is very simple, and, in use, the extension will be found far more convenient than the pole. This extension can also be used in connection with the "Knapsack" Pumps, but we do not recommend these Pumps for spraying trees. Price, 8ft. long, 8/6 each. Longer Lengths, 6d. per ft. extra.

Incubator Thermometers

An accurate thermometer has much to do with successful results with an incubator and brooder. In fact, failures are quite often the result of the thermometer being two or three degrees off. Ours are the best that experience and money can produce. The glass tubes are blown two years before they are filled and sealed, and we offer for sale only those which are thoroughly seasoned and tested.

Price, 3/3.

Singer's Egg Producer

This poultry food and tonic is rapidly coming into favor. It is now used by the leading breeders and keepers of poultry in Australasia. "Singer's Egg Producer" is a scientifically prepared Food, designed for the sole purpose of assisting nature in the production of eggs. In chick raising this preparation is invaluable. The young birds will grow up strong and mature much earlier when it is used.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

No. 1 Indoor Brooder Price, 37 6.

Realising the need of a low-priced and effective brooder for those who desire something cheaper than the renowned Des Moines Successful Brooders, we have designed three brooders for which we claim superiority over any so-called cheap brooder on the market. These brooders are as near perfection as it is possible to construct a brooder where a regulator is not used. Like the Des Moines, they are perfect in the supply and distribution of the heat. The heat, though produced underneath, is distributed from the top of the brooder, and bottom heat is not used at all.

A further important feature is that the centre of the brooder is the warmest, thus preventing the chicks crowding into the corners of the machine. The advantage of this will be obvious to all poultry-raisers.

As will be seen from the illustration, this is for indoor use only. It has a wire-netting top, but the two pieces shown supporting the top are not supplied with the brooder being used only to enable the photographer to obtain an interior view. As shown with run down it has a floor space 24 x 24 in.; it will be noticed that this run or platform, leading to the

MU 163.—No. 1 Indoor Brooder.

ground level, is hinged. This enables the brooder to be closed in at night, keeping in the chicks, and making the brooder rat, cat, and vermin proof. When thus closed, it has a floor space 28 x 24 in., and will mother from seventy to eighty chicks. It is easily cleaned, as every inch of the floor is easily accessible.

No. 2 Outdoor Brooder, Price, £25 -

A demand has arisen for a thoroughly well-built outdoor brooder at a low cost. With our No. 2 outdoor brooders we are in a position to meet this de-

mand, placing before you the most perfect and cheapest outdoor brooder yet introduced to the market. It may be placed in any exposed position, and no matter how boisterous the weather, the chicks, when in the brooder, do not run the slightest risk from the cold or wet. The system of heating is exactly the same as in the No. 1 brooder, but it will be noticed from the illustration that it is far more elaborate in construction. It is shown with the run in position to enable the chicks to get from the ground into the brooder. This run is very easily detached, and the two holes or inlets for the chicks close with sliding doors. It has glass at the side, giving a good light inside the machine. The ventilation is entirely under the control of the operator. The roof is hinged, and can be held in any position by a support on the inside, or can be thrown right back for cleaning out the inside of the brooder. This machine has a floor space 24 x 28 in., and will mother up to 100 chicks.

MU 164.—No. 2 Outdoor Brooder.

No. 3 Outdoor Brooder. Price £2 12 6

EVERYTHING SOLID VALUE

INCUBATORS.

We realise that it is not always an easy task for a stranger to make a wise selection of an incubator, especially so after reading a dozen or more catalogues, all claiming to be the best and the cheapest. To secure a **GOOD** incubator a fair price must be paid. We call attention modestly to the meritorious features of our machines, knowing whatever we may offer in that direction will be considered as coming from a competitive source, and the fair-minded reader weighs it accordingly. We shall not attempt to influence your choice by making use of boastful and far-fetched statements. We prefer to state facts, just as they are, even though we lose some business in consequence, realising that we will gain by it in the end.

MU 191.

The Des Moines Co.'s No. 0 Little Crescent Hot Water Incubator.

MU 191.

54 Eggs.

Price, £3/17 6.

We are justly proud of this baby of ours, which though small, is perfect in every detail. Introduced to supply the demand for a small hatcher, it has been most cordially received by the chicken-raising public. It has made friends wherever introduced. It is not a plaything, but a sure-enough hatcher.

Every article necessary for the operation of this hatcher goes with it. In construction it is highly ornamental. Its work is not to be compared with other cheap incubators. It has a capacity of 54 hen eggs or 46 duck or turkey eggs. In style and finish it is much like the Eclipse hatchers. It is made of high-grade white pine, varnished. Double doors and casings throughout furnish the greatest amount of protection against cold. Copper tubular tanks and heaters, made of the same high-grade quality as our other hot-water heaters, are furnished with each machine. In fact, these hatchers are made for business and durability, and are good for twenty years' service. Our direction book, which is furnished with each machine, tells just what to do from start to finish.

The Des Moines Co.'s No. 6 Improved Eclipse Hot Water Incubator.

100 Eggs.

Price £5 17 6.

Possessing many of the merits of the higher-priced incubators, the Eclipse meets the demand of those who desire a less costly machine than our Success-fuls. While a low-priced machine, the workmanship is of excellent quality, although lacking some of the finish of our more expensive machines.

The Eclipse has been on the market for fifteen years, and has demonstrated that it is the best medium-priced hatcher that solicits public favor. We have recently made some improvements that add to its appearance and utility.

We recommend our Eclipse hot-water hatchers knowing that they will give satisfaction when used according to directions. Our No. 6 has a capacity of 100 hen eggs or 88 turkey or duck eggs. The Eclipse is constructed of a high grade of white pine, thoroughly seasoned. The Eclipse machines are not furnished with the chicken nursery under the trays. The system of heating and method of ventilation are the same as in our other hot-water heaters. Furnished with complete directions and all attachments.

If you are interested in this subject write for our special descriptive catalogue, which contains every information about appliances; also valuable instruction about how to manipulate bees, information that will help you considerably along the road to the pinnacle of success.

Comb Foundation

We again wish to draw your special attention to our

Weed Patent Process Comb Foundation

The superiority of this Foundation over that made by any other process now remains undisputed. Its superiority does not alone rest in the method of sheeting and printing; the process of refining is so perfect that, should the wax, before entering the machine, contain, any particle of impure matter, it is entirely destroyed and eliminated, without in any way destroying the purity or natural color of the wax. This desirability is accomplished through the medium of steam only, neither acid nor any other chemical or foreign matter being used in our process of refining. Do not be misled by any other Foundation sold as "New Process" or "American." The recognised New Process is the "WEED," for which we are the patentees and only manufacturers in New South Wales. For full and interesting particulars of this wonderful process, write for catalogue mentioned above.

Anyone selling Comb Foundation as Weed Patent is infringing our rights and misleading the Purchaser.

Cream Separators

MARVEL SEPARATOR,
14 gallons £4, 15/-

The "Lanz" Separator

MU 169.—With Handle.
No. 1, 16 Gallons, £8.
No. GO, 28 Gallons, £11, 10/-.

How does the "Lanz" fulfil the requirements of a good Cream Separator?

Its perfect working has been attested by "The German Society of Agriculture," which is of world wide reputation. Further, a number of agricultural Schools have tested and proved the "Lanz" Separator to be a great success.

The "Lanz" Separator requires lubricating in 3 places only and uses very little oil.

Works with a handle, and can be bolted to stand on firm tables. Always obtain the correct speed before allowing the milk to flow into the bowl.

"Little Wonder" Separator

Capacity, 9 gals. per hour Price, £4/-

A useful Separator for household purposes and small farmers. There is no longer any need to point out the importance of the Household Separator for the small household. The fact is indeed known and acknowledged, if even not to such an extent as might be desirable. The time is certainly not remote when every owner of a cow will also be the owner of a separator.

The advantages of this separator are:—
That the milk need not stand in pans and absorb dust and impurities from the air, to the detriment of health;

That one need not wait for the rising of the cream, this advantage being of especial value during the hot season, when milk and cream are apt to turn sour. The cream can be separated immediately after milking.

MU 170.—With Lever.
No. H2, 55 Gallons, £20.
No. H3, 75 Gallons, £24.

NEWEST CONTRIVANCE FOR DRIVING CREAM SEPARATORS.

The greater the hourly capacity of a machine, the more tiring it becomes to refill the feed-can, if it lies too high, this with the unavoidable bending necessary in turning the handle requires a considerable effort.

The LANZ SEPARATOR with lever driving contrivance is an important advance in the manufacture of Separators. Driving the machine by means of a lever is more convenient and much less tiring than by means of a crank, especially in machines of the greater capacities. When once the drum has attained the required speed, it is very easy to maintain the same without unnecessary bending which is always very tiring.

No farmer having a LANZ SEPARATOR with a lever will have his employees complaining that the Separator is too hard to work.

Besides this, the arrangement of the lever has made it possible to place the feed can quite low down, so that it can be refilled without trouble.

In short, the lever driven Centrifugal machine in which are combined all the before mentioned advantages is in every respect

The "non plus ultra" of Cream Separators.
Easy driving without tiring bending, can only be accomplished by means of the lever driving contrivance.

F. LASSETTER & Co., LIMITED

LASSETTERS' CONCUSSION CHURN.

(MU 173.)

MU 173.

VERY POPULAR IN
FACTORIES,
AND RECOMMENDED
BY MANY OF THE
LEADING BUTTER
MAKERS IN THE
COLONY.

These Churns are as easy to work as the Barrel Churn, and being perfectly plain inside, can be kept clean without difficulty.

As the whole of the cream must fall from side to side as the Churn revolves, the cream is churned equally, thus bringing all the butter at the same time, and preventing the streaky appearance too common in ordinary butter.

DIRECTIONS.—Pour in sufficient water and revolve churn two or three times, then open brass gate to permit the steam to escape, closing, again and again revolving as before several times, then open the gate and allow the water to run out. Then pour in a bucket of cold water and revolve the churn a few times, to well rinse and cool; run water out as before, and put in your cream. As cream expands greatly during the early part of the churning, it is necessary to partly open gate about every twenty seconds to allow the air to escape (opening thus about four times is sufficient) the churning can then be proceeded

with. In very hot weather the Churn requires being turned very steadily (about twenty to thirty revolutions per minute), increasing the speed in cooler weather; and in winter it may be turned as fast as desired without danger. It will be known when the butter has come by the difference in the sound and by the glass in lid of churn becoming clearer. The buttermilk should be drawn off through the brass gate. Water can then be poured in and the churn rocked back and forward or revolved so as to wash the butter; this can then be run off and more poured in as often as deemed necessary.

Revolution in Dairying.

Received First Award at the 1893 Exhibition of the Royal Agricultural Society of London.

Butter Made in Five Minutes.

The Superiority this Churn claims to have over others is—

- 1st. It makes the butter in Five Minutes.
- 2nd. Having an open top all gases escape freely.
- 3rd. It renders the grain perfect.
- 4th. The butter can be brined in the Churn.
- 5th. The butter does not require handling.

MU 175.—THE DRYER.

The Centennial Bentwood Churn

MU 177.

This is, without doubt, the best Box Churn ever introduced; its special features are as follows:—The bottom and sides are made of one piece of bentwood, thus obviating the unpleasantness arising from so many crevices in the Churn, into which pieces of butter find their way, and no end of trouble is caused in the endeavor to keep properly clean. It has a double dasher, which can be easily taken out by unscrewing the spindle handle which passes through the centre of Churn.

Zinc-Lined Thermometer Churns

These are so constructed that cream or milk is readily brought to the desired temperature without mixing water or other substances, and the temperature certainly and definitely determined, which proves invaluable in the art of making butter.

One improvement consists in the construction of a double bottom, made in the form of a semi-circle of two sheets of zinc, placed one above the other, the cream to rest upon the uppermost; between the two sheets forming the bottom is a space or chamber, into which may be introduced cold or warm water, as may be required to increase or diminish the temperature of the cream or milk.

MU 178.

Another improvement is a thermometer permanently placed in one end of Churn, entirely secured from breaking or accident, marked at 62 degrees, and which is always visible, so that the operator may know and determine with certainty when the cream or milk is brought to the proper temperature. If the cream is too warm, the mercury in thermometer will rise above the mark of 62 degrees, and cold water should be applied in the chamber described; if too cold, the mercury will fall below the mark, when warm water must be used instead of cold. The cream or milk should be stirred or agitated by turning the crank while the water is being introduced to give the cream or milk an equal temperature throughout. When the thermometer indicates that the cream or milk is of the proper temperature, the water may be drawn out through the tube placed for the purpose, when the churning should be performed by giving the crank about forty revolutions per minute.

The Churn is simple in construction—is light, portable, durable, very easily operated, and readily cleansed.

The "Albany"

Combined Butter Worker and Table

MU 179.

The Butter Worker when used as a Table.

MU 180.

The Butter Worker when in use.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

This convenient and powerful Butter Worker is recommended for medium size dairies. It rolls out the butter into fluted layers by a forward movement, and again rolls or lumps it up by a backward movement, ready for re-rolling, thereby ensuring not only its being perfectly clean, but also perfectly salted in the easiest possible manner. When not in use as a Butter Worker, the fluted roller can be instantly removed and placed between the galvanised iron standards in the bottom stay of the table (see illustration), and when the tray is reversed and secured, it forms a most useful and convenient Dairy Table. (See annexed drawing.)

The tray and roller are made of the best sycamore, the working parts of best hardwood, and the table is well framed and bolted.

"One of the best-made implements ever introduced into the dairy."—Professor Long.

No. 1—20in., £6; No. 2—24in., £7/10/.

Special Quotations for Rotary Workers for Factory use on application.

BUTTER WORKERS.

These machines work the butter perfectly, and expel every particle of buttermilk and whey without the hands having to touch it at all, and their first cost would soon be saved by the production of better butter, that will command a better price than butter made by the hand.

"The reason why the superior butters of the Continent keep sweet and retain their delicious flavor so long is mainly attributable to their being kneaded by Mechanical Butter Workers, which expel every particle of the objectionable buttermilk and whey."

Awarded the Special Silver Medal of the Royal Agricultural Society of England.

The "Little Albany" Butter Worker

MU 181.

The "Little Albany" Butter Worker is a very compact and portable modification of the "Albany," and is specially adapted for small dairies; it can be used upon any ordinary table, and after use can be put away on a shelf, or hung upon a wall-hook or bracket.

No. A, 14-in., £3/13/-; No. B, 17-in., £4/10/-.

Butter Board

For Family Use.

MU 182.

Recommended by the Royal Agricultural Society of England.

Price, 35/.

The open end should rest upon a table or other convenient support.

The "Alderney" Butter Worker

MU 183.

The "Alderney" is a compact, efficient, and inexpensive Butter Worker, specially suitable for small dairies.

The loose handle A (see drawing) is held to revolve the fluted roller, and the fast handle B is held to collect the butter into a lump for re-rolling.

When not in use as a Butter Worker, the fluted roller can be placed underneath the tray out of the way (as shown in the drawing), and the tray used for other purposes, such as making up butter, etc. Behind the plug is fixed a hook upon which to hang a pail to catch the buttermilk which drains to that corner.

Price, £2/5/.

Milk Testing Machines

The Patent "Victoria" Testing Machine

For Milk, Butter, Lard, etc.

The importance of being able to test the quality and richness of milk will be admitted by everyone. It is important to the farmer, who naturally wants to see that his cows are giving him that return in the richness of their milk which he is entitled to expect. It is important to the butter or cheese maker, more especially in face of recent discussions, which have so emphasised the value—and, indeed, the necessity—of Uniformity of Quality as one means of meeting foreign competition. It is important to the dairyman, who merely buys from the farmer to sell to the public, as the selling of an improper article exposes him to severe legal penalties, as well as to the publicity calculated to do him great harm. It is important to the hotel proprietor, as few things are more quickly recognised or more highly appreciated by the public than a superior quality of milk at the breakfast table. It is important to the superintendent of the hospital or asylum. Lastly, it is important to the general public, and to the borough or other official analyst, who, in the hands of the interests of the public in this respect are entrusted.

"No-Tin" Milk Tester

MU 192.

This machine is now in use in nearly all the butter factories and creameries throughout the colonies, and is without doubt the best Tester of the day.

The managers of our dairy factories alone know its benefit better than any other. The Tester, since paying by result has become a necessity. It is not the quantity of milk that pays, but the yield of butter-fat contained therein. Many cows will give 50 per cent. more milk than others, while the yield of fat from the cow giving the smaller quantity of milk will oftentimes be much greater.

Supplied in Sizes—

10 Bottles	£4
12 Bottles	£4/10/-

Prices of larger on application.

C.S.19.

MU 188.

Nevertheless there has hitherto been no method generally available, and at once simple and rapid, by which the quantity of milk could be accurately ascertained. Analysis or evaporation, though, of course, the most perfect methods, and necessary for certain purposes, are tedious, costly and wasteful, and require special knowledge and training: whilst the only other method hitherto used on a practical scale requires at least 12 to 24 hours, is much affected by the weather and at the best gives results which are only roughly correct. Indeed, the want of a simple apparatus by which quality or richness of milk could be quickly and accurately determined has long been felt.

The little machine shown on this page perfectly meets this want.

Price £2/10/-.

MU 193.

CIRCULAR WINE PRESS, as illustrated, £2/5/-.

EVERYTHING SOLID VALUE

CF. LASSETTER & CO. LIMITED

CHEAPSIDE, SYDNEY,

For all YOUR REQUIREMENTS in

Vehicles, Coachware, Harness, and Saddlery,

Always Specify LASSETTERS' Goods if you Really Want the Best Value
Lassetters' especially INVITE ORDERS from those who desire a BETTER CLASS OF GOODS
than are generally sold at REASONABLE PRICES

GENERAL COACHWARE AND VEHICLES

When Ordering, please give full particulars of your requirements, as it will greatly assist us to know the class of work for which goods are required.

NOTE. The weights stated in our Catalogues are approximate only, and all prices in these sections are subject to market changes.

SPECIAL NOTICE. The great scarcity and difficulty in securing a full line of all kinds of American Carriage Woodware, and the increasing demand for its use here is having the result of constantly advancing prices. Our prices are now based on the present market rates, but let no one be surprised at advancing prices. They are sure to come; each year will be higher than the previous one. Lassetters' prices, however, will not at any time be higher than other houses for the same quality of goods.

Carriage Woodware.

HICKORY RIMS.

Our rims are made from a superior quality of second-growth timber, and are recommended to those desiring the best. All Rims are thoroughly seasoned, planed on all sides, bent to a true circle, and cut 4 inches longer than half circle, to allow for nailing and season checks.

When ordering, always mention depth last—thus, 1½ x 2 deep. All Rims in sets and pairs up to 1½ wide are supplied ½ inch deeper than width; larger sizes are ¾ inch deeper. We stock Rims in sets, 3ft. 8in. and 4ft. 2in., and in pairs 4ft. 4in., 4ft. 6in., 4ft. 8in., and 4ft. 10in. Special sizes bent to order. Prices on application.

COLONIAL (HARDWOOD) WHEELSTUFF.

We are prepared to supply every description of Colonial Hardwood Wheelstuff. We stock nothing but the best in Naves, Felloes, and Dressed Spokes.

SPECIAL NOTICE.

Owing to continued demands for seasoned Wheel Material in all sizes, we desire our customers to distinctly understand that we cannot guarantee to fill orders from thoroughly-seasoned Colonial Hardwood. We will use every endeavor to supply such in ordinary stock sizes when available, and in special sizes when practicable.

When ordering, please be careful to give diameter and length of Naves, also number of holes wanted; depth and width of Felloe, and if Spokes require to be shouldered or dray-pattern.

NOTE.—Naves are usually supplied with 14 holes, and Felloes are stocked to suit 4 ft. 8 in. and 4 ft. 10 in. Wheel.

PRICE LIST FOR TYRING AND MOUNTING WHEELS ONLY.

We are prepared to furnish Wheels Tyred and Mounted complete. This work is entrusted to experienced workmen only. We prime all Wheels either in lead, or size, according to requirements. This process is necessary to prevent soaking of water into Wheels when trying. Unless otherwise ordered, we prime all Wheels in lead.

SPECIAL NOTE.

Special care is exercised in setting Tyres of Wheels, but we cannot provide against climatic changes. The driest timber is most effected in damp seasons, and the best-seasoned timber will shrink away from the Tyre in unusually dry weather. It is essential that Tyres and all Bolts should be carefully attended to immediately Tyres begin to loosen. No Wheel, however good the material or workmanship, will stand unless the Tyre is kept tight, and the Wheel in proper dish. Time or service does not alter this rule.

COLONIAL HARDWOOD DRAY WHEELS (Wood only). Usual height

Note.—Dray wheels price includes Hoops fitted on

Axles

We stock only highest-grade English and American Axles. For strength, durability and finish, our Axles have attained a high reputation. We carry a complete line suitable for every class or kind of vehicle. Extra boxes can be supplied.

When ordering extra Boxes, please be particular to give exact measurements of all sections, also make of Axles, if possible, as Boxes by different makers vary considerably. State length of Box over all, inside diameter at each end, and depth of all collar sections. These particulars are very necessary to ensure correct fit.

In calculating maximum weight load for all Axles, due allowance must be made for weight of body, which is not included in estimate. All dimensions, weights, etc., are given approximately, and without responsibility.

IMPROVED SPRING CART AND VAN AXLES.
English Nut End, Round Bed, Solid Collar, Bright Nuts, Hard Chilled Boxes, Linch Pin outside Nuts, with Wrench.

NOTE—Arms of this Axle are extra large in front of Collar, ensuring great strength. Boxes are bent-shaped to correspond, and are turned a true taper. Stock Sizes

LONG DISTANCE (Plated Double Nut) STEEL PATENT OIL AXLES, with Wrench.

NOTE.—Like the Collinge Collar Axle, the form of the Collar and Box secures the exclusion of dirt or grit, and the retention of the oil. This Axle is supplied in two styles—Single and Double Nut. The Single Nut is the simplest, being no different as to number of parts from the Ordinary Half Patent Axle.

The Double Nut form has an additional cap on outside of nut, not for use in oiling, but to make the point of the Axle, as well as the collar, dirt and oil proof. These Axles are guaranteed by the manufacturers to run from one to three months, according to use, without re-oiling.

VEHICLE SPRINGS

Our Vehicle Springs are warranted made from best Spring Steel, thoroughly tested by steam power, and well finished. We make special Springs to any specification, and guarantee the quality.

When ordering, please state width of Spring, number of plates, length from centre to centre of eye, and, if required to match springs in use, state compass at centre of spring, outside measurement. The stock thickness of plates of all spring is 1/2 inch, and

5-16 in. Main Plate, with the exception of 2 1/2 x 8 and 9 plate Cart Springs, the Main Plates of which are 1/2 in. thick, and remainder 5-16 in.

In calculating maximum weight of load for Cart Side and Elliptic Springs, due allowance must be made for weight of body, which is not included in this estimate. Weight and strength of Springs in all cases are approximate only, and are given without responsibility.

BLACK FINISH CART SIDE SPRINGS.

As illustrated Stock sizes.

IMPROVED PATTERN TUBULAR BUGGY DRIVING LAMPS

This Lamp ensures a Good, Safe, Reliable Light. Will not Blow or Jar out. Burns Kerosene. No smoke, no smell. MV 83 Pattern is Fitted with Back Spring for Attaching to Front of Dash, also with Projecting Lens. MV 84 is fitted with Side Flange for Attaching to Side of Dash. MV 84A is intended for use with Bracket Attachment only.

Both Styles have a Sin. Dial, giving a 30 Candle-power light. A recent improvement to this popular seller has been introduced by adding Projecting Lens, which will give a Light to 70 Candle power, thereby projecting light farther than any other Buggy Lamp.

MV 83.

All Japanned, Nickel Rim, 10/- each.
Nickel Rim and Upper Flanges, 18/- each.
Projecting Lens, 2/- extra in either quality.

MV 134

THE "A1" STEEL CARRIAGE JACK. SELF-LOCKING.

MV 128.

Is desirable in every way insuring, as it does, lightness, with strength and compactness.

There is not a particle of cast or malleable iron in its construction; consequently no annoyance from breakage.

It has double levers near the base, giving great lifting capacity for the size of the jack. These levers are mainly inside the steel case, free from obstruction, and are all near the base. It will be observed that whatever may be the height of the axle, it is sustained directly over the centre of the base, thus obviating any tendency to carry the wagon forward or back and tip the jack over.

The adjustment is convenient and rapid with a wide range in height, to fit all ordinary vehicles.

Vehicles

All vehicles are supplied with steel axles, hard spindles, and have double collars. We can furnish Collinge Collar Axles at an extra cost of 5/- per axle. We can also fit Richard's Patent Long-Distance Axle (guaranteed to run 1,000 miles without re-oiling), to all vehicles, 15/- per Axle extra.

Best Quality Springs only used, made of Special Spring Steel, and thoroughly tested.

Round Edge Tyre projecting over rims of wheels to protect face.

Shaft Mountings are supplied in Japanned, Nickel, Brass, or Silver, as required

(See special remarks re Wheels, Tyres, etc., on page 982.)

SPECIAL NOTE.

Especial care is exercised in setting Tyres of Wheels, but we cannot provide against climatic changes. The driest timber is most affected in damp seasons, and the best seasoned timber will shrink away from the tyre in unusually dry weather. It is essential that tyres and bolts should be carefully attended to immediately tyre begins to loosen. No wheel, however good the material or workmanship, will stand unless the tyre is kept tight, and the wheel in proper dish. Time or service does not alter this rule.

CARE OF VEHICLES.

DO NOT allow mud to dry on a newly-varnished vehicle. Mud from macadamised roads contains lime, and should, therefore, be carefully removed after using the vehicle. The vehicle should be washed in clear, cold water, with a sponge, and should be wiped

dry with a chamol. DO NOT USE SOAP OR HOT WATER. Varnish will lose its lustre, and paint will fade if the vehicle is left to stand near stable manure or decaying vegetable matter, or come in contact with lime. The cloth in the trimmings also fades more or less from the same cause. After the vehicle has been used, it is essential to take off wheels clean axle arms, and re-oil. Be careful not to screw up axle-nuts or caps too tightly. See that vehicle is properly provided with washers, and that all nuts are thoroughly screwed up

WHEN ORDERING.

- (1) State color of painting desired, and kind of trimming, if leather, duck or cloth
- (2) Style of Wheels required, whether Sarven Patent, or Wood Hub, width of spoke AT HUB, also height of wheel.
- (3) State if Pole or Shafts are required, or both.
- (4) Kind of Springs required.
- (5) Do not cut illustrations of Vehicles or Lamps, but order by number.
- (6) Give full directions for and to whose care consignments from Sydney should be made. We carefully pack all vehicles, unless otherwise ordered, at an extra charge—Buggies, 20/-; Sulkeys, 12/6; delivered F.O.R. Steamer or Rail.

RAILWAY RATES FOR VEHICLES.

Buggies, 4d. per mile; Sulkeys, 2d. per mile, if sent on wheels, but if packed in crate are carried at third-class rates. Buggies weigh from 350 to 500 lbs. varying according to style. Sulkeys weigh about 100 lbs. Crate, 70 to 100 lbs

F. LASSETTER & CO., LIMITED

**LASSETTERS'
PATENT HAMELESS HORSE COLLAR**

Patent No. 7901.

**A New Invention in the construction
of Horse Collars.**

MV 198a—Buggy Collar.

MV 198b—Cab or Light Spring Cart, Pagnel Cart
or Coach Collar.

HAMES ENTIRELY SUPERSEDED.

THE NEATEST, LIGHTEST, AND MOST PERFECT-FITTING
COLLAR EVER INVENTED.

ADVANTAGES :

1. Half the weight of the ordinary Collar and Hames.
2. Will outlast the ordinary pattern collar and retain its shape under all conditions.
3. No more Breast collars necessary, as LASSETTERS' PATENT is so constructed that the draught is more evenly distributed than a Breast-collar, and is much easier on the horse's shoulders.
4. Can be fitted or removed in a moment.
5. This invention removes all difficulty and annoyance usually experienced with ill-fitting hames, besides effecting a saving in cost of hame straps.
6. A great advance on the old style at NO EXTRA COST.

CHEAPSIDE, SYDNEY.

1894.

UNIVERSAL PROVIDERS.

Comparison is invited to demonstrate its
great superiority over all others.

PRICES.

For Buggy and Sulky Collars, with Tugs for 1½ or

and felt lining.

SPECIAL NOTICE.

LASSETTERS' are Sole Distributing Agents for the
whole of New South Wales and Queensland, and will
gladly answer all enquiries and give any information
required concerning this useful invention.

WHEN ORDERING PATENT COLLARS

Give exact length measurement inside rim of old collar as illustrated, MV 196,
Page 1007.

We will furnish our Patent Collar with any set of Harness ordered, CHARGING THE
DIFFERENCE ONLY WHERE NECESSARY between the collar and hames ordered in
single or double Buggy or Sulky Sets, also collar and hames of Spring Cart or Cab Sets.
The difference in price, it will be noticed, will really only apply to the Cheapest Quality Sets on
our List.

When requiring a new set of Harness or Collar, DON'T FORGET TO SPECIFY

LASSETTERS' PATENT HAMELESS COLLAR

in your order, and recommend it to your friends. You take NO RISK as Lassetters' guarantee
all they claim for it, having TRIED AND PROVED ITS MERITS.

We particularly desire to introduce to smokers of a high-class Tobacco, our **KENTUCKY MIXTURE**, a choice blend of the finest tobacco, carefully selected in the States. This high grade Mixture is guaranteed to be of the highest quality, and we guarantee it absolutely pure. It is a most reliable and healthy smoke, and is highly recommended by all who have tried it. A fine rolling pipe will give the best results.

Our trade in Cut Tobaccos is growing far beyond our expectations. We are now packing in cases of 1 lb. each, and have it in Band, and have it cut medium gauge, to ensure cool smoking. It is then specially packed in airtight tins, and is delivered to you thus get your tobacco in perfect condition.

Block, medium	8645	6/6			

A good Pipe is always a cheap Pipe, because it outlasts the common Pipes, and the longer it is smoked the sweeter and better seasoned it becomes. Many smokers who indulge in a really high-class tobacco, and yet only use a cheap pipe, often wonder why they do not thoroughly appreciate their smoke! The reason lies not with the tobacco, but the pipe. To enjoy good tobacco, a good Pipe is absolutely essential. Be sure and use a GOOD PIPE.

Lassetters' Silver-Mounted Briars are the Best. Guaranteed against Cracking or Burning.

UNIVERSAL PROVIDERS.

Gun and Rifle Repairs a Speciality

We have an efficient staff of skilled gunsmiths, and any work entrusted to us is carried out equal to London workmanship, and prices charged are the lowest possible consistent with good work.

Never send your repairs to country blacksmiths, as invariably more harm than good is the result.

Send us the whole of your Gun if you require it re-Stocked, new Fore End, tightening Action, alterations to Strikers, new Extractors, etc., or if new Hammers or Locks are required in Muzzle Loading Guns.

When parts of Locks, Springs, etc., are required, it is always necessary to send broken pieces as samples.

Fittings are only kept in the rough, and require to be altered to fit the respective Guns they are desired for—no two weapons taking the same.

We are always pleased to thoroughly examine Guns and Rifles, and quote prices for effecting necessary repairs before proceeding with the work.

We have no outlet whatever for second-hand firearms, and consequently cannot allow anything for Guns that have been used.

It is very difficult to quote prices for repairs without first examining, but the following may be taken as approximate prices—

Re-Stocking ordinary Guns with reliable work and material, with Plain Stock, which only includes the wood-work, and not Locks, Trigger Guards, etc. from 50/- upwards
New Pistol Stock from 80/- upwards
New Fore-End from 30/- upwards
Re-Browning from 10/- upwards
Fitting New Hammer from 5/- each
Fitting Strikers from 2/6
Fitting Mainsprings from 5/- each
Fitting Top Action and Seer Springs, from 1/6 each upwards
Fitting New Locks from 10/- pair upwards
Re-joining and Tightening Actions, from 10/- upwards
Stripping and Cleaning only from 5/- upwards
Re-Boring Barrels.—Alterations to Choke Boring and Stock-Bending a speciality

Rifles

MX 40.—THE NEW DAISY WINCHESTER TAKE-DOWN RIFLE'S PRESENTATION MODEL

To meet the demand of Sportsmen for a light, quick-firing Rifle, we have pleasure in offering the New "DAISY" Rifles, which are undoubtedly the very best of modern sporting weapons ever introduced. The "Take-Down" Rifle is so arranged that the Barres can be easily removed from the Stock, which makes it very handy and portable. It is offered in 12, 14, 16, 18, 20, 22 and 24 Calibre. 24in. Barrel, Oct. weight 7½lbs. £4 10/-

MX 42.—THE SPORTING "SNIDER" RIFLE, commands attention, the simplest and strongest action, best of none (as it is said). Best Quality, special value. £3

The Sporting "Snider" Rifle, .430 Calibre, No. 1 will allow us to take the place of a very fine, and weighs only about 5½lbs.

MX 44.—THE "RAPID" SPORTING MARTINI, is a Perfect Weapon, light, powerful and sure the best that is made, .380 and .442 Calibre. £4 10/-

The "Rapid" is specially built to our order, and is of the best quality, with Safety Bolt, Engine-turned Octagon Barrel with 3 Silver-liner Sights, and is most accurate and deadly up to 300 yards. Buyers can thoroughly rely upon them. Weight, only 5½lbs.

MX 50.—THE "DAISY" WINCHESTER AUTOMATIC RIFLE (M98) made for 22 Automatic Rim-Fire Cartridge only. £4 10/-

The Winchester Model 1903 is a Ten-Shot Automatic Hammerless Take-Down Rifle, using a new, inexpensive, rim-fire cartridge, known as the 22 Cal. Automatic loaded with smokeless powder, and greaseless bullet. The rifle can be shot as fast as the trigger can be pulled. The stock is 18½in. long, with a 20in. round barrel, fitted with open Front and Rear Sights. Length of Rifle over all, 36in. Weight, about 5½lbs.

ORTHOPTICS, Six Apertures, Quick Adjustment,
in Strong Leather Case per pair 7/6
BEST POLARISED ORTHOPTICS, per pair 11/-
THE "IRIS" ORTHOPTICS per pair 20/-
This improved form of Orthoptic has of late been
in great favor. The chief merit is the rapidity with
which the aperture can be adjusted.

NOTE.—No explosives of any kind can be sent
through the post under a £50 penalty.

The minimum charge for sending Powder by Goods
Train is 7/6; it is therefore advisable to make orders
as large as possible to minimise carriage.

Cartridges, Caps, Cases, etc., can be sent at the
ordinary Parcels Rate by Passenger Trains or by
Steamer.

Where Gunpowder has to be sent by Steamer, we
have to engage Powder Magazine, and the cost is
10/-, and a Special Government Permit has to be ob-
tained before it can be forwarded.

JACKS, Special Quality

The above Bowls are turned with special bowl-making machinery, securing absolute accuracy in size and bias. They are tested and officially stamped by an appointed officer of the leading associations, and are sold with a guarantee that they comply in every respect with the standard regulations laid down by the authorities in England, Scotland, and Australia. Only the finest selected Lignum Vitae is used in their manufacture, and the bowls are fitted with large ivory mounts and richly ornamented.

Furnishing Department

Inserters' Furniture Department is most complete, and everything necessary to furnish either a Cottage or a Mansion will be found nicely displayed and marked in plain figures. The Styles are up-to-date and Workmanship first-class, while the Prices are the lowest consistent with the quality. The illustrations will give you a good idea of the class of Furniture in stock, but as new designs are being constantly made, a personal visit, when possible, is preferable. Should the selection be left to us, satisfaction is guaranteed.

Pianos

THE LASSETTER PIANOS, though first-class in every particular, are moderate in price. We do not hesitate to assert that no instrument before the public to-day is so entirely entitled to confidence as the "Lassetter" Piano; and though a much higher price may be demanded for an instrument of some other maker, it will not give greater satisfaction than the "Lassetter," nor will it prove more durable.

SPECIFICATION

Complete Metal Frame, Cross Stringed, Full Trichord, Patent Check and Repetition Action, with Pinned Hammers and Metal-covered Hammer Rest Cross Bar, and Brass Pin Plates with Nickel Bolts, Ivory Keys, Full Compass, Single Sconces, Inner Damper, Wire Back Lining, Truss Legs, Brass Pedal Feet, and Hand Holes. The "Iceberg" Refrigerator (MY 394)

IS THE BEST MADE.

HAS STOOD THE TEST OF TIME.

IS THE MOST ECONOMICAL. CONSUMES LESS ICE THAN ANY ON THE MARKET.

The No. 1 "ICEBERG" REFRIGERATOR can be effectively worked with a consumption of 30lbs of ice weekly, while the No. 9 would not require more than 12lbs. The consumption of ice will vary with the quantity of edibles which require to be cooled.

SPECIAL SIZES BUILT TO SUIT CUSTOMER'S REQUIREMENTS.

No.	Description.	Sizes.			Price.

Lassetters' Duchess Drophead Sewing Machine

MY 447.

Price—Five-Drawer, as shown, £5/15/-; Three-Drawer, £5/10/-.

We anticipate that this new style of machine will commend itself to most housekeepers, as it answers two purposes, viz., an ideal Sewing Machine and, when not in use, an artistic Table.

LASSETTERS' in offering the DUCHESS SEWING MACHINE to the Public, do so with the utmost confidence. They have satisfied themselves that there is no better machine made, however high the price charged.

LASSETTERS' intend only charging a reasonable price for this Machine, and thus put an end to the exorbitant profits that have been the custom in the Sewing Machine Trade.

LASSETTERS' will not sell their Machines on Time Payment, and they are only charging the public for the DUCHESS MACHINE just one-half what is being asked by others for the same class of Machine.

The Best the World Produces for one-half the Usual Price.

Sewing Machine Needles—1/3 per packet.

HAND MACHINE

Price £3/3.

These Machines are finished in exactly the same manner as those worked by the treadle, and therefore can be recommended with the utmost confidence.

MY 448.

Each Machine has a complete set of Attachments as shown on Page 1225. Cost of packing Machine in crate, 2/6 extra.

Our Machines are now made right up to date, with automatic Lift Lid, raising the Machine and securing it ready for use.

No extra charge for this Improvement.

Carpets, Rugs, Mats and Matting

Patterns of Linoleums, Floorcloths and Matting, with all the necessary information submitted free by post on receipt of post-card or letter.

Carpets.

Patent Axminster Carpets, in all the Latest Designs and Colorings, suitable for Drawing Rooms, Dining Rooms, etc. Beautiful and soft effects, New Goods continually arriving—27 inches wide, 5/11, 6/6, 8/11 per yard. Borders, 18 inches wide, to match same, 5/6 and 5/11 per yard.

In this range of Axminster Carpets are to be seen patterns selected from the best British makers only.

We have also a Large Variety in Seamless Axminster Carpets. These are our own Special Designs and Colorings. Exceptionally good value. They are to be had in the following sizes:—

9ft. x 9ft.	£5 7/6
9ft. x 10ft. 6in.	£6 6/-
9ft. x 12ft.	£7 10/-
10ft. 6in. x 12ft.	£8 2/6
10ft. 6in. x 13ft. 6in.	£8 16/-

Axminster Rugs to match above Carpets.—

4ft. 6in. x 2ft.	18/6	12/6	15/-
6ft. x 2ft. 3in.	13/6	16/6	19/-
6ft. 6in. x 2ft. 6in.	18/6	19/-	24/-

As Carpet Squares are now so generally used and appreciated, being much nicer and easier kept clean than covering the whole room, and with a surround of plain Linoleum or Felt, which can be fitted into all the corners and recesses, they present a much better appearance and save the constant moving of heavy furniture. We always have a very large stock in all the different makes of Carpet Squares to select from.

BRUSSELS SQUARES (Bordered).

9ft. x 9ft.	54/-, 63/-
9ft. x 10ft. 6in.	63/-, 70/-

CHEAPSIDE, SYDNEY.

LASSETTERS' DELICIOUS TEAS.

Lassetters' Teas are Guaranteed Absolutely Pure and the freshest leaf in the market. The higher qualities are young leaves of the first crop, bought on the plantations, having the finest plants, for Messrs. Lassetters and Co., Ltd. Even the cheapest Teas are all sound wholesome leaves, and better value than any other Teas sold in Australia. The **A1 Crown Blends** are rapidly growing in favor. For body, flavor, color and aroma, they are **unapproached** by any other blends offered to the public. We pin our Good Reputation to the High Quality and Absolute Purity of Lassetters' Delicious Teas.

LASSETTERS' A1 CROWN MARQUIS BLEND
No. 0. A good, sound, useful, family Tea, 1/- per lb. nett. 5lb. tin, 4/6; 10lb. tin, 9/6; 20lb. tin, 18/6; 36lb. 1/2 chest, 33/-.

Heinz Pure Food Products

We append a SHORT DESCRIPTION and PRICE LIST of these POPULAR GOODS.

TOMATO SOUP, prepared from selected red ripe tomatoes and fresh cream, blended with the choicest spices, resulting in soup that gives zest to the appetite and pleases the palate. Small size tins, 9d.; medium, 1/-; large, 1/6.

TOMATO KETCHUP, made of choice tomatoes, fully ripened on the vines. The ketchup is filled directly into bottles whilst hot, thus retaining the natural flavor. Pleasantly spiced, this condiment is sure to give satisfaction. Octagon bottles, 10oz. bottles, 1/-; Imperial bottle, 1/6.

TOMATO CHUTNEY, made of the whole tomato, seasoned to bring out its delicate flavor. Appertising and nutritious. Screw-top bottles, 1/- and 1/6.

BAKED BEANS WITH TOMATO SAUCE, palatable and nutritious food, composed of selected beans (baked, not boiled), combined with digestion-aiding sauce made of carefully selected tomatoes—Small tins, 8d.; medium, 1/-; large, 1/4.

PLAIN PORK AND BEANS, selected pork and baked beans, without sauce—Medium tins, 10½d.; large tins, 1/3.

MANDALAY SAUCE, made from a recipe of an English officer in the East Indies, prepared from the pulp and juice of choice fruits and vegetables, skilfully seasoned with spices. Stimulating, appetising and piquant. For use with hot and cold meats, fish, and game—1/5 per bot.

TOBASCO PEPPER SAUCE, green or red—per bot. 1/-.

SWEET MIXED PICKLES, thoroughly preserved in sweet spiced liquid; these pickles have a flavor distinctly their own. Octagon bottles, 1/- and 1/8.

INDIA RELISH, prepared from finely chopped vegetables, specially selected. Highly spiced, to give the piquancy which leads zest to appetite. Polygon jars, 1/6.

SWEET GHERKINS, preserved like the pickles. Tender and crisp. Octagon bottles, 14oz., 1/8.

PEARL ONIONS, specially cultivated and pickled in Heinz white vinegar. Small, crisp, white, uniform in size, and of mild flavor, per 10oz. bottle, 1/4.

PICNIC ONIONS, pint bottles, 1/-.

MUSTARD DRESSING, unequalled for salads, and as a base for mayonnaise has no superior. Has a delicate, mellow flavor and never turns rancid, 8oz. octagon bottles, 1/-.

EVAPORATED HORSE RADISH, in granulated form, absolutely pure, and retaining the aromatic flavor and pungency of the natural root. Mix with water. Evaporated Horseradish is a fine relish with oysters, and an excellent seasoning for meats, 8oz. bottles, 1/6.

OLIVES, Manzanilla, in bottles, 1/-.

OLIVES, Selected Queen, everyone perfect—10oz. bot., 1/6; 16oz. bot., 2/6; 24oz. bot., 3/6.

OLIVES, Stuffed 8oz. bottles, 1/6.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

WHEN SHAVING USE ONLY

No. 4711 SHAVING SOAPS.

EAU DE COLOGNE

(Blue and Gold Label).

After shaving, sponge the face with water to which a few drops of "4711" Eau de Cologne has been added—the result is most beneficial and soothing. But take care that your Eau de Cologne is "4711" which is guaranteed absolutely pure.

Analysis.—
"4711" Eau de Cologne is of
the best quality and absolutely
pure.

GRANVILLE H. SHARPS,
F.C.S.L., Analyst

A FOUNTAIN PEN THAT WRITES WHEN YOU WANT IT TO.

There's no need to shake or jerk it to make it write. It's ready for use at a moment's notice. It's just the pen for the man who wants to write quickly and satisfactorily. The flow of ink is free, steady and perfectly regular. Its patent spoon-feed regulates the flow of ink and makes blotting impossible.

We are Agents for the Waterman Pen

which is a good recommendation isn't it? If it wasn't the best fountain pen we wouldn't stock it.

If you want a genuine Waterman Pen send direct to us—we only keep the genuine make.

It's a fountain pen that will give you splendid service and will never go on strike.

The Price is 12/6 Post Free.

For presentation purposes we have them in silver and gold, which make handsome presents for any lady or gentleman.

Greener Guns

THE QUALITY OF A GREENER GUN
IS REMEMBERED LONG AFTER THE
PRICE IS FORGOTTEN. ۞ ۞ ۞ ۞

They have been made for three generations, and some are even now in effective use after fifty years of continuous service.

GREENER guns have withstood in every climate in the world the maximum amount of hard wear that can be given to a weapon of this class, and are accepted as a standard wherever they have become known.

The name GREENER is a gilt-edged guarantee of satisfaction. Every part and every weapon is thoroughly tested, and the purchaser of a GREENER gun gets better value than by owning any other make.

LASSETTERS' Stock and Recommend them. SEE PRICES, page 1049.

... LADIES' ...

Tailoring to Order.

OWING to the increasing importance of this section and the great demand there now is for "REAL TAILORED COSTUMES" we have reorganised this Department, and have secured the services of a skilled Ladies' Cutter, who undertakes that perfect fit, style and general build of a Costume which makes for that most desired effect "Individuality." In this is to be found the keynote of smart dressing, and this is only possible to attain by putting yourself into the hands of the "Artist" Dressmaker or Tailor, as the case may be, who is able to make a study of your individual requirements, and by so doing to turn out the perfect article.

The illustration gives one of the latest developments of the Coat and Skirt. It can be done either in Tweed or in Fox's Serge. It has the whole back coat either S.B. or D.B. front, semi-fitting with the new sheath skirt, trimmed with braid and buttons, ornamentation on coat and skirt being "en suite."

Price to Order from £7/7/-

DRESSMAKING.

Lassetters' Dressmaking Department is now organised to cope with all classes of work, comprising as it does three separate rooms, each under the management of a capable couturiere, employing the best talent procurable, so that they are able to guarantee all their productions as being Up-to-date, well made, well finished, in fact all their productions bear the stamp of "Bon Ton." The high-water mark of Fashion is a seductive simplicity which is most alluring, but which is most difficult of attainment; Lassetters' have produced some notable examples in this Department, which have been exhibited in their Windows and Showrooms from time to time and have enhanced the reputation they have so long maintained as

Fashion Leaders.

This Looks a Good Idea.

A Saving of 20 25 30 per Mile for each Wire.

LASSEYERS

"PATENT SCRATCH"

GALVANIZED

WIRE.

J. F. LASSEY & CO., LTD., SYDNEY.

THE LONGEST THE STRONGEST THE BEST.

WHEN YOU ARE OUT ALL BUSINESS WITH SCRATCH GALVANIZED WIRE YOU HAVE A WIRE THAT IS PROVED TO BE THE BEST.

THIS SCRATCH WIRE WILL BEAT FOR YOU.

It is the only wire made in a special way, and is the only wire that will stand up to the test of time.

Ordinary Galvanized Wire is 100 per cent more expensive than this.

The "Patent Scratch" is 100 per cent more expensive than this.

It is the only wire that will stand up to the test of time. And it is the only wire that will stand up to the test of time.

NOW SPEAK UP. You all know that "Patent Scratch" Galvanized Wire is the only wire that will stand up to the test of time. And it is the only wire that will stand up to the test of time.

Showing that the "Patent Scratch" Galvanized Wire is the only wire that will stand up to the test of time. And it is the only wire that will stand up to the test of time.

There are 100 "Patent Scratch" Galvanized Wires in a bundle, and it is the only wire that will stand up to the test of time.

Sample of "PATENT SCRATCH" Galvanized Wire for examination. For further information, apply to J. F. LASSEY & CO., LTD., SYDNEY.
